REVIEW

OF THE

TRADE AND NAVIGATION OF INDIA

FOR 1874-75,

AS COMPARED WITH PREVIOUS YEARS.

BY J. E. O'CONNOR,

Assistant Secretary, Department of Revenue, Agriculture, and Commerce (Statistical Branch).

NOTE.—*Slight discrepancies may exist in certain cases between the figures in this Review and those in the tables that follow, in consequence of the more detailed mode in which the latter have been prepared.*

INTRODUCTORY.

1. The total trade of India during the year 1874-75, exclusive of stores and treasure on account of Government, amounted to, viz. :—

		£	£
FOREIGN TRADE	Imports	Merchandise - 34,645,236	- 42,786,283
		Treasure - 8,141,047	
	Exports	Merchandise - 56,312,246	- 57,904,968
		Treasure - 1,592,722	
	Total	- 100,691,251	
INTERPORTAL TRADE	Imports	Merchandise - 21,319,328	- 23,781,899
		Treasure - 2,462,571	
	Exports	Merchandise - 23,221,434	- 26,544,759
		Treasure - 3,323,325	
	Total	- 50,326,658	
Grand Total		- 151,017,909	

The value of the foreign trade in 1873-74, and the average value for the five years which ended on 31st March 1872-73, are as follow :

		1873-74.	Average of five years ending 1872-73.
		£	£
FOREIGN TRADE	Imports	Merchandise - 31,644,697	{ 32,688,621 } 42,825,817
		Treasure - 5,792,534	
	Exports	Merchandise - 54,960,778	{ 55,855,742 } 57,072,487
		Treasure - 1,879,071	
	Total	- 94,277,080	99,898,304

The proportion borne by the foreign trade to the total trade was 66·68 per cent. last year. The figures of the coasting trade previous to 1872-73, and for Bombay, even for 1873-74, are defective. It is undesirable therefore to attempt to make here any precise comparison of the trade of the year with that of previous years. It may be said generally that it is steadily increasing.

SECTION I.

FOREIGN OR INTERNATIONAL TRADE.

Government transactions kept separate from the general trade.

2. In this as in previous reviews of the foreign trade, the transactions of Government will be kept separate from those of private trade. The results of the former will therefore be reviewed in this paragraph, and will not be referred to, except where necessary for special reasons in any particular case, in subsequent remarks on the general trade. Their amount is comparatively so small that their exclusion, or otherwise from the total sum of Indian trade will make no appreciable difference in the broad conclusions to be drawn. The figures for last year are 1,656,422*l.*, against 2,291,555*l.* in the previous year, the figures in that year having been swelled by a large import of railway material. The average amount of these transactions for the last five years has been 1,701,269*l.*, and this average has been swelled by the extraordinary item of rice imported from Saigon and China for the relief of distress in Bengal. Deducting the amount of this item (517,458*l.* spread over the two years 1873-74 and 1874-75), the annual average for the last five years is reduced to a little more than a million and a half, as compared with private trade representing a value of more than one hundred millions sterling.

Their value.

Nature of Government imports and exports.

3. The transactions of Government are mainly confined to the importation of arms, ammunition, and other military requisites, malt liquor and spirits for the European troops, marine stores in comparatively small quantities, railway and telegraph material, and coal. The import of such articles accounts for 1,576,851*l.* (of which about a million and a quarter represents the value of stores received from the United Kingdom) out of the total sum of 1,656,422*l.* The small balance of 79,571*l.* represents stores and money sent to Aden, the Persian Gulf, and the Mekran Coast, for the public establishments in those places.

Defective nature of accounts of Government transactions.

4. The figures for the year now given are the totals of the sums entered in the monthly returns of the year, and as they will require correction hereafter when local governments finally revise their accounts before the publication of their annual volumes, they cannot be accepted as final. The figures for the years 1869-70 to 1873-74 entered in the account for the year of report differ considerably from those given in the volume for 1873-74. The values given in the account for that year were the sum of the monthly returns transmitted by the provincial governments to the Government of India, but these were incomplete and imperfect, and the sums now returned are the revised figures as given in the annual accounts of the local governments. It is unfortunate that it has not as yet been found possible to record the transactions of the State in as complete and accurate a shape as the particulars of the general trade. In many cases detailed invoices are not received from England until after the stores have been received and cleared out of the custom houses, and the departments receiving the stores frequently will not in such cases, except after great delay and much correspondence, take the trouble to furnish the customs authorities with the particulars required for our trade statistics. The figures given therefore from month to month are subject to material correction subsequently, and this is one reason among others why it is desirable to keep Government transactions entirely separate from the general trade. Measures are now in progress with the object of securing more accurate and punctual returns from Government departments receiving stores, and it is hoped that a better system will gradually be introduced.

GENERAL TRADE.

5. Exclusive of Government stores and treasure, the total value of the trade of India during the year amounted to 100,691,251*l.*, showing an increase of 6,414,171*l.*, or 6·80 per cent. over the trade of 1873-74, which amounted to 94,277,080*l.* This amount exceeds also by 0·79 per cent. the annual average of the five years immediately preceding 1873-74 (1868-69 to 1872-73), which was 99,898,304*l.* Trade has thus been steadily, though slowly, increasing in value. Imports and exports of merchandise and the import of treasure have increased, while the export of treasure has slightly fallen off. Merchandise was imported to the value of 34,645,236*l.*, being upwards of three millions sterling (3,000,539) in excess of the imports of the previous year. The treasure imported amounted to 8,141,047*l.*, showing an excess of 2,348,513*l.* over the import of the previous year. Exports of goods were made to the value of 56,312,246*l.*, this sum being 1,351,468*l.* in excess of the value of the exports of the previous year. Of these exports 54,501,080*l.* represent the value of goods of Indian produce and manufacture, and 1,811,166*l.* of foreign merchandise re-exported. The export of treasure fell off by 286,349*l.*, the figures being 1,592,722*l.* against 1,879,071*l.* in the previous year.

Value of general trade.

6. The main features of Indian trade which attract attention at the first view are—

Main features of Indian trade :
Excess of exports over imports.

(i.) The constant and great preponderance of the value of exports over the value of imports. The following figures show for the last ten years the value of the imports and exports, both of merchandise and treasure, and the excess in the value of exports :—

Year.	Imports.	Exports.	Excess of Exports over Imports.
	£	£	£
1865-66 - - -	56,156,529	67,656,475	11,499,946
1866-67 (11 months) - - -	42,275,620	44,291,497	2,015,877
1867-68 - - -	47,481,157	52,446,002	4,964,845
1868-69 - - -	51,146,096	54,457,745	3,311,649
1869-70 - - -	46,882,327	53,513,729	6,631,402
1870-71 - - -	39,913,942	57,556,950	17,643,008
1871-72 - - -	43,665,662	64,685,374	21,019,712
1872-73 - - -	36,431,210	56,540,042	20,108,832
1873-74 - - -	39,628,562	56,940,073	15,311,511
1874-75 - - -	44,363,133	57,984,538	13,621,405

NOTE.—Government stores and treasure have necessarily, as will be seen from the subsequent remarks, been included in this statement.

7. The total excess of exports over imports thus amounted during the last ten years to no less than 116,128,187*l.*, i.e., an average rate of 11,612,818*l.* annually, the excess being much more marked in the last than in the first five years of the decade. India has apparently thus had what is commonly called the “balance of trade” against her to a serious extent, having in ten years exported from the country wealth to the value of upwards of one hundred and sixteen millions sterling for which she has received no direct return. This, however, as indeed is well known, is not actually the case. Ordinarily the exports and imports of a country will in a series of years nearly balance each other, but only in countries which are not indebted to other countries. If a country is obliged to make payments to another country, either for borrowed capital, or for expenses of administration incurred elsewhere than in the country itself, or on other accounts, the balance of trade must tell against it. Payment is ultimately made in the produce of the country, and consequently the activity of exportation is stimulated, and the value of exports will exceed the value of the imports by the amount of payment annually due. This is the explanation of the preponderance of exports over imports in Indian trade. We have to pay the home charges, or charges of Government incurred in England on account of administration, and salaries and pensions of officers of the Government

Explanation of the causes of the excess.

on leave and retired, as well as remittances to England by civil functionaries and by officers and soldiers in India. We have to pay the interest on capital borrowed in England by the State for India, and we have also to pay the interest on capital raised by subscription in England for the construction of railways and for other industrial enterprises in India. The nett result is no doubt a considerable drain of wealth from India, without any apparent direct or immediate return. But this drain is in fact the return which India, gives for the foreign capital invested in this country and for the government which has, by maintaining peace under a moderate and well-ordered rule, enabled her so to devolope her commerce as to raise the value of her foreign trade within forty years from not much more than fourteen millions (in 1834-35) to upwards of one hundred millions (in 1874-75). This subject of the balance of trade between India and other countries opens out a series of interesting questions for investigation, but it seems unnecessary to discuss them in the present place.

Relatively small proportions of Indian foreign trade.

8. But although the trade of India has steadily increased, as just shown, from a comparatively small amount, it is capable of still greater development, and this brings us to the second great feature of our foreign trade, viz. :—

(ii.) Its relatively small proportions when regarded in connection with the great area and population of the country.

Indian coasting trade really international trade.

9. Taking the population of India at two hundred millions, the whole foreign trade represents a sum of little more than ten shillings per head of the population. Compared with other great countries, this is an extremely small proportion. It is true that the extensive coasting trade of India, *i.e.*, the trade from province to province, and from port to port within each province, has not been taken into account in the figures given above. Much of this trade is, in fact, though unavoidably treated as coasting trade, as much international trade as is the trade between Holland and Germany, Belgium and France, Italy and Spain or France, Germany and Austria, or Denmark and Sweden, almost as much international, indeed, as the trade between any two countries on the continent of Europe. For India is a continent of many peoples, and the peoples inhabiting the littoral provinces, Bengalis, Ooryas, Burmese, Telugus, Mahrattas, Sindis, &c., are as distinct from each other as most of the races inhabiting the European continent. Even taking this coasting trade into account, however, and adding the trade which crosses the land frontier of India, it is certain that there is still very great room for the further development of our commercial activity.

Bulk of Indian produce consumed in the country ; only enough exported to provide for the simple wants of the people.

10. There can be no doubt that the exports to foreign countries of the productions of India represent only a very small part of the whole production, the great bulk being consumed in the country, though in the absence of trustworthy statistics of agriculture and industry it is impossible precisely to specify what is the proportion of the exports to local consumption. It may be said, however, that only sufficient is exported to pay for India's current debts and to provide for the purchase of the few and simple wants of the mass of the population, so far as these cannot be supplied by local production and industry more conveniently and cheaply than by the import of foreign merchandise. These wants resolve themselves, speaking broadly, into Manchester cotton goods to clothe the labourer, and metals, mainly copper and iron, for his implements and utensils. These items of cotton cloths and metals, together with machinery and millwork (a comparatively new and increasing feature in the Indian import trade) account for more than two-thirds of the total value of our imports, while the great bulk of our exports still consists of raw produce.

Small proportion of re-exports : India a consuming country, not an entrepôt.

11. This brings us to the third feature in our trade, viz., (iii.) the small proportion to the total imports of re-exports of foreign merchandise. India is a consuming country. She is not, as has been just said, favourably situated geographically for an entrepôt, and the bulk of her imports is for home consumption. Of the total

value of merchandise imported, viz., 34,645,236*l.*, goods to the value of only 1,811,166*l.* were re-exported during the past year. These re-exports are principally cotton manufactures and metal, distributed to ports on the African, Arabian, and Persian coasts from Bombay, which is practically the only entrepôt in India.

12. The share taken by each of the littoral provinces in the foreign trade was as follows :

			£
Bengal	{	Imports	20,257,175
		Exports	22,772,218
		Total	43,029,393
Bombay	{	Imports	16,209,518
		Exports	24,213,307
		Total	40,422,825
Madras	{	Imports	3,812,848
		Exports	6,794,938
		Total	10,607,786
British Burma	{	Imports	2,215,258
		Exports	3,042,820
		Total	5,258,078
Sind	{	Imports	291,484
		Exports	1,081,685
		Total	1,373,169

Share of each
Presidency in the
foreign trade.

The proportion was, therefore, in the rate of about 42·73 per cent. for Bengal, 40·15 per cent. for Bombay, 10·53 per cent. for Madras, 5·22 per cent. for British Burma, and 1·37 per cent. for Sind. Compared with the figures of the trade for 1873-74, Bengal trade increased by 2,875,671*l.*, or about 7·16 per cent. The trade of Bombay increased by 4,034,287*l.*, or about 11·08 per cent. On the other hand, the trade of Madras fell off to the extent of 288,478*l.*, or about 2·64 per cent. The trade of British Burma also declined by 61,424*l.*, or about 1·15 per cent., and the trade of Sind fell off by 145,885*l.*, or about 9·60 per cent. The whole of the increase shown in the total trade therefore was in the two provinces of Bengal and Bombay, the trade of the other provinces having diminished, though not, except in the case of Sind, to a material extent.

13. The figures attached show the fluctuations in the value of the trade of each province for the last ten years :—

YEAR.	BENGAL.			BOMBAY.			SIND.			MADRAS.			BRITISH BURMA.		
	Imports.	Exports.	Total.	Imports.	Exports.	Total.	Imports.	Exports.	Total.	Imports.	Exports.	Total.	Imports.	Exports.	Total.

NOTE.—For the years 1865-66—1869-70 inclusive, these figures include Government stores and treasure, the figures for which cannot as yet be separated from those of the general trade. For the year 1870-71 and succeeding years Government stores and treasure have been excluded.

14. In imports Bengal shows the increases indicated by the following figures in the principal articles named: agricultural implements (27,268*l.*), cements (15,059*l.*), manufactures of jute (7,338*l.*), paper (18,195*l.*), apparel (14,513*l.*), cotton goods (2,069,308*l.*), drugs and medicines (23,451*l.*), liquors (93,470*l.*); metals (384,322*l.*), spices (53,586*l.*); while the articles named below fell off: coal by 21,983*l.*, machines and machinery (14,912*l.*), provisions and oilman's stores (17,022*l.*), railway materials (71,566*l.*), salt (97,752*l.*), tea (14,410*l.*), and woollen goods (71,605*l.*).

Extent of fluctua-
tion in chief arti-
cles of provincial
import and export.
Bengal: Imports.

15. In exports of Indian produce and manufacture Bengal exhibits increases in raw hides and skins (274,136*l.*), manufactures of jute, mostly gunny bags (32,530*l.*), opium (28,775*l.*), saltpetre (31,320*l.*), manufactures of silk (5,845*l.*), tea (193,236*l.*), tobacco (86,228*l.*), oils (49,130*l.*), horns (7,753*l.*) and oil-seeds (542,994*l.*). The articles which fell off were borax (32,901*l.*), caoutchouc (19,228*l.*), raw cotton (253,080*l.*), lac dye (6,910*l.*), indigo (646,399*l.*), and other dyes (12,557*l.*), wheat (70,485*l.*), raw jute (190,522*l.*), provisions and oilman's stores (23,895*l.*), raw silk (372,153*l.*), sugar (31,381), woollen shawls (59,486*l.*), cotton piece-goods (7,598*l.*), rice, husked and unhusked (315,895*l.*), other kinds of grain (26,939*l.*), tanned hides and skins (12,471*l.*), and spices (31,478*l.*).

Exports.

16. Among the imports into Bombay improvement is exhibited in machines and machinery (166,318*l.*), precious stones and pearls (20,117*l.*), apparel (38,985*l.*), dyeing and colouring materials (11,652*l.*), liquors (98,683*l.*), metals (380,701*l.*), raw silk (70,921*l.*), and silk manufactures (44,291*l.*). On the other hand, there was a falling off in paper by 23,347*l.*, coal (10,832*l.*), raw cotton (4,456*l.*), coffee (10,287*l.*), cotton manufactures (461,417*l.*), fruits and vegetables (39,813*l.*), ivory and ivory-ware (62,955*l.*), railway materials (34,523*l.*), sugar (38,053*l.*), and woollen goods (30,213*l.*).

Bombay: Imports.

17. Amongst exports from Bombay increases occurred in coffee (18,195*l.*), raw cotton (1,951,110*l.*), dyes (except indigo, which fell off by 10,455*l.*) improved by 15,098*l.*, horns (6,426*l.*), wheat (59,068*l.*), rice and paddy (27,628*l.*), and other grain (46,381*l.*), opium (586,343*l.*), provisions and oilman's stores (9,907*l.*), salt (16,957*l.*), shawls (26,939*l.*), cotton twist (20,470*l.*), oils (8,279*l.*), seeds (195,075*l.*), and spices (5,228*l.*). Decreases occurred in coir (8,590*l.*), raw hides and skins (40,239*l.*), raw silk (5,296*l.*), tobacco (25,304*l.*), raw wool (36,441*l.*), cotton piece-goods (16,365*l.*), indigo, as already said (10,455*l.*), and tanned hides and skins (31,744*l.*).

Exports.

18. Amongst imports into Sind, metals improved by 24,509*l.*, while cotton goods fell off by 21,374*l.*

Sind: Imports.

19. The chief decreases in exports from Sind were in cotton (3,464*l.*), wheat (325,738), and indigo (12,849*l.*); while the following articles improved: raw wool (57,763*l.*), rice and paddy (5,666*l.*), other grain (10,293*l.*), seeds (109,853*l.*).

Exports.

20. Imports into Madras show increases of 18,648*l.* in wood, 29,543*l.* in metals, 197,919*l.* in railway material, 44,676*l.* in machines and machinery; and decreases of 17,901*l.* in apparel, 87,446*l.* in cotton manufactures, 19,265*l.* in liquors, and 30,210*l.* in spices.

Madras: Imports.

21. Madras exported more cotton by 331,245*l.* Dyeing materials, other than indigo, improved by 42,592*l.*, while indigo fell off by 309,282. In other articles increases occurred in horns (4,829*l.*), provisions (7,577*l.*), sugar (122,622*l.*), grain, other than rice (husked and unhusked) and wheat (29,492*l.*), oils (30,309*l.*), seeds (26,640*l.*). Decreases occurred in coffee (204,266*l.*), coir (7,552*l.*), cotton piece-goods (7,224*l.*), indigo (309,282*l.*), rice and paddy (91,723*l.*), tanned hides and skins (84,946*l.*), and spices (15,228*l.*).

Exports.

22. Imports into Burma show increases of 137,644*l.* in cotton goods, 49,447*l.* in metals, 18,342*l.* in salt, 11,219*l.* in raw silk, and 69,235*l.* in goods of silk; and decreases of 9,414*l.* in manufactures of jute (imports from foreign countries having been replaced by imports of Calcutta manufacture), 10,175*l.* in machines and machinery, and 5,132*l.* in woollen goods.

British Burma:
Imports.

Exports.

23. In exports from British Burma the chief increases were in caoutchouc (10,084%), cotton (19,290%), cutch and gambier (37,145%); and the decreases in raw hides and skins (48,628%), teak timber (52,487%), and rice (husked and unhusked) (410,139%). The explanation of this very great decrease in the export of rice from Burma will be found in the section devoted to dutiable exports.

Bombay and Madras: Re-exports.

24. In the re-export of foreign merchandise, Bombay holds much the largest place. The chief fluctuations were increases of 12,722% in cotton manufactures, of 9,772% in apparel, 20,638% in sugar, and 13,602% in tea, with decreases in ivory (37,752), and in metals (21,424%). In Madras the export trade in foreign cotton manufactures increased by 34,290%. In other respects the items which comprise this trade are not sufficiently important to merit separate enumeration.

Bulk of foreign trade confined to the five provincial chief ports: trade thereof.

25. The great bulk of the foreign trade is centred, except in Madras and British Burma, at the chief port of each of the provinces, and is shared between them in the following proportions:—

			£
Calcutta	{ Imports	-	20,112,227
		-	22,507,262
	Total	-	42,619,489
Bombay	{ Imports	-	16,205,281
		-	23,971,675
	Total	-	40,176,956
Madras	{ Imports	-	2,717,959
		-	2,289,548
	Total	-	5,007,507
Rangoon	{ Imports	-	2,082,680
		-	1,926,214
	Total	-	4,008,894
Kurrachee	{ Imports	-	291,004
		-	1,081,589
	Total	-	1,372,593

The total trade of these five ports thus amounted to 93,185,439% during the year, out of a total for the Empire of 100,691,251%, or 92.55 per cent.

Most of the rest of the foreign trade of India is carried on at Chittagong in Bengal, the Tanjore and Tinnevely ports in Madras, and Akyab, Bassein, and Moulmein in British Burma. The foreign trade of the very numerous other ports of India is insignificant. The whole number of ports in British India amounts to 128, of which there are 5 ports in Bengal, 30 in Bombay, 3 in Sind, 83 in Madras, and 7 in British Burma. Besides these there are a large number of sub-ports in Bombay and Bengal, the trade of which is included in the trade of the ports mentioned in the returns.

Number of ports in India.

TRADE WITH FOREIGN COUNTRIES.

Trade with principal foreign countries.

26. Of the total trade of 100,691,251%, no less than 62,215,205%, or nearly 62 per cent., represented the value of the merchandise and treasure interchanged by the United Kingdom and India. The principal countries with which business was done during the year are shown below, arranged in order according to the importance of the trade with each country:—

27. In Europe :—

With European
countries.

				£
1. United Kingdom	{	Imports	-	34,246,716
		Exports	-	27,968,489
	Total		-	<u>62,215,205</u>
2. France	{	Imports	-	412,866
		Exports	-	4,449,317
	Total		-	<u>4,862,183</u>
3. Mediterranean Ports	{	Imports	-	394,927
		Exports	-	2,482,285
	Total		-	<u>2,877,212</u>
4. Russia	{	Imports	-	<i>Nil.</i>
		Exports	-	300,782
	Total		-	<u>300,782</u>
5. Germany	{	Imports	-	23,437
		Exports	-	202,024
	Total		-	<u>225,461</u>
6. Other countries in Europe	{	Imports	-	24,826
		Exports	-	102,650
	Total		-	<u>127,476</u>

28. The total trade with countries in Europe amounted to 70,608,319£, more than six-seventh of which was with the United Kingdom, and more than half of the remainder with France. It must be noticed here that the figures set down in this review against the United Kingdom include the figures given by the custom houses as representing the trade with Suez. All but an inappreciable portion of this trade passes in transit through Suez, and mainly in British bottoms, on its way to or from the United Kingdom, and it should properly be classed as trade with that country.

29. The figures of the African trade are not classified as they will be in future returns, but they are not important, except for Mauritius, the total trade in the year having amounted to 2,201,593£, thus divided :—

With the African
coasts, Mauritius,
and Réunion.

				£
Mauritius	{	Imports	-	596,899
		Exports	-	1,036,892
	Total		-	<u>1,633,791</u>
Africa (Continent)	{	Imports	-	130,134
		Exports	-	352,211
	Total		-	<u>482,345</u>
Réunion	{	Imports	-	10,867
		Exports	-	74,590
	Total		-	<u>85,457</u>

30. With America also the trade is not classified in the returns, except as trade with "America" and the West Indies, but it is known that most of the trade

With America.

recorded under the head of "America" is with the United States. The total trade amounted in the year to 2,370,924*l.*, thus divided :—

				£
America	-	- { Imports	- -	193,490
		- { Exports	- -	2,096,947
Total				- - <u>2,290,437</u>
West Indies	-	- { Imports	- -	16
		- { Exports	- -	80,471
Total				- - <u>80,487</u>

With Asiatic
countries.

31. The trade with countries in Asia amounted to 25,141,244*l.*, thus divided :—

				£
China	-	-	{ Imports	- - 2,957,000
			{ Exports	- - 11,750,803
			Total	- - 14,707,803
Ceylon	-	-	{ Imports	- - 930,480
			{ Exports	- - 2,496,694
			Total	- - 3,427,174
Straits Settlements	-	-	{ Imports	- - 1,073,102
			{ Exports	- - 2,216,614
			Total	- - 3,289,716
Persian Gulf	-	-	{ Imports	- - 919,961
			{ Exports	- - 1,229,663
			Total	- - 2,149,624
Red Sea	-	-	{ Imports	- - 396,397
			{ Exports	- - 358,898
			Total	- - 755,295
Aden	-	-	{ Imports	- - 140,612
			{ Exports	- - 416,791
			Total	- - 557,403
Maldives	-	-	{ Imports	- - 29,562
			{ Exports	- - 29,828
			Total	- - 59,390
Mekran and Sonmiáni	-	-	{ Imports	- - 31,194
			{ Exports	- - 24,108
			Total	- - 55,302
Other countries in Asia	-	-	{ Imports	- - 40,161
			{ Exports	- - 99,376
			Total	- - 139,537

With Australia.

32. The trade with Australia amounted to 369,171*l.*, viz. :—

Imports	-	-	-	233,634
Exports	-	-	-	135,537

33. The subjoined table shows the total trade for the year with each country. Comparative table of trade with each country. compared with the year 1873-74, and the average of the five years 1869-70-1873-74. It will be seen that our largest customers are (1) the United Kingdom, (2) China, (3) France, (4) Ceylon, and (5) the Straits Settlements. Our trade with these countries amounted during the year to eighty-eight and a half millions sterling out of the total one hundred millions. Our next most important customers are the countries on the coasts of the Mediterranean and the Persian Gulf, America, and Mauritius.

COUNTRIES.	Trade in 1874-75.	Trade in 1873-74.	Average value of trade in five years, 1869-70 to 1873-74.	Increase in 1874-75 over 1873-74.	Increase in 1874-75 over average of five previous years.	Decrease in 1874-75 on 1873-74.	Decrease in 1874-75 on average of five previous years.

UNITED KINGDOM.

34. The trade with the United Kingdom shows a considerable increase, amounting to upwards of four millions sterling, over the trade of the previous year, and nearly three millions in excess of the average of the five years preceding 1874-75. The increase is in merchandise and treasure imported, the exports of merchandise and treasure having fallen off. Details of fluctuations in trade with principal countries. United Kingdom (including transit trade via Suez).

35. The imports of treasure increased by 2,408,725*l.*, and of merchandise by 2,931,603*l.* In merchandise the following principal articles show the most noticeable advance. The figures noted against each article are the sum of the increase over the value of the imports of 1873-74:—

	£
Agricultural implements -	29,295
Apparel -	48,039
Building and engineering materials (most of the increase was in cement) -	28,764
Cotton goods -	1,620,999
Drugs and medicines -	33,766
Dyeing and colouring materials -	14,055
Flax manufactures -	21,997

	£
Glassware	18,462
Jute manufactures	13,431
Liquors	90,925
Matches	23,982
Machinery and millwork	185,069
Metals :	
Copper	259,071
Iron	444,231
Lead	13,703
Steel	37,844
Tin	7,005
Quicksilver	2,050
Other sorts	23,620
Total increase in metals	<u>£787,524</u>
Paints, colours, and painters' materials	19,336
Railway materials	99,889
Silk piece-goods	65,439
Soap	8,688
Umbrellas	16,414

On the other hand there were decreases in—

Coal and coke	30,134
Rosin	22,504
Paper and pasteboard	8,420
Provisions	5,582
Salt	53,908
Woollen goods	102,377

and, to a small extent, in some other articles.

Trade by the over-
land route.

36. The importation of goods *via* Suez, recorded in the returns as imports from Suez, fell off from 1,129,162*l.* to 435,089*l.*, or by the large sum of 694,073*l.*, the bulk of which was in cotton manufactures. The reduction in the importation of merchandise by the overland route since the opening of the Suez Canal has been marked. The figures are as follows :—

	£
1869-70	3,209,841
1870-71	2,883,618
1871-72	1,946,804
1872-73	1,648,668
1873-74	1,129,162
1874-75	435,089

For exports, however, this route does not seem to have fallen very much out of favour as yet. The figures are as follows :—

	£
1869-70	224,794
1870-71	182,904
1871-72	78,847
1872-73	436,987
1873-74	140,731
1874-75	171,237

37. Exports to the United Kingdom fell off in value both in merchandise and treasure. The export of merchandise diminished from 28,357,679*l.* in 1873-74 to

EXPORTS.
Increases and de-
creases.

27,737,958*l.*, or by 619,721*l.* Treasure fell from 528,077*l.* to 230,530*l.*, a reduction of 297,547*l.* The total diminution was thus 917,268*l.*, or under a million sterling.

Of articles of Indian produce and manufacture, the main decreases occurred in the articles and to the extent shown below :—

	£
Borax - - - - -	28,915
Coffee - - - - -	16,623
Coir - - - - -	20,399
Cotton goods - - - - -	30,739
Indigo - - - - -	777,073
Rice - - - - -	595,695
Wheat - - - - -	455,440
Hides and skins (dressed or tanned) - - - - -	112,505
Jute (raw) - - - - -	257,632
Lac of all kinds - - - - -	10,336
Silk (raw) - - - - -	227,337
Wax - - - - -	8,258
Wood (teak) - - - - -	53,719
Shawls - - - - -	9,288

Articles of Indian
produce and ma-
nufacture.
Decreases.

Increases occurred in the under-mentioned articles :—

Increases.

Cotton (raw) - - - - -	1,021,603
Dyes (other than indigo and lac dye) - - - - -	41,961
Gums: cutch and gambier - - - - -	59,696
Hemp (raw) - - - - -	7,241
Hides and skins (raw) - - - - -	76,516
Horns - - - - -	15,657
Jewellery - - - - -	9,902
Oils - - - - -	70,746
Opium - - - - -	9,868
Saltpetre - - - - -	48,196
Seeds - - - - -	382,805
Silk goods - - - - -	6,322
Sugar - - - - -	94,299
Tea - - - - -	197,080
Tobacco - - - - -	£6,596
Wool (raw) - - - - -	16,502

The only important fluctuations in articles of foreign merchandise exported to the United Kingdom occurred in the following articles, which fell off by the amounts mentioned :—

	£
Fruits and vegetables - - - - -	15,647
Ivory - - - - -	31,230
Silk (raw) - - - - -	53,250

FRANCE.

38. For the five years ending 1873-74 (1869-70 to 1873-74), the average value of our trade with France amounted to 3,774,488*l.* annually, viz. :—

	£
Imports - - - - -	530,006
Exports - - - - -	3,244,482

In 1873-74 the value of the trade was 3,496,411*l.* (imports 362,333*l.* and exports 3,134,078*l.*) In 1874-5 the trade rose to 4,862,183*l.* (imports 412,866*l.* and exports

4,449,317*l.*), exceeding the value of the trade of the previous year by over a million and a quarter sterling (1,365,772*l.*), or 39·06 per cent., and the average of the five years preceding 1874–75 by 1,087,695*l.*, or 28·82 per cent.

Comparing the details of the trade with the details of the previous year, there was a decrease of 17,520*l.* in merchandise imported from France, and an increase amounting to 68,053*l.* in the import of treasure. Merchandise exported to France shows the very large increase of 1,305,005*l.*, and treasure exported increased by 10,234*l.*

IMPORTS.
Increases and decreases.

In imports of merchandise the principal increases were in cotton goods (5,467*l.*), and liquor (15,763*l.*). The bulk of the decreases was in apparel (8,363*l.*), coal (12,552*l.*), and silk goods (14,108*l.*). Coal fell off by 100 per cent., none having been imported during the year.

EXPORTS.
Increases and decreases.

In exports of Indian produce to France great variations are exhibited when the trade is compared with that of the previous year. Cotton (raw) shows an enormous increase, this article having advanced by no less than 1,179,208*l.*, or more than 126 per cent. The value of cotton exported to France in 1873–74 was only 930,523*l.*, against 2,109,731*l.* in 1874–75. In other articles increases occurred in—

	£
Rice - - - - -	15,867
Wheat - - - - -	107,056
Hides and skins (raw) - - - - -	11,768
Saltpetre - - - - -	29,404
Seeds (oil) - - - - -	183,447
Wool (raw) - - - - -	5,662

Decreases are exhibited in the following articles :—

Coffee - - - - -	42,928
Indigo - - - - -	50,036
Cutch and gambier - - - - -	5,586
Jute (raw) - - - - -	8,173
Silk (raw) - - - - -	80,185
Spices - - - - -	24,353
Shawls - - - - -	18,114

GERMANY.

Germany.

39. The direct trade with German ports is comparatively insignificant, but the trade with Germany is more important than it seems in our returns, for a portion of the imports and exports from and to the United Kingdom, France, and some of the Mediterranean ports, either originally come from, or ultimately go to, Germany. According to our returns, for instance, there is no exchange of treasure between Germany and India, but it is well known that a considerable proportion of the increased imports of coin and specie from England during the year consisted of German silver brought up for export to the East since the introduction of a gold standard in Germany.

The average of the direct trade for the five years, 1869–70—1873–74, was :—

	£
Imports - - - - -	36,782
Exports - - - - -	188,860
Total average - - - - -	<u>225,642</u>

all in merchandise. In 1873–74 there was a considerable reduction on the average of the trade during previous years. Imports fell off to 23,423*l.*, and exports to 60,145*l.* During the year of report there was but slight improvement in imports, which amounted to 23,437*l.* only, but there was a recovery to a material extent in exports, which advanced to 202,024*l.*

Imports.

The increases in imports occurred chiefly in liquors (2,425*l.*), and in metals (1,116*l.*). There were also small increases in other articles.

The decreases in imports took place in coal (2,078*l.*), and woollen goods (1,186*l.*). Of woollen goods there was no direct importation from Germany during the year.

In exports of Indian produce the principal fluctuations were as follow :—

Exports.

Cotton (raw) increased by 143,704*l.*, and rice (husked and unhusked) by 4,235*l.* Oils and teakwood fell off to nothing, no exports having been made of these articles, against 2,352*l.* and 2,760*l.* respectively in the previous year.

MEDITERRANEAN PORTS.

40. This is a bad classification, for under this head are included the ports of the Mediterranean Levant, the Austrian port of Trieste, all the Italian ports, &c. In future returns the trade will be separately shown for each country. Mediterranean ports.

The development of direct trade with ports in the Mediterranean since the opening of the Suez Maritime Canal merits particular attention. In 1868–69 the total trade amounted to 421,163*l.*, of which imports represented 12,289*l.*, and exports 408,874*l.* In 1869–70 the value of the trade was 639,011*l.*, the imports having remained at almost the same figure (12,292*l.*), while exports increased to 626,719*l.* In the following year (1870–71), the canal having been opened for traffic in 1870, imports rose at once to 148,227*l.* and exports to 1,429,818*l.*, total 1,578,045*l.* The increase in the trade during the four following years is shown by the figures appended :—

					£
1871–72	{ Imports	-	-	-	285,223
	{ Exports	-	-	-	2,230,125
Total					<u>2,515,348</u>
1872–73	{ Imports	-	-	-	298,821
	{ Exports	-	-	-	2,153,122
Total					<u>2,451,943</u>
1873–74	{ Imports	-	-	-	462,715
	{ Exports	-	-	-	2,232,291
Total					<u>2,695,006</u>
1874–75	{ Imports	-	-	-	394,927
	{ Exports	-	-	-	2,482,285
Total					<u>2,877,212</u>

This last amount exceeds the average value of the trade for the five previous years by nearly a million sterling (901,341*l.*), or upwards of 45 per cent., and is nearly seven-fold the value of the trade in 1868–69.

As compared with last year, there is a nett increase of 182,206*l.*, entirely in exports of merchandise, imports both of merchandise and treasure having somewhat fallen off, the former to the extent of 47,348*l.*, and the latter by 20,440*l.* Merchandise was exported to the value of 249,858*l.* in excess of the exports of the previous year, and an insignificant amount of treasure (136*l.*) was exported, for the first time since 1869–70.

In principal articles of merchandise imported, the following articles fell off by the sum stated against each item :— Imports.

					£
Cotton piece-goods	-	-	-	-	9,262
Beads and false pearls	-	-	-	-	24,322
Liquors	-	-	-	-	28,536
Metals	-	-	-	-	2,830
Mineral oil	-	-	-	-	2,304
Silk goods	-	-	-	-	1,740
Woollen goods	-	-	-	-	9,504

On the other hand, the following articles improved :—

	£
Apparel - - - - -	3,114
Corals - - - - -	3,853
Cotton twist - - - - -	10,281
Drugs and medicines - - - - -	1,829
Dyes - - - - -	1,147
Paper - - - - -	5,370
Salt - - - - -	6,380

Exports.

In exports of Indian produce and manufacture, the main improvements were in—

	£
Cotton (raw) - - - - -	215,084
Fruits and vegetables - - - - -	6,679
Wheat - - - - -	64,983
Hides and skins (raw) - - - - -	76,796
Seeds - - - - -	25,830
Silk piece-goods - - - - -	1,978
Tobacco - - - - -	17,090

And the following articles decreased in value :—

Coffee - - - - -	41,332
Indigo - - - - -	49,231
Rice - - - - -	4,841
Shell-lac - - - - -	278
Saltpetre - - - - -	3,371
Silk (raw) - - - - -	61,358

HOLLAND.

Holland.

41. The trade with Holland amounted to 26,437*l.*, against 252,607*l.* in 1873–74 and 228,909*l.* in the five years ending with 1873–74. The diminution is exhibited in the imports and exports of merchandise. No treasure is exchanged directly between the two countries. The value of the imports from Holland is fairly steady from year to year, but exports fluctuate in a remarkable manner, for which no sufficient reason can at present be given. The exports consist chiefly of raw cotton from Bombay, and the Commissioner of Customs in that Presidency is apparently unable to account for the fluctuations. The value of the exports of all articles is shown below for the last five years :—

	£
1870–71 - - - - -	137,583
1871–72 - - - - -	341,098
1872–73 - - - - -	141,935
1873–74 - - - - -	238,490
1874–75 - - - - -	14,400

And the figures for raw cotton are :—

1870–71 - - - - -	132,487
1871–72 - - - - -	311,662
1872–73 - - - - -	17,256
1873–74 - - - - -	226,090
1874–75 - - - - -	<i>Nil.</i>

The fluctuations in the indigo trade with Holland are also very remarkable. In 1870–71 none was sent to Holland; in 1871–72 the exports were worth 2*l.* 8*s.*, and were probably only samples; in 1872–73 the value of the exports was 88,143*l.*, and in the two following years none at all was exported. Probably Holland takes Indian indigo only when none other is available, from America or elsewhere, at prices which can be

afforded for the time in the Dutch market, or it may receive Indian indigo indirectly either through England or France. The diminution in the export of cotton is perhaps to be accounted for by the receipt of supplies from France, to which country the export of cotton from India during the past two years was very large.

RUSSIA.

42. The direct trade of Russia with India, like the direct trade of Holland, is of recent introduction. It arose out of the formation of a Russian company, started to establish direct steam communication between Odessa and Bombay. The enterprise does not seem to have been successful, and has been abandoned in consequence of the difficulty of freighting the vessels at Odessa with articles wanted in the Indian market. In the last five years the imports have been as follows :—

	£	
1870-71	2,003	(nearly all oil).
1871-72	90	
1872-73	135	
1873-74	33	
1874-75	Nil.	

The exports have been :—

1870-71	15,529
1871-72	377,207
1872-73	159,129
1873-74	92,005
1874-75	300,782

The exports have been almost entirely confined to cotton and indigo, and the value of both has fluctuated considerably from year to year. For cotton the figures are :—

	£
1870-71	15,330
1871-72	340,377
1872-73	148,854
1873-74	56,559
1874-75	229,432

The figures for indigo are much smaller, but the trade seems to have a tendency to increase, the exports in 1874-75 having amounted to 70,246*l.*, against 35,409*l.* in 1873-74, this latter sum having also exceeded the exports of previous years.

43. The trade with other countries in Europe offers no particular occasion for remark, either in respect of value or peculiarity.

Other countries in Europe.

AMERICA.

44. The trade with America, *i.e.*, practically the United States, amounted during the year to 2,290,437*l.*, against 1,923,517*l.*, showing an increase of 366,920*l.* The value of the imports of merchandise (190,490*l.*) was 92,195*l.* in excess of the imports (98,295*l.*) of the previous year, which were thus nearly doubled. The imports of treasure amounted to 3,000*l.* against nothing in the last or four previous years. There has been no export of treasure to America for some years. The export of merchandise (2,096,947*l.*) exceeded the export of the previous year (1,825,222*l.*) by 271,725*l.* The average imports of the five years previous to 1874-75 amounted to 81,005*l.* annually, and the average exports to 2,033,563*l.* The trade of the year, therefore, shows a satisfactory increase both in imports and exports, especially in the former.

America.

Imports.

In imports the chief increases were in—

	£
Cotton goods	16,259
Drugs and medicines	2,816
Glassware	1,676
Rosin	26,013
Iron	1,773
Mineral oil	52,031
Tobacco	3,078

The only articles in which there was a noticeable decrease were ice (6,256*l.*) and wood (3,169*l.*)

In the exports of Indian produce and manufactures increases occurred in:—

	£
Dyes (other than indigo)	2,463
Rice	62,106
Hides and skins (raw)	32,682
Jute (raw)	78,906
Lac	5,317
Rags	1,698
Seeds	261,419
Spices	3,309

and decreases in—

Caoutchouc	8,543
Indigo	86,514
Cutch and gambier	6,796
Hides and skins (dressed or tanned)	14,328
Jute manufactures	17,360
Saltpetre	47,971

In articles of foreign merchandise exported to America, the only notable variation occurred in spices, which increased by 8,702*l.*

WEST INDIA ISLANDS.

West Indies.

45. The trade with the West Indies shows a very considerable diminution of trade of previous years. For the five years 1869–70 to 1873–4 the average trade amounted to 175,618*l.*, *viz.*, imports 169*l.* and exports 175,449*l.* In the year 1873–74 imports were valued at 38*l.* and exports at 299,934*l.*, total 299,972. In 1874–75 the trade amounted to no more than 80,487*l.*, showing a reduction of upwards of 73 per cent. All the exports fell off in value, but the bulk of the reduction was in rice, which forms the staple export from India to the West Indies, where it is chiefly used for the food of the coolie immigrants. This article fell off from 281,653*l.* to 77,543*l.*, or by 204,110*l.* Other sorts of grain also fell off by 4,309*l.*, provisions by 5,047*l.*, and gunny bags by 1,112*l.*

Exports.

AFRICA.

African coast.

46. The trade with Africa amounted to 482,345*l.*, against 481,138*l.* in the previous year, showing a very small increase. The average of the total annual trade for the five years previous to 1874–75 was slightly in excess of the trade of this year, having amounted to 488,215*l.* Imports of merchandise represented 99,404*l.*, showing a very large decrease of 60,777*l.* on the previous year's imports of merchandise, and a decrease of 45 per cent. on the average importations for the five years, which were 182,023*l.* Treasure imported (30,730*l.*) improved somewhat on last year, and was slightly above the five years' average (30,116*l.*).

Exports of merchandise amounted to 341,718*l.*, showing an increase of 58,034*l.* on the exports of last year and of 71,392*l.* on the average exports of the past five years, which amounted to 270,326*l.* The treasure exported was worth 10,493*l.*, showing a decrease of 1,607*l.* on the exports of the previous year.

The increases and decreases in the principle articles of merchandise imported from Imports. the African coasts are shown below :

<i>Increases.</i>	£	<i>Decreases.</i>	£
Cocoanuts	- 2,532	Gums	- 2,027
Shells	- 541	Ivory	- 54,505
Wood	- 3,146	Metals (iron and copper)	- 3,322
		Spices	- 7,835

The decrease in ivory, which accounts for a very great part of the total falling off, is the result of the abolition of the slave trade by the Sultan of Zanzibar.

In exports of Indian produce and manufacture the chief increases occurred in— Exports.

	£
Cotton piece-goods	- 2,436
Rice	- 7,881
Opium	- 2,365
Teakwood	- 5,527

With the exception of Manchester cotton goods, the re-exports of foreign produce from India to Africa are unimportant. During the year piece-goods valued at 200,157*l.* were sent to Africa, exceeding the export of the previous year by 26,595*l.*

MAURITIUS.

47. The trade with this island amounted during the year to 1,633,791*l.*, being Mauritius. 242,570*l.* in excess of the trade of the previous year, and 448,379*l.* in excess of the average of the five years preceding 1874–75. Imports amounted to 596,899*l.*, which sum was considerably in excess of the imports of last year and the quinquennial average, but this was owing to a very largely increased import of treasure, which advanced to 196,163*l.* from an import in the previous year of 4,197*l.* The import of merchandise fell off from 438,292*l.* to 400,736*l.* Exports of treasure fell off from 281,000*l.* in 1873–74 to 95,000*l.* in the year of report, but exports of merchandise show the considerable increase of 274,161*l.*, having advanced from 667,731*l.*, to 941,892*l.*

The diminution in the imports of merchandise is of course almost entirely comprised in the smaller trade during the year in sugar, which is the main staple of the colony. The reduction in this article amounted to 43,297*l.* The import of liquors shows the large increase (on a relatively small trade) of 4,705*l.*

Of articles of Indian produce exported to Mauritius, much the largest proportion consists of grain and pulse sent thither for the subsistence of the very numerous Indian population (amounting to 228,000) of the colony. In these articles there was a considerable increase, amounting to 271,776*l.*, divided thus :—

	£
Gram	- 18,417
Rice	- 211,949
Other kinds (except wheat)	- 41,410

The export of wheat fell off by 14,545*l.*

There were increases in certain other articles to the amounts stated :

	£
Coffee	- 1,424
Oils (vegetable)	- 6,094
Saltpetre	- 5,740
Soap	- 1,753
Teakwood	- 8,480
Woollen goods	- 1,779

The export of cotton goods of Indian manufacture fell off by 1,328%, while Manchester cotton improved by 1,707%. Provisions (of Indian produce) fell off by 12,115%, while fruits and vegetables (of foreign origin) improved by 2,564%. Indian tobacco also fell off by 3,098%.

RÉUNION.

Réunion (Bourbon).

48. *Quoad* trade with India, Réunion is in much the same position as her sister island Mauritius, with this difference, that whereas Mauritius pays for most of her imports with sugar, Réunion pays to a certain extent in cash, and not (to any appreciable extent) in merchandise. Thus, for the five years ending 1873-1874, the imports of merchandise averaged no more than 628%, while the average amount of treasure imported was 41,773%. The exports of merchandise during the same period were worth on an average 97,778% per annum. The balance of payment due by Réunion was settled by exchange operations. In 1874-75 the import of merchandise was valued at 667%, showing a slight increase on the quinquennial average, but a great decrease on the imports of 1873-74, which amounted to 1,172%. In that year, however, no treasure was imported, but the treasure imported in 1874-75 amounted to 10,200%. The exports of merchandise in 1873-74 amounted to 74,590%, against 50,113% in the previous year, but they were below the average of five years. The figures at one view stand thus:—

Imports.

Annual average of 5 years (1869-70 to 1873-74)—

		£
	Merchandise	628
	Treasure	41,773
	Total	42,401
1873-74	{ Merchandise	1,172
	{ Treasure	Nil.
	Total	1,172
1874-75	{ Merchandise	667
	{ Treasure	10,200
	Total	10,867

Exports.

Annual average of 5 years (1869-70 to 1873-74)	-	97,778
1873-74	-	50,113
1874-75 Merchandise	-	74,590

Exports.

The chief increase in the exports was, as in the case of Mauritius, in rice, which advanced in value from 18,386% to 48,408%, or by 30,022%. Wheat fell off by 7,682%, and other sorts of grain increased by 3,745%. Provisions fell off by 2,181%. The fluctuations in other articles are unimportant. The articles above mentioned, intended mainly for the sustenance of Indian coolies, form the bulk of the exports from India to Réunion.

ASIATIC CONTINENT.

Countries in Asia. 49. Our total trade with countries on the Asiatic Continent amounted to 25,141,244% in 1874-75, viz. :—

	£
Imports	6,518,469
Exports	18,622,775

These figures do not include the amount of the trade which crosses the land frontier of India, but only the sea borne trade. It is hoped that it will be possible to take the figures of the trade by land into account next year, measures for the registration of

that trade being now in progress. At present we have figures for only a portion of this trade, and even these are defective and wanting in accuracy. However, the trade is not of great dimensions, though it seems to be growing, especially with Central Asia via Ladakh.

50. In our returns the trade with the Asiatic Continent is recorded under the following heads :

- | | |
|------------------|-----------------------------|
| 1. Aden. | 6. Maldive Islands. |
| 2. Red Sea. | 7. Mekran and Sonmiáni. |
| 3. Persian Gulf. | 8. Straits Settlements. |
| 4. Ceylon. | 9. Other Countries in Asia. |
| 5. China. | |

This is an imperfect classification, for a portion of the trade with the coasts of the Red Sea is carried on with African ports, though the whole is recorded as trade with Asia. The trade recorded under the head of the Persian Gulf, too, ought to be divided between Persia and Arabia, and the trade with each country separately shown for the ports of each country. It is to be regretted that the classification of "Red Sea" and "Persian Gulf" was ever adopted for our trade returns.—The Asiatic Continent is credited with some trade which properly should fall to the account of Africa, and while Arabia gets this excess on the one hand, on the other it is not credited with that portion of the trade recorded under the head of the Persian Gulf which is transacted with Maskat and other ports on the Arabian shores. A correct classification has been adopted since the commencement of the present official year, but in this review of the trade of the past year the old classification must necessarily be retained.

51. The comparative figures under the head of the Maldives include the Laccadives as well as the Maldives, for the years previous to 1874-75, but only the Maldives for the year of report. The Laccadives were erroneously classed until May last year as Foreign ports, whereas they are really British Indian territory, and the trade with them ought to have been treated as coasting or interportal trade. Indeed, even one of the Maldives, the island of Minicoy, is British Indian territory, though it is still classed among Foreign ports. The consequence is, that it is not possible to make a true comparison between the trade of the Maldives for the present and for the previous years, a separation of the figures for the Laccadives not being practicable. However, the whole trade is quite insignificant in dimensions.

In the following paragraphs is shown the trade with each of the countries above mentioned.

ADEN.

52. The total trade amounted to 557,403*l.*, viz. :—

Imports	£ 140,612
Exports	416,791

Aden.

against 549,841*l.* in the previous year, showing an excess of 7,562*l.* It was in excess of the average trade for the five years ending 1873-74 by 80,522*l.* The increase in the trade as compared with 1873-74 occurred in the exports to Aden of merchandise and treasure. The former increased by 17,368*l.*, the latter by 18,017*l.* Imports of merchandise and treasure fell off, in the former to the extent of 27,335*l.*, in the latter to the small amount of 487*l.*

Increases occurred in—

Gums and resins	£ 1,803
Spices	3,729

Decreases in—

Coffee	£ 3,170
Beads and false pearls	3,666
Ivory	20,610
Precious stones and pearls	3,665

Increases occurred in exports of Indian produce and manufacture in the following articles :—

	£
Apparel - - - - -	1,637
Raw cotton - - - - -	2,090
Cotton twist - - - - -	12,237
Rice - - - - -	29,903
Wheat - - - - -	3,056
Oils - - - - -	2,446
Provisions - - - - -	2,372
Silk goods - - - - -	4,795
Decreases occurred in—	
Cotton piece-goods - - - - -	32,921
Raw silk - - - - -	5,147
Tobacco - - - - -	20,288
In re-exports of foreign goods increases are exhibited in—	
Cotton twist and piece-goods - - - - -	13,965
Silk goods - - - - -	1,141
And decreases in—	
Dyeing and colouring materials - - - - -	957
Raw silk - - - - -	1,428
Sugar - - - - -	3,334

Aden is to a great extent an entrepôt for trade between India and Zanzibar and the neighbouring African Coast.

RED SEA.

Red Sea.

53. The trade with ports in the Red Sea amounted to 755,295*l.*, viz. :—

	£
Imports - - - - -	396,397
Exports - - - - -	358,898

The trade in 1873-74 was less than this by 73,793*l.*, and the average of five years was exceeded by the large sum (in a comparatively small trade) of 117,415*l.* Imports of merchandise diminished from 126,198*l.* to 80,977*l.*, or by 45,221*l.* Imports of treasure increased from 290,248*l.* to 315,420*l.*, or by 25,172*l.* Exports of merchandise increased from 247,963*l.* to 343,428*l.*, *i.e.*, by 95,465*l.* The export of treasure shows a small diminution of 1,622*l.*, having fallen from 17,092*l.* to 15,470*l.*

Imports.

The only sensible increase occurred in—

	£
Skins - - - - -	1,404

The decrease in the imports results chiefly from—

	£
Coffee - - - - -	3,730
Fruits and vegetables - - - - -	4,464
Gums and resins - - - - -	13,490
Ivory - - - - -	929
Salt - - - - -	24,320
Wool (raw) - - - - -	830

Exports.

The increase in exports of Indian produce is chiefly due to rice, which rose from 24,582*l.* in 1873-74 to 156,461*l.* in the year of report, or by 131,879*l.* The quantity exported was 387,037 cwt., against 51,452 cwt., in the previous year. The average export of rice to the Red Sea for the five years previous to 1874-75 was not more than 87,859 cwt., valued at 40,472*l.*

There were increases in other articles to the extent noted :—

	£
Coffee - - - - -	2,491
Coir - - - - -	1,741
Cotton twist - - - - -	1,564
Metals - - - - -	968
Oils - - - - -	945
Sugar - - - - -	1,815
Teakwood - - - - -	1,280

On the other hand, the following articles fell of :—

	£
Cotton piece-goods - - - - -	5,078
Wheat - - - - -	25,085
Silk goods - - - - -	3,703
Spices - - - - -	2,616
Tobacco - - - - -	5,225

Among re-exports of foreign goods the only notable fluctuations occurred in cotton piece-goods and spices, which fell off by 6,507%. and 1,852%. respectively.

PERSIAN GULF.

54. The total trade recorded under this head amounted to 2,149,624%, viz. :—

Persian Gulf.

	£
Imports - - - - -	919,961
Exports - - - - -	1,229,663

In 1873-74 the trade amounted to 2,092,304%, viz. :—

Imports - - - - -	847,786
Exports - - - - -	1,244,518

There was thus a small improvement in the trade, amounting to 57,320%, caused by an increase in the imports, which improved by 72,175%, while exports fell off by 14,855%. The trade, though better than that of 1873-74, was a good deal below the average of the five years ending 1873-74. This average was 2,381,300%, viz., imports 1,019,312% and exports 1,361,988%. Exports have steadily declined every year during this period, and imports have also shown a strong downward tendency. As compared with last year, however, imports of merchandise improved by 31,283% and treasure by 40,892%. Exports of merchandise show a small increase of 914%, while treasure fell off by 15,768%.

These figures cannot be reconciled with those furnished to the Government of India in 1875 by Colonel Ross, Her Majesty's Resident in the Persian Gulf, and published in the supplement to the *Gazette of India*.

His figures amounted to—

	£
Imports from India - - - - -	638,352
Exports to India - - - - -	548,109
Total trade with India	<u>1,186,461</u>

But no proper comparison can be made between the figures, for (1) it is not certain to what period some of Colonel Ross' figures extend; (2) some of them are merely estimates and of doubtful accuracy; (3) they comprise the ports of Bushire, Bahrain, Pirate Coast, Bandar Abbass, and Maskat, but omit Basrah and Koweit,* which are recorded in our returns under the head of the Persian Gulf; and (4) it is very probable, considering the conditions of administration obtaining on the coasts of the gulf, that our figures are far more trustworthy than those which the British authorities in the gulf have been able to obtain. From these returns, however, we learn that while India possesses a monopoly of the supply of Manchester piece-goods (the depôt for which is in Bombay) to the people of those parts, she has to compete more or less actively with other countries in various important articles, amongst which are coffee, wheat, rice, and other grains and pulses, indigo, tin, and other metals, sugar, silk manufactures, and tea.

* Colonel Ross rightly omits these. They are not within his jurisdiction, but within that of the resident in Turkish Arabia.

Imports.

In imports of merchandise the following articles show notable improvement:—

	£
Animals (horses)	9,099
Grain: Wheat	14,236
Other sorts	7,307
Gums and resins	1,292
Ivory	3,636
Precious stones and pearls	26,483
Mineral oil	1,070
Paints, colours, and painters' materials	4,771
Perfumery	2,397
Shells and cowries	6,646
Silk (raw)	16,565
Wool (raw)	2,484

And the following articles fell off:—

Cotton (raw)	2,434
Cotton piece goods	3,345
Dyeing and colouring materials	5,003
Fruits and vegetables	46,118
Jute manufactures	2,465
Salt	8,371

Exports.

In exports of Indian produce and manufacture the principal fluctuations were as follow. Increases occurred in—

	£
Cotton piece-goods	15,220
Rice	4,980
Gunny bags	1,125
Metals	976
Oil (vegetable)	4,529
Silk goods	2,835
Spices	4,282

And decreases are exhibited in—

Coffee	4,389
Coir	1,156
Drugs and medicines	1,167
Indigo	58,843
Raw silk	4,904
Sugar	1,606
Wood	2,654
Shawls	3,743

The trade in wheat with the Persian Gulf has been subject to violent fluctuations from time to time. The export fell from a value of 520% in 1868-69 to nothing in the next year, suddenly rising again in 1870-71 to 8,998%. This was followed by a spring to more than ten times that amount, the trade in 1871-72 reaching 90,799%. In 1872-73 the trade sank to 3,235%, then to 148%, and in the year of report to 137%. Apparently a profitable trade in wheat cannot be carried on with the Persian Gulf except under abnormal circumstances. The great elevation of the trade in 1871-72 was caused by the Persian famine, and the sudden necessity which arose for the importation of large food supplies. The distress of the people did not cease with that year, but continued, in some parts until last year, to be more or less severely felt; but apparently a cheaper source of supply than India has been obtained, and the trade in wheat with the Gulf has sunk to the insignificant proportions which it possessed before the outbreak of famine.

CEYLON.

55. The total trade with Ceylon during the year amounted to 3,427,174*l.*, viz.:— Ceylon.

	£
Imports - - - - -	930,480
Exports - - - - -	2,496,694

For the year 1873-74 the trade amounted to 3,722,304*l.*, and the average value of the trade amounted during the five years ending 1873-74 to 3,519,631*l.* ~ As compared with the year immediately preceding the year of report the trade shows a falling off of 295,130*l.* As compared with the average of the five years which preceded it the trade diminished by 95,608*l.* During this period the trade reached its highest point in 1869-70, when it amounted to 4,854,581*l.* In the following year it fell off by the very large sum of 2,018,807*l.* In 1871-72 there was a sensible recovery, the value of the trade having been represented by 3,169,126*l.* In 1872-73 there was a further small advance to 3,216,371*l.*, and a more material recovery in 1873-74, followed by a relapse in the year of report. Comparing the two years, it appears that imports of merchandise and treasure both increased—the former by 5,785*l.*, the latter by 25,185*l.* The falling off in the trade occurred in the exports of merchandise, which diminished by 429,223*l.* The export of treasure, on the other hand, increased by 103,123*l.*

In the imports of merchandise the chief fluctuations occurred in the articles named Imports. below:—

Increases.

	£
Coal - - - - -	7,946
Cotton goods - - - - -	5,894
Metals - - - - -	2,614
Shells and cowries - - - - -	2,136
Raw silk - - - - -	6,704
Tobacco - - - - -	3,816
Manufactures of wood - - - - -	9,930

Decreases.

	£
Animals - - - - -	2,524
Apparel - - - - -	5,098
Coffee - - - - -	3,653
Fruits and vegetables (chiefly cocoanuts) - - - - -	5,340
Spices - - - - -	7,591
Sugar and other saccharine produce - - - - -	3,184
Tea - - - - -	2,234

In exports of Indian produce and manufacture there were increases in—

Exports.

	£
Cotton (raw) - - - - -	24,720
Fruits and vegetables - - - - -	2,349
Gram (<i>Cicer arietinum</i>) - - - - -	3,137
Gunny bags and cloths - - - - -	6,629
Manure (animal bones) - - - - -	5,801
Oil (vegetable) - - - - -	1,624
Opium - - - - -	999
Provisions - - - - -	2,306
Rice in the husk - - - - -	1,177
Seeds - - - - -	3,026
Soap - - - - -	3,439

While the following articles fell off :—

	£
Apparel - - - - -	1,523
Coffee - - - - -	13,896
Coir (no coir was exported during the year) -	1,884
Cotton manufactures - - - - -	11,932
Drugs and medicines - - - - -	3,105
Indigo - - - - -	7,301
Rice not in the husk - - - - -	388,798
Wheat - - - - -	10,972
Other grains - - - - -	3,339
Gums: cutch and gambier - - - - -	5,798
Jute (raw) - - - - -	11,038
Metals - - - - -	1,105
Silk goods - - - - -	1,964
Spices - - - - -	7,717
Sugar - - - - -	3,658
Teakwood - - - - -	6,581

The decrease in husked rice was, it will be remarked, extremely large, but the value of the total export of rice, husked and unhusked, amounting to 940,114*l.*, was only 28,144*l.* below the average of the five years preceding 1874-75, this average having amounted to not more than 968,258*l.*, though swelled by an exceptional increase in 1872-73 and 1873-74. The value of the exports of rice during the year was considerably larger than in any of the three years which commenced the quinquennial period.

In the exports of foreign merchandise the most noticeable fluctuations are decreases in cotton manufactures (9,612*l.*), fruits and vegetables (1,016*l.*), and wood (manufactured) 1,809*l.*

CHINA.

China.

56. The average value of the trade with China for the five years ending 1873-74 was 16,645,270*l.*, viz. :—

	£
Imports - - - - -	4,136,436
Exports - - - - -	12,508,834

For the year 1873-74 the trade was valued at 14,645,015*l.*, viz. :—

	£
Imports - - - - -	3,138,383
Exports - - - - -	11,506,632

And for the year of report the figures are 14,707,803*l.*:—

	£
Imports - - - - -	2,957,000
Exports - - - - -	11,750,803

Thus, though the trade slightly increased during the year, it has not yet recovered from the depression of 1872-73, when it fell off by nearly three millions and a half sterling. Our imports from China have steadily diminished in value since 1869-70, the decrease being much more marked in treasure than in merchandise. Our exports have also fallen off, but not in the same proportion as the imports, and they manifest a tendency to recovery which is not shown by the import trade. Compared with the year 1873-74 the trade of the last year shows an increase of 107,349*l.* in merchandise imported, neutralized by a falling off of 288,732*l.* in treasure imported. The export of merchandise increased by 154,018*l.*, and of treasure by 90,153*l.*

In the principal articles of merchandise imported from China noticeable increases Imports.
occurred in—

	£
Apparel - - - - -	3,336
Cotton piece-goods - - - - -	1,238
Dyeing and colouring materials - - - - -	1,731
Fireworks - - - - -	18,263
Metals (amongst which copper accounts for 44,497l.) - - - - -	45,627
Raw silk - - - - -	60,136
Silk piece-goods - - - - -	41,590
Sugar and sugar-candy - - - - -	10,127
Umbrellas - - - - -	7,020

Decreases occurred in—

Drugs and medicines - - - - -	6,759
Glass and glassware - - - - -	7,865
Grain and pulse - - - - -	16,183
Paper - - - - -	4,788
Provisions - - - - -	2,949
Spices - - - - -	4,145
Tea - - - - -	30,076
Tobacco - - - - -	5,380

The great decrease in grain and pulse, the import of which fell off from 16,207l. in 1873-74 to 24l. in 1874-75, merely indicates a return to the ordinary scale of imports of food-grains from China. These are generally insignificant, and the quantities imported in 1873-74 were abnormally great, in consequence of the comparative dear-ness and scarcity of grain in India which ensued on the failure of the crops in parts of Bengal in 1873. The falling off in the import of tea from China is the natural result of the increased consumption of the leaf grown in India.

In the list of articles of Indian produce and manufacture exported to China, opium Exports.
occupies the first place, and raw cotton comes next, *longo intervallo*. The value of the opium exported during the year amounted to 10,862,694l., against 10,274,422l. in the previous year, showing an increase of 588,272l. Raw cotton, on the other hand, fell off from 897,111l. to 439,471l., or by the large sum of 457,640l. Cotton twist and yarn increased by 4,690l. The export of Indian-made twist and yarn to China shows a steady and progressive increase since 1870-71, when it amounted to 25,310l. In the year of report the value was 83,671l. In other articles enumerated there were increases in—

	£
Drugs and medicines - - - - -	5,912
Feathers - - - - -	1,123
Fruits and vegetables - - - - -	1,716
Jute (raw) - - - - -	5,8
Jute manufactures (gunny bags) - - - - -	6,056
Perfumery - - - - -	2,122
Saltpetre - - - - -	9,626
Wax - - - - -	2,339
Wood (ornamental) - - - - -	8,004

The principal decreases were in soap (2,884l.) and spices (20,829l.).

In articles of foreign merchandise sent to China the only important fluctuations occurred in cotton goods and ivory, which fell off by 4,247l. and 6,265l. respectively, while fruits and vegetables and gums and resins increased, the former by 3,353l. and the latter by 2,147l.

MALDIVES.

Maldives.

57. The figures recorded under this head include, for the years previous to 1874-75, the figures for the Laccadives also, and it is impossible now to separate the figures. For 1874-75 the figures for the Laccadives are recorded under the head of Coasting Trade, in which properly they should have been included all along, the Laccadive Islands being part of British India. Indeed, even the figures for 1874-75 include the trade with Minicoy, which Island, though one of the Maldivian group, is a part of British India, and subject to the Government of Madras. In consequence of the confusion of figures which thus obtained before the year of report, it is useless to make any comparison between the trade of that year and of previous years. This is of little importance, however, as the figures of the trade have always been small, and the trade of an insignificant character. The wealth of these coral reefs consists in cocoanut trees and shells; and cocoanuts, coir (the husk enveloping the nuts), and shells and cowries have always formed the staple articles of import to the continent, which sends in exchange cotton piece-goods to clothe the islanders, rice and other grains to feed them, and a few other necessary articles. The imports for the year amounted to 29,562*l.*, all in merchandise, of which cocoanuts represented 20,330*l.*, coir 3,301*l.*, and shells and cowries 3,886*l.* The exports were valued at 29,829*l.*, which was also all in merchandise, the primitive people of these islands possessing no money and wanting none. Of the exports, rice represents 17,233*l.*, manufactures of cotton 4,015*l.*, provisions 1,625*l.*, sugar 1,667*l.*, and tobacco 1,304*l.*

MEKRAN AND SONMIA'NI.

Mekran and Son-
miāni.

58. Our trade with this coast is also insignificant. In 1874-75 it amounted to 55,302*l.*, viz. :—

Imports	£ 31,194
Exports	24,108

showing a reduction of 1,589*l.* on the trade of the previous year, and a much larger reduction of 13,387*l.* on the average value (68,689*l.*) of the trade of the five years commencing with 1869-70. Compared with last year imports of merchandise show an increase of 6,080*l.*, while the treasure imported fell off by 3,463*l.* Exports of merchandise fell off by 4,156*l.*, and treasure by 50*l.*

Imports.

The principal article imported from this coast is raw wool, the value of which in 1874-75 was 12,708*l.*, against 10,124*l.* in the previous year, showing an increase of 2,584*l.* Seeds increased by 3,295*l.*, grain and pulse by 645*l.*, mats by 295*l.*, and provisions and oilman's stores by 386*l.* These exhaust the list of enumerated articles imported. Unenumerated merchandise was imported to the extent of 3,431*l.*, showing a falling off of 1,125*l.*

Exports.

Exports from India consist mainly of cotton goods, rice and other grain, silk (raw), and sugar. The only fluctuations in these which need notice occurred in cotton goods of Indian manufacture, which increased by 1,837*l.*, while Manchester cottons fell off by 1,408*l.* Rice and other grain diminished by 4,981*l.*

STRAITS SETTLEMENTS.

Straits Settle-
ments.

59. The average value of the trade with the Straits for the five years ending 1873-74 was 2,815,761*l.*, for 1873-74, 3,004,045, and for 1874-75, 3,289,716*l.*

Compared with the trade of the previous year, there was in 1874-75 an increase of 68,589*l.* in the import of merchandise, and of 4,174*l.* in treasure. Exports of merchandise increased by 219,315*l.*, while treasure fell off by 6,407*l.*

The commerce of Singapore is very extensive, both because it is a free port and because its geographical position eminently fits it for an emporium. A considerable portion of our trade with China is carried on *via* Singapore, and as the settlement possesses a very large number of Tamil labourers, as well as an extensive colony of prosperous and industrious Chinese, the imports and exports from and to India are numerous and important.

The principal fluctuations in imports from the Straits are shown below.
Increases to the amounts noted occurred in—

Imports.

	£
Apparel - - - - -	2,796
Dyeing and colouring materials - - - - -	3,544
Fireworks - - - - -	2,163
Cocoanuts - - - - -	3,250
Hemp (raw) - - - - -	1,951
Lac - - - - -	14,602
Pitch, tar, and dammer - - - - -	2,010
Provisions and oilman's stores - - - - -	11,927
Silk (raw) - - - - -	1,447
Silk piece-goods - - - - -	12,718
Spices - - - - -	65,934
Tea - - - - -	7,140
Umbrellas - - - - -	5,740

Decreases occurred in—

Cotton twist - - - - -	8,425
Cotton piece-goods - - - - -	1,590
Earthenware and porcelain - - - - -	1,825
Gums and resins - - - - -	1,166
Precious stones and pearls - - - - -	3,553
Jute manufactures - - - - -	9,418
Spirits - - - - -	3,717
Matches - - - - -	5,368
Metals - - - - -	13,771
Paints, colours, and painters' materials - - - - -	3,087
Sugar and sugar-candy - - - - -	3,580
Tobacco - - - - -	2,761
Wood - - - - -	3,678

Of the decrease in metals, tin accounts for 12,127%, the import of this metal having fallen from 129,287% to 117,160%.

The largest place amongst the exports of Indian produce and manufacture is occupied by opium, which represents upwards of half the total value of our exports to the Straits. This article increased during the year from 1,049,470% to 1,050,805%, i.e., by 1,335%. Next after opium in importance is rice, the value of which was 259,054% against 255,150% in the previous year, showing an increase of 3,904%. The third place is occupied by manufactures of jute (gunny bags and cloths, &c.), which represented a value of 132,678%, against 49,026%, showing the considerable increase of 83,652%. Jadestone and cotton piece-goods rank next among the exports in importance. The former was valued at 80,137%, against 50,232% in 1873-74, showing an increase of 29,905%. Cotton piece-goods increased from 36,568% to 69,541%, an advance of 32,973%. Amongst other enumerated articles increases occurred in—

Exports.

	£
Apparel - - - - -	3,810
Wheat - - - - -	1,318
Ivory and ivoryware - - - - -	1,151
Vegetable oil - - - - -	1,311
Provisions - - - - -	6,181
Precious stones and pearls - - - - -	27,133
Salt - - - - -	17,835
Seeds - - - - -	7,789
Spices - - - - -	1,612
Tea - - - - -	1,555
Tobacco - - - - -	2,931

Decreases occurred in—	£
Borax	3,966
Cutch and gambier	1,393
Hides (raw)	7,907
Skins (tanned)	2,469
Saltpetre	1,573
Wax	2,739

Of foreign merchandise exported from India to the Straits, much the largest place is taken by cotton piece-goods, which represented a value during the year of 186,813*l.* out of a total value of 233,732*l.* of this class of exports. These cotton goods show an increase of 19,974*l.* on the value of the trade in the previous year. Corals increased from 2,484*l.* to 7,490*l.*, or by 5,006*l.* The fluctuations in other articles of foreign merchandise do not require special notice.

OTHER COUNTRIES IN ASIA.

Other countries
in Asia.

60. This heading comprises the following countries, viz., — Japan, Java, Siam (including Junk Salang), Bagdad, Saigon, Linga (Ladrone Islands), Macassar, Nicobars, Philippine Islands, Sumatra, Borneo, and one or two others unenumerated. The trade with the Nicobars is properly interportal trade, and will be so classed in future returns. The greatest trade with any of these did not exceed 64,725*l.* for merchandise and treasure in the year, and in consequence of the comparatively unimportant nature of the traffic interchanged between them and India, it has not been the practice hitherto to specify the countries separately. They are now being so specified, however.

The total trade under this head has fallen off a good deal since 1870–71, when it amounted to 295,754*l.* In 1874–75 it was 139,536*l.*, showing a decrease on the trade of the previous year of 7,768*l.* The import of merchandise fell off by 7,020*l.*, the import of treasure increasing by 2,157*l.* Exports of merchandise fell off by 3,845*l.*, and exports of treasure increased by 940*l.*

The only material fluctuations requiring notice in imports occurred in gums and resins, the imports of which from Sumatra increased from 1*l.* to 1,865*l.* Copper also increased by 10,614*l.*, the increase being mainly due to Japan, whence we took that metal to the extent of 10,738*l.* more than in the previous year.

Spices fell off from 21,920*l.* to 1,400*l.*, a remarkable diminution of 20,520*l.*, entirely on account of Sumatra, whence India took less spices to the value of 21,330*l.* than in the previous year.

In exports of Indian produce there was an increase of 13,015*l.* in dyeing and colouring materials. The increase was taken by—

	£
Japan	6
Java	159
Bagdad	12,850

Rice fell off by 27,676*l.*, the greatest decrease being in exports to Java (37,158*l.*) and Siam (4,446*l.*). Gunny bags also fell off by 5,562*l.*, Java having taken less of them by 6,165*l.* than in the previous year. Opium, on the other hand, increased by 10,070*l.*, the total value of the quantity exported during the year under this head. None was exported in the two preceding years. It went to Saigon and Macassar in the proportion of 8,342*l.* and 1,728*l.* to each. Saltpetre fell off by 1,156*l.*, the result of a diminished export to Java. Wax increased by 2,429*l.*, the value of increased exports to the same country.

AUSTRALIA.

61. For the five years ending 1873–74 the total average trade was represented by 635,340*l.* annually, viz.:—

	£
Imports	523,574
Exports	111,766

In 1873-74 the trade was rather less, having amounted to 561,036*l.*, the imports having fallen to 345,537*l.*, while exports increased to 215,499*l.*

In 1874-75 the trade again fell off materially, the total amount not having exceeded 369,171*l.* Imports showed a further reduction, having fallen to 233,634*l.*, and exports also manifest a very sensible diminution, having fallen off to 135,537*l.* In imports the decrease was in treasure, which fell to 50,590*l.* as compared with 174,520*l.* in the previous year, this latter amount being also far below the average of preceding years. In merchandise imported there was a moderate increase, the figures being 183,044*l.*, as compared with 171,018*l.* in 1873-74. In exports the decrease was in merchandise, which fell off by the large sum of 80,013*l.* The only treasure sent to Australia during the whole period of review was 50*l.* last year.

The chief places in our imports from Australia are occupied by (1) copper and (2) horses—the “Walers” of Anglo-Indian society. In the year of report the value of the horses imported was 52,927*l.*, being an increase of 3,697*l.* on the previous year, and of 6,007*l.* on the import of 1872-73, but still much below the value of the horses imported in 1870-71 and 1871-72. Copper (cast) materially recovered from the depression of the two previous years. The value of the imports was as follows :—

	£
1872-73	16,244
1873-74	63,648
1874-75	104,321

But the import was still a good deal below the value of the copper imported in the first three years of the quinquennial period ending with 1873-74. The figures are as follows :—

	£
1869-70	211,125
1870-71	146,454
1871-72	128,530

The progressive decline in the trade in this article between Australia and India, as exhibited by these figures, was caused by the diversion of Australian copper to England, where prices for some years past and until recently ruled high enough to make the transmission of copper to England a much more profitable operation than its transmission to India. Prices in India rose proportionately under the influence of the prices ruling in the English market, but the rise in price was coincident with a period of depression and distress in some parts of Bengal. The demand consequently abated, and the import of copper was sensibly reduced. With a fall in prices in England and better prospects for the agricultural classes in India, the trade has recovered animation.

The chief articles of Indian origin exported to Australia are rice, jute (raw), gunny-bags, vegetable oil, and tea. Coffee has also begun to appear in the list of exports since 1873-74. Rice shows a considerable diminution, the export having fallen from 79,327*l.* to 22,779*l.*, a smaller amount than that recorded in 1870-71 (24,047*l.*). Jute (raw) appears as a separate item in the exports to Australia in 1872-73. In that year the quantity exported was worth 192*l.* In 1873-74 the value increased to 1,270*l.*, and in the year of report to 4,918*l.*, showing a steady increase. The value of gunny bags exported, on the other hand, shows a large reduction, having fallen from 83,613*l.* to 49,017*l.* Vegetable oil increased from 35,431*l.* to 41,722*l.* Tea fell off from 7,619*l.* to 4,013*l.* (more than 47 per cent.), the Australian supply of tea being obtained direct from China. Coffee is shown as a separate item first in 1873-74, when the value of what was exported amounted to 1,119*l.* In 1874-75 the export amounted to 1,300*l.*

The export of foreign merchandise to Australia is insignificant, and calls for no remark.

SECTION II.

IMPORT TRADE.

Import trade.

62. Having in the first section of this review given a general view of the value of Indian trade as compared with the trade of previous years, and having shown the fluctuations of trade with each of the principal countries with which we have commercial intercourse, I proceed in this section to examine the details of our import and export trade, treating each of the principal articles separately, and explaining the causes, as far as these can be ascertained, of all noticeable fluctuations therein.

Proportion of free and dutiable imports.

63. First I shall examine the various items which constitute the bulk of our import trade. These are divided into imports free of duty and imports subject to duty. Dutiable imports represented during the year more than 90 per cent. of the total value of the goods imported, having amounted to 31,479,312*l.*, while goods imported duty free were valued at not more than 3,165,924*l.* The great bulk of the imports into India has always been subject to duty.

As compared with last year the import of dutiable goods increased by 2,786,420*l.*, and of free goods by 214,119*l.*

Free imports.

64. The principal articles imported free of duty are agricultural implements, animals (living), books and maps, building and engineering materials, coal and coke, cotton (raw),* flax (raw), bottles (common), grain and pulse of all kinds, hemp (raw), hides and skins (raw), hops, horns, ice, instruments and apparatus (scientific and philosophical), jewellery, jute (raw and manufactured), machines and machinery, manures, iron anchors, cables, and kentledge, lead sheets for tea boxes, military uniforms and accoutrements, paper, plants (living), printing and lithographing material, provisions, railway material, parts of ships, stone and marble, tallow and grease, timber and wood, unmanufactured and manufactured, wool (raw), and some other articles. By the tariff of August coffee and quinine have been added to the list of commodities imported free of duty. In this review, however, the position of all articles must be taken to be that which they occupied in the year ending 31st March 1875.

Agricultural implements.

65. *Agricultural Implements.*—The value of the implements imported during the year was 53,543*l.*, against 24,433*l.* in the preceding year, showing a considerable increase. The value of the imports of these articles is now largely above what it was a few years ago. The figures are as follow:—

	£
1868-69	14,218
1869-70	16,250
1870-71	10,782
1871-72	12,815
1872-73	20,235
1873-74	24,433
1874-75	53,543

Chiefly imported for tea gardens.

The bulk of the imports comes to us from England and is landed in Calcutta, whence these implements are distributed to the various tea gardens in Bengal, Assam, the North-Western Provinces, and the Punjab. The importation of European implements of agriculture does not, unfortunately, indicate that native systems of agriculture are in course of improvement, for these are now much what they were a hundred years ago. European implements are almost entirely imported for use in tea and coffee

* Under the tariff which came into force on the 5th August 1875, only cotton produced in continental Asia or Ceylon may be imported duty free. All other cotton is subject, on importation, to a duty of 5 per cent. *ad valorem*.

plantations worked under European management; and so far as the increased importation is an indication of a larger breadth of land brought under cultivation in tea or other industrial products by European capital and enterprise, the larger figures of value are satisfactory. It would have been more satisfactory still if it could have been said that native cultivators were abandoning their own primitive and uncouth implements for more efficient aids to labour.

66. Of horses 2,548, valued at 67,359*l.*, were imported, against 2,661, valued at 70,758*l.*, in the previous year. There has thus been a small decrease, but this trade rises and falls without any great variation from year to year, though on the whole the tendency is to an increase both in the number and value of the horses imported. The largest proportion of the horses brought to India is of Australian origin, and the animals are mostly landed at Calcutta and Madras. These horses, commonly known in this country as "walers," amounted during the year to 2,072 in number, valued at 52,927*l.*, against 1,943, valued at 49,230*l.*, in the year 1873-74, the number as well as the average value having thus slightly increased. In the number of horses imported from Australia there has not been much variation of late years, though the average value appears to have slightly declined. But it may be well to note here that in regard to all classes of free merchandise, both imported and exported, the recorded values must be accepted under great reserve. They have hitherto been, as a rule, accepted by the customs authorities without question or examination, and experience proves that values thus recorded are frequently susceptible of large modification, many merchants not being very careful in regard to the figures they give to customs officials for goods on which they have no duty to pay.

67. The next largest importation of horses consists of what are called "Gulf Arabs," brought from the coasts of the Persian Gulf, mainly to Bombay. These amounted to 458 in number, valued at 13,980*l.*, against 164, valued at 4,881*l.*, in the previous year—a considerable increase in the trade of that year as well as of previous years. The rest of the imports of horses is made up of ten from the United Kingdom, two from Mauritius, and six from other countries. The only important fluctuation in the trade is with the United Kingdom, the number of horses imported having fallen from 541, valued at 16,410*l.*, to ten, valued at 155*l.*, the lowest point reached for many years. The average value of each English horse imported is stated to have been little more than half what it was in 1873-74, but it is quite certain *prima facie* that the recorded value must be rejected as untrustworthy, when it shows each horse imported from England to be worth on arrival in this country no more than 15*l.* 10*s.* Even the value returned in 1873-74 must have been below the truth.

The importation of other kinds of animals requires no special notice, being insignificant in amount and value.

68. Articles classed under this head (including, however, such mechanical productions as photographs) are imported mainly for Europeans and for a few wealthy natives, and the demand is comparatively small. The average value of the imports for the five years ending 1873-74 was 12,671*l.*, and for the year of report 12,127*l.* The trade is steady, with perhaps a small tendency to increase. The bulk of the imports comes from England and the Mediterranean ports (*i.e.*, practically Italy), and is distributed between Bengal and Bombay.

69. *Books and pamphlets, &c.*—The value of the imports amounted to 101,030*l.* against 94,366*l.* in the previous year, showing an increase of 6,664*l.*, and a smaller increase on the average for previous years, though the value is less than the value recorded in 1870-71. Of the total amount, 98,710*l.* represents the value of books, &c. imported from the United Kingdom, the other two most important sources of supply having been France and the Mediterranean ports. From the United Kingdom the import of books was much larger during the year than in 1873-74, when again it was larger than in previous years.

Building and
engineering
materials.

70. The articles classed under this head are bricks, cements, chalk and lime, and clay. The import of these articles for the five years ending 1874-75 was :—

	£
1870-71 - - - - -	22,147
1871-72 - - - - -	26,114
1872-73 - - - - -	36,404
1873-74 - - - - -	35,278
1874-75 - - - - -	60,194

These figures show a very satisfactory increase in the trade in these articles, in which cements hold the most prominent place, the value imported in the year having amounted to 40,475*l.* against 16,149*l.* in 1873-74, being an increase of 24,326*l.* Of the total value of cement imported, Bengal took 25,111*l.* and Bombay 12,241*l.* Portland cement is now largely employed in these provinces for floorings, as being much more durable and less pervious to damp than the poor cement made in the country. Experiments are now being made in the Public Works Department in the local manufacture of this cement, and there seems to be a good prospect of producing in Bengal as good cement as any imported from England, and at a lower cost.*

Bricks and clay also show a satisfactory increase, but as regards clay (China) it is to be noted that, though classed as a building material, it is said to be employed to an undesirable extent in the sizing of the cloths manufactured in the Bombay cotton mills, for which purpose, it is alleged, a good deal is imported into the Bombay Presidency. The import of clay into Bengal is said to be mainly, if not entirely, for use in the manufacture of paper at the Bally paper mills.

Coal and coke.

71. The quantities and value of coal and coke imported during the five years ending with 1873-74 and in the year 1874-75 were as follow :—

	Tons.	£
1869-70 - - - - -	337,023	544,477
1870-71 - - - - -	286,180	467,096
1871-72 - - - - -	374,185	514,794
1872-73 - - - - -	324,638	497,942
1873-74 - - - - -	359,902	740,026
1874-75 - - - - -	356,996	680,463

Thus, though the quantity imported last year was but little less than in the previous year, the value was considerably less (showing an average diminution of about three shillings a ton)—the result of a fall in the very high prices which for some time ruled in England. The effect of these high prices was seen in the disproportionate rise in value as compared with quantity in the imports of 1873-74. Of the total quantity imported during the year 1874-75, Bombay took more than two-thirds (243,484 tons), Bengal took 66,460 tons, and Burma 33,200 tons. The diminution in the total quantity imported was caused by a restricted trade in Bengal, Madras, and Sind. In Bengal the quantity fell off by as much as 18,630 tons, in Madras and Sind the imports were less than in the previous year by 12,335 tons and 2,398 tons respectively. On the other hand, the imports into Bombay and Burma increased by 24,325 tons and 6,130 tons respectively. It is probable that these two provinces will generally show a much larger consumption of imported coal than the other provinces. In Bombay there are now many mills and manufactories, the number of which is yearly increasing, and with the increase arises a larger demand for coal. The demand for other fuel-consuming industries, as well as for railroads and the increasing number of steamers which visit the port of Bombay, is also regularly on the increase, and it must in large part be met by the import of English and Australian coal, Indian coal not being in a position to compete on favourable terms in this Presidency with imported coal. The only Indian coal which can be at all profitably employed in this Presidency instead of English coal is produced in the Central Provinces, and the distance of the mines from

* Cement is liable to duty on importation, since the 5th August 1875.

Bombay prevents it from competing with English coal, to which also it is much inferior in quality, except on the Great Indian Peninsula railroad, whose line runs close to the mines. In Burma also it is as cheap perhaps to import English coal as coal from Bengal, though from this province a certain quantity is sent to Burma, where there is an increasing consumption of fuel in rice and timber mills and in sea-going and river steamers. In Bengal, on the other hand, there is already a considerable consumption of native coal on the East Indian Railway and in local industries, as well as in the coasting and river steamers, and the maintenance of an elevated price for English coal will always tend to enable coal of local production to compete on increasingly favourable terms with imported coal, and enlarge the extent of its consumption. Much of the coal is of fairly good quality, not greatly inferior to ordinary English coal, and it is esteemed by consumers for this reason as well as for its greater cheapness as compared with English coal. The coal market in Bengal was in a dull and depressed condition during the year, and it was found somewhat difficult to work off, at the prices demanded by importers, the large stocks which had accumulated. In Madras and in Sind not much increase can at present be looked for in the consumption of coal, both those provinces being extremely backward in an industrial point of view.

72. The quantity of raw cotton imported during the year was 1,758,870 lbs., valued at 38,667*l.*, against 1,644,468 lbs., valued at 46,382*l.*, in 1873-74. The decrease in value, which occurred simultaneously with an increase in the quantity, was partly the result of a diminished import of cotton of superior quality from America and the United Kingdom, whence cotton valued at 6,372*l.* was imported in 1873-74. None seems to have come from these countries in 1874-75, though a small quantity of Egyptian cotton (12,835 lbs., valued at 484*l.*) was imported instead. The great bulk of the cotton imported is brought from the Persian Gulf to Bombay. This Presidency received during the year 1,723,288 lbs., valued at 37,901*l.*, of which 1,686,440 lbs., valued at 37,075*l.*, consisted of cotton from the Persian Gulf. In 1873-74 the quantity imported from the same quarter was 1,418,548 lbs., valued at 39,509*l.* There was thus a material reduction in the value. Most if not all of the cotton thus imported into Bombay is consumed in the local mills.

Under the provisions of the new tariff the import of raw cotton not the produce of Continental Asia or Ceylon, *i.e.*, of long-stapled cotton, all the Asiatic cotton imported into this country being short in staple like Indian cotton, has been made subject to the payment of a duty of 5 per cent. *ad valorem*. The value of the imports of such cotton amounted in 1872-73 to 455*l.*, in 1873-74 to 6,372*l.*, in 1874-75 to 484*l.* The trade in fact is insignificant in proportions, and attempts to enlarge it have, it is said, been abandoned as unremunerative.

73. The value of bottles imported during the year amounted to 19,071*l.*, against 10,220*l.* in the previous year—a large increase. The average value of the import for the five years previous to 1874-75 was 12,310*l.*

One of the phenomena which attract the observer of the industrial features of this country is the absence of all enterprise in the matter of glass manufacture. The raw material for the manufacture abounds—in pestilent profusion indeed—all over the country. Silica and carbonate of soda are unfortunately but too prominent everywhere,—the silica in the form of vast sandy wastes, while the alkali can be extracted from the saline efflorescences which sterilize the soil they cover, and from the salsola plant (whence barilla is made) which covers the great arid tracts existing in the Punjab and other provinces. Sand and the material for the extraction of carbonate of soda exist indeed in inexhaustible quantities everywhere in India, and it seems strange therefore that no attempt has been made to develop the art of glass making in a country so eminently fitted to produce the article. The art is practised, no doubt, in various places, but it is still mostly in the rudest and most primitive condition. The natives do not seem to understand how to purify and properly mix the raw materials,

Cotton (raw.)

Glass (common bottles).

Absence of enterprise in glass manufacture in India.

and whenever they produce the finer kinds of glass, they employ as the basis of manufacture broken European glass. Their own combination of raw material generally produces only the coarse glass which is used in the fabrication of bangles, or phials of a rough and unsightly kind. The application of a little capital, and prudently directed energy and skill, would speedily improve the rude native processes, and enable local manufacture to thrust out of the market the enormous quantity of common blown and moulded glassware which is now imported from long distances into this country. The Japanese have set an example to India in this respect, for a manufactory has been set up in that country, where all the finer kinds of glassware are made, and, with the exception of window glass, at a cheaper cost than that of the imported articles.

Nearly all the common bottles imported into India are brought from the United Kingdom, a very minute proportion coming from the Straits and China.

Grain and pulse.

74. The value of the imports of grain and pulse was 28,931*l.* against 24,467*l.*, in the previous year. Of the imports in 1873-74, the largest proportion consisted of the import of rice from China into Bengal, where an extraordinary demand existed in consequence of the failure of crops. This demand having ceased to exist, the course of trade returned to its ordinary channel, and in the year of review Bengal imported grain to the value only of 69*l.*, as compared with 16,732*l.* in the previous year. The great bulk of the import consists of wheat and other grains sent from the Persian Gulf and Mekran and Sonmiáni to Bombay and Sind. The imports of rice during the year were unimportant, Bombay only having received any appreciable quantity (4,584 cwts., valued at 2,479*l.*) from the Straits. Of the total imports of wheat and other kinds of grain, Bombay and Sind took nearly the whole, their receipts amounting in value to 25,877*l.* The imports from the Persian Gulf represent 46,733 cwts. of wheat, worth 16,544*l.*, and other grains to the value of 8,343*l.* This was a very considerable increase over the trade of the previous year, when the total imports of grain were worth only 3,435*l.*, and the increase explains why the exports of wheat from Bombay to the Persian Gulf showed a diminution during the year.

Hops.

75. Hops are as yet of but small importance as an article of import, though they are steadily increasing in value. The imports of the last three years were 5,020*l.*, 8,940*l.*, and 11,828*l.*, respectively. Beer of fair quality is now made in some Indian hill-stations, and is coming into extended use among civil residents and the troops in the hills. On the plains the cost of carriage from the hills prevents this beer competing with imported beer. This country beer is all made of imported hops, attempts to grow hops in the neighbourhood of Simla and other parts of the hills having as yet been unsuccessful. Another trial is now being made in Kashmir, under the direction of the Maharaja.

Ice.

76. Of ice, 208,980 cwts. were imported, valued at 21,167*l.*, against 295,160 cwts., valued at 29,987*l.* in 1873-74. The monopoly of the import of ice into India was formerly possessed by America, but increasing quantities now come from the ports of the Mediterranean. The recorded valuations of ice in the customs returns are susceptible of much modification. The quantity imported into Bengal from America, for instance, 92,400 cwts., was valued at Rs. 51,975, the rate being thus exactly nine annas per cwt. In Calcutta it is sold by the Tudor Company, which practically possesses the monopoly of the trade, at the rate of two annas per seer, or Rs. 7 per cwt. Either, therefore, the recorded value is far below the truth, or the Company, after making all needful allowances for wastage, prime cost, and cost of establishment, realise very handsome profits. It would seem in fact that the recorded values were untrustworthy, for during the first seven months of the current official year the importations, which have amounted to 156,360 cwts., have been valued at Rs. 8,16,500, or over five rupees and three annas per hundredweight. This case illustrates the necessity which existed for the recent instructions to customs officials in regard to the exercise of care in accepting the importers' valuations of free goods.

77. The import of precious stones and pearls increased from 138,477*l.* to 159,669*l.*, *i.e.*, by 21,192*l.*, but the value is still a good deal (17,066*l.*) below the amount recorded in 1872-73. The imports of the year were, however, slightly above the average value (159,414*l.*) of the imports of the six previous years. By far the largest proportion of these imports consists of pearls imported into Bombay from the Persian Gulf. It is a trade which has an historical existence, having passed into our hands from those of the early Portuguese navigators in those parts.

Jewellery : precious stones and pearls.

From the Persian Gulf the imports during the year were valued at 136,885*l.* against, 110,402*l.* in 1873-74, 134,988*l.* in 1872-73, and the trade was also a good deal higher than the average value of the trade for the five years ending 1872-73, which was 120,681*l.* A comparatively small quantity of precious stones and pearls is also received from China, the Straits, the Red Sea and Aden, and other places.

78. The import of manufactures of jute (by which gunny-bags and gunny-cloths are meant, though this is not specifically stated in the returns of the local Governments) was valued during the year at 16,291*l.*, against 15,244*l.* in 1873-74, showing a small increase. In 1872-73 the value of the imports was 8,187*l.* Up to the year of report these articles were chiefly imported into Bombay and British Burma from the Persian Gulf and the Straits respectively. But this year the largest quantity, valued at 13,533*l.*, was imported from the United Kingdom, Bengal taking the goods to the value of 7,910*l.* The trade is of small importance, and with the development of jute manufacture on a large scale in the mills of Bengal, may be expected to fall off altogether.

Jute (manufactured).

79. Machines and machinery form an important item of import, and their increasing prominence is a very satisfactory indication of the industrial progress of India.

Machines and machinery.

In 1850-51 the value of the machinery imported into this country amounted to no more than 20,666*l.* In 1874-75 the value was 1,185,943*l.* Taking the figures for the last twenty-five years by their average for each five years of the period, we have :—

Average Annual Imports.	£
1850-51 to 1854-55	48,110
1855-56 to 1859-60	520,899
1860-61 to 1864-65	614,063
1865-66 to 1869-70	723,223
1870-71 to 1874-75	711,802

The value recorded in 1874-75 is the highest of any year in the whole period, and the value of the imports in 1873-74 was also considerably higher than the imports of any previous year, except 1867-68, when the imports reached 1,077,529*l.* Bengal and Bombay take much the largest share of the machinery imported. In the year of review the figures for Bengal are 501,339*l.*, and for Bombay 521,144*l.*, or together 1,022,483*l.*, leaving no more than 163,460*l.* out of the total to be shared among the other three provinces. Of this sum, British Burma stands for 91,334*l.*, while Madras took no more than 66,074*l.* As compared with the previous year the imports into Bengal show a decrease of 14,912*l.*, while the value of the machinery sent to Bombay increased by the large sum of 166,317*l.* The imports into Madras also were more than in the previous year by 44,677*l.*, while those for Burma fell off by 10,176*l.*, the sum being still, however, considerably in excess of the imports of 1872-73. The rapid extension of the local manufacture of cotton by machinery in Bombay accounts for the great increase of imports under this head. In Bengal the manufacture of cotton in mills has not, naturally, attained such importance as the same industry in Bombay, Bengal not being nearly as well situated in regard to the production of the raw material and its convenient transport to the mills. There was but little importation into Bengal for cotton mills during the year, and the business of the jute-mills was for some time in such a depressed and discouraging condition (though it has since revived, and prospects are hopeful), that all new projects were but coldly regarded.

This state of affairs, following on an extensive importation of machinery in 1873-74, will no doubt sufficiently account for most of the falling off exhibited in the year in Bengal. In Burma, the ruler of Upper Burma, it is understood, receives an appreciable portion of the machinery imported, and the rest is required mainly for the timber and rice mills which are being erected in increasing numbers in that province.

Most of the machinery we import is of English manufacture, and obtained from the United Kingdom.

Metals (manufactured).

80. Of manufactured metals, iron anchors, chains and kentledge, and lead sheets for tea-boxes, are free. Of the former the import is small, and hardly shows a tendency to increase. The import of the year amounted to 4,493*l.*, against 4,155*l.*, but the value in the year before was 4,706*l.*, in 1871-72 4,795*l.*, and in 1870-71 10,586*l.* Lead sheets for tea-boxes, on the other hand, are imported in increasing quantities, corresponding with the increased production and export of Indian tea. The value last year was 35,053*l.*, against 27,014*l.* in 1873-74, and 32,959*l.* in 1872-73. In 1870-71 and in 1871-72 the import amounted to 19,019*l.* and 25,015*l.* respectively. Nearly all these goods, like the machinery imported, comes from the United Kingdom, and nearly all the tea lead is landed at Calcutta.

Paper and pasteboard.

81. In paper and pasteboard there was a reduction of 6,816*l.*, the figures being 315,841*l.*, against 322,657*l.*, but the value was in excess of the value of imports of previous years since 1870-71. The decrease occurred chiefly in the imports from the United Kingdom, which fell off from 291,785*l.* to 283,364*l.* The imports from China also fell off. The imports into Bengal increased considerably, while into Bombay they fell off in greater proportion; the increase in the one case having amounted to 18,195*l.* while the decrease was 23,347*l.* The imports into Bombay in 1873-74 were, however, very largely in excess of those of 1872-73, and the market was probably glutted with paper. The Mediterranean Ports form the largest source of supply of paper sent to India, after the United Kingdom, the cheap German papers being those received from this quarter. It is probable also that a sensible proportion of the exports from the United Kingdom consists of paper of this kind, which has to a great extent usurped, at any rate on the seaboard, the place of the common papers of Indian manufacture. Native paper is generally poor and bad, and it is questionable whether it will for a long time yet be able to compete successfully with foreign paper. Paper-making material abounds in India, but owing to want of means of transport it cannot be conveyed to any central place of manufacture at rates which will enable manufacturers to carry on a profitable business in competition with the imported article. There are as yet, it is believed, only two paper-mills in India,—one near Calcutta, and the other in Bombay—conducted under European supervision, and making paper by good machinery. The Bally paper-mills confine their operations to the manufacture of the coarser kinds of paper, and are just able to compete on fair terms with the imported article. It is intended to publish soon, in the Department of Revenue, Agriculture, and Commerce, an account of paper-making and paper-making fibres in India, in view to aiding, if possible, by the collection of accurate information on the subject, the development both of local manufacture and the supply of the most suitable raw material.

Railway materials. 82. The only railway materials exempt from duty on import are sleepers. They are imported exclusively into Bombay. The value of the imports last year was 17,810*l.*, against 492*l.*—a very large increase.

Ships, parts of. 83. The value of these increased from 17,627*l.* to 22,190*l.* These articles are supplied by the United Kingdom, and are taken almost entirely by British Burma.

Timber and wood, and manufactures thereof. 84. The value of these articles increased from 53,406*l.* to 72,360*l.*, the chief increase being in Madras, where the value went up from 24,213*l.* to 43,746*l.* Of the total value, Ceylon represents 28,340*l.*, against 18,529*l.* in the previous year, and the United Kingdom 26,375*l.*, against 12,520*l.*

85. The import of raw wool advanced from 1,254,900 lbs., valued at 38,562*l.* in 1873-74, to 1,542,767 lbs., valued at 42,755*l.*, in 1874-75. But both quantity and value are still a little below the average for the five years ending in 1873-74, viz., 1,578,313 lbs., valued at 46,790*l.* Nearly all the wool which comes to India is imported from the Persian Gulf and Sonmiáni and Mekran coasts, which are peopled by pastoral communities, into Bombay and Sind, whence a portion (about one-seventh in the past year) is re-exported to other countries, chiefly the United Kingdom.

86. The other articles in the list of free imports require no special notice, neither the amount nor the fluctuations of the trade being of any importance.

DUTIABLE IMPORTS.

87. The most important of these are: apparel, arms, ammunition, and military stores, candles, clocks and watches, corals (real), cotton goods (these being the most important of all), drugs and medicines, dyeing and colouring materials, earthenware and porcelain, fireworks, flax manufactures (chiefly linen piece-goods and canvas), fruits and vegetables, glass and glassware (other than common bottles), gums and resins, hemp manufactures, hides and skins, instruments and apparatus (musical and photographic), ivory (manufactured and unmanufactured), jewellery and plate (except precious stones and pearls), leather (unwrought and manufactured), liquors, viz., malt and spirituous, and wines and liqueurs, matches, metals, oils, paints and colours and painters' materials, perfumery, provisions and oilman's stores, railway plant and rolling stock, salt, shells and cowries, silk (raw and manufactured), spices, stationery (excluding paper), sugar and sugar-candy, tea, tobacco, toys and requisites for games, umbrellas, and woollen goods. Dutiable imports.

88. So far as goods on which duty is levied *ad valorem* are concerned, the declarations of value made by importers are carefully tested in the custom houses, and the recorded valuations of such articles may be taken as approximating closely to accuracy. But in regard to goods on which duty is levied on a fixed tariff valuation, the figures given in the returns have hitherto represented such official valuation, and not the actual market value for the time being. The figures for such articles therefore are sometimes more or less incorrect. Since the commencement of the current official year the recorded valuation of such goods is the actual market value of the day.

89. The value of apparel (including haberdashery, millinery, &c.) amounted during the year to 620,456*l.* as compared with 578,220*l.* in the previous year, and an average annual importation of 496,609*l.* in the five years from 1868-69 to 1872-73. Of the total amount, 588,270*l.* represented apparel imported from the United Kingdom, France, and the Mediterranean Ports; most of the remainder came from China, Ceylon, and the Straits. Apparel.

90. These were imported to the value of 84,268*l.*, against 76,319*l.* in the previous year, but the amount was below the average annual value (88,415*l.*) of the imports during the five years ending 1873-74. Arms, ammunition, &c.

91. Candles were valued at 48,194*l.*, against 50,603*l.* in 1873-74, this sum again being considerably less than the value of the imports of 1872-73 (84,853*l.*) This, however, was an exceptionally large import. The average import for the five years ending 1873-74 was 55,597*l.* British Burma takes a relatively very large proportion of the candles imported, the imports into that province having represented during the year 12,112*l.*, and additional quantities to the value of 7,538*l.* were obtained from other parts of India. It appears that candles are extensively consumed in religious ceremonies in the Burmese pagodas, and as offerings to the priests. For illuminating purposes generally in India, the extended use of mineral oils seems to be injurious to the candle-making interest. Candles.

Canes and rattans. 92. Canes and rattans were imported to the value of 21,794*l.*, against 21,626*l.* and 21,426*l.* in the two previous years. The trade is small, but shows a tendency to increase steadily. The chief source of supply is the Straits Settlement.

Clocks and watches. 93. The value of these increased from 25,337*l.* in 1873-74 to 33,667*l.* in 1874-75. The average import for the five years ending 1873-74 was 32,737*l.*, and it would seem therefore from the returns that the increase in the trade has on the whole been very small.

Coffee. 94. The importation of coffee has fallen off largely. The trade has been subject to fluctuations from time to time, but since 1871-72 there has been a steady decrease, as will be seen from the figures below :—

	lbs.	£
Imports in 1871-72	1,337,004	33,672
„ 1872-73	1,021,673	24,284
„ 1873-74	617,623	14,093
„ 1874-75	166,714	3,806

A great decrease in the imports into Bombay accounts for this falling off. From 945,219 lbs., valued at 22,180*l.*, in 1872-73, and 540,211 lbs., valued at 12,472*l.*, in 1873-74, the imports into that Presidency fell in 1874-75 to 94,119 lbs., valued at 2,185*l.* The coffee imported into Bombay was chiefly of the kind commonly called Mocha coffee, and was shipped from the Arabian coast to Bombay, thence to be re-exported to Europe. It appears, however, that a direct trade has sprung up between England and the coast of Arabia, and Bombay is no longer used as an entrepôt for this coffee.

Corals (real). 95. Corals were imported to the value of 66,111*l.* during the year, the Mediterranean Ports, *i.e.*, Italy, having sent us 53,558*l.* worth. The trade shows a very slight decrease on that of 1873-74, when it amounted to 66,689*l.*, but it is slowly recovering from the depression of previous years, that depression having, it is believed, been partly caused by the imposition of a duty of 7½ per cent. in April 1870. The imports were as follow :

	£
1868-69	93,126
1869-70	65,285
1870-71	45,441
1871-72	54,894
1872-73	40,013
1873-74	66,689

Though the imposition of the duty probably had an immediate effect in reducing the importations, it must be remarked that the trade is of a variable and fluctuating nature. It is mainly in the hands of a few foreign firms, from whom natives purchase the corals for sale in the interior at great fairs and religious gatherings. They form a favourite adornment for native children as well as for adults in certain classes of the population. The demand for corals depends upon the out-turn of the crops of the year. After an abundant harvest rupees will be freely exchanged for a string of corals to be added to those already worn as a necklace, but in a poor year the coral merchant will find his stock almost unsaleable at any price, and his next importations will consequently be on a very reduced scale.

Cotton manufactures. 96. The figures of the values of imported cotton goods for the last twenty-five years, taking the average of each quinquennial period, are as follow :—

	£
Annual average from 1850-51 to 1854-55	5,611,663
„ „ 1855-56 to 1859-60	7,944,859
„ „ 1860-61 to 1864-65	11,221,407
„ „ 1865-66 to 1869-70	16,345,826
„ „ 1870-71 to 1874-75	18,193,683

Value of Imports.

The figures for each of the last five years are as follow :—

	£
1870-71	19,044,869
1871-72	17,483,333
1872-73	17,234,248
1873-74	17,784,625
1874-75	19,421,340

The increase in the quantity of the goods imported was proportionately greater than the increase in the value, for the recorded values are calculated on fixed tariff valuations, and these were lowered by about 15 per cent. in the year previous to that which commenced the last of these quinquennial periods.

97. Compared with the imports of the previous year an increase of 1,636,716% occurred in the imports of the year of report, or 9·20 per cent. In Bengal the increase was large, the value of the imports having amounted to 11,574,214%, against 9,504,906% in 1873-74, showing an excess of 2,069,308%, or 21·77 per cent. In that year however there was great stagnation in the trade in Bengal, in consequence of the existence of the scarcity in Behar, and extensive orders were transferred from Calcutta to Bombay, where the trade in 1873-74 increased by 19 per cent. This year, on the other hand, the Bombay trade diminished by 461,417%, or 8·39 per cent, the value of the imports having fallen from 5,501,026% to 5,039,609%. In Sind also there was a large reduction of 27·31 per cent., the figures having fallen from 78,266% to 56,892%, or by 21,374%. In Madras also the imports fell off from 1,998,318% to 1,910,872%, i.e., by 87,446%, or nearly 4·35 per cent. In Burma the imports increased by 19·60 per cent., or 137,644%, having advanced from 702,108% to 839,752%.

Imports of the several provinces.

98. Taking the different denominations of cotton goods as given in the returns separately, we have the following comparative figures in regard to the values. It would hardly serve any useful purpose to compare quantities, for these have been given in various terms (yards, pounds, pieces, pairs, and dozens) which would give scarcely an intelligible idea of the nett result, and moreover in some cases entries have hitherto been made and recorded of values only, quantities being omitted.

Comparative values of different classes of goods.

Twist and yarn increased from 2,628,959% to 3,157,779%; grey or unbleached piece-goods from 10,041,678% to 11,375,536%; white (or bleached) piece-goods fell off from 2,931,073% to 2,564,365%, and coloured and printed goods from 1,323,522% to 1,248,917%. "Turkey reds" increased from 807,585% to 1,013,507%, and American cloths from 1,039% to 14,686%. (the import of this class of goods however in 1873-74 was considerably less than in the two previous years, when the value was 9,006% and 8,021% respectively). Cotton thread fell off from 47,485% to 43,141%, and other sorts, unspecified, increased from 3,284% to 3,407%. The nett increase, therefore, amounting to more than 1,636,000%, was due chiefly to an improvement in twist and yarn and grey piece-goods.

99. Out of the total value of the imports not more than 1,117,976%, or 5·75 per cent., was re-exported, in the following proportions: twist and yarn 56,249%, grey or unbleached piece-goods 258,353%, white or bleached goods 78,475%, coloured and printed cloths 711,826%, Turkey red 10,513%, thread 2,550%, and other sorts 10%. A portion of the imports also found its way across the frontiers by land, but of this trade we have no accurate record. Its extent however cannot be great. Bombay naturally, by reason of her geographical position, possesses almost the monopoly of this re-export trade, and of the total value of the re-exports 1,031,714% represent the value of the goods sent from that port, chiefly to the African Coast and the Persian Gulf. The bulk of the re-exports consisted of grey and printed goods; white goods and twist and yarn are also exported to a fair extent.

Re-exports.

100. Judging merely from the total of the figures given above of the import of cotton goods, showing as they do a considerable increase on the imports of the previous year, and presenting absolutely the largest figures on record in any year,

Trade apparently prosperous, but not really so.

Causes of low
prices and glutted
markets.

it would seem that the trade in English cotton goods (for it is almost unnecessary to say that the largest portion of these imports consists of Manchester goods) was unusually prosperous during the year, and that the outlook was very hopeful. This however is known to those acquainted with the circumstances of the trade to be by no means the case. The trade in these goods has been for some time in an unhealthy condition. Importations have been made in quantities much in excess of the demand, and sales have been forced at low and unremunerative rates. The cotton trade in England has developed greatly of late years. New mills have sprung up with surprising rapidity, founded and maintained by means of capital seeking investment in any direction where a hope of return exists. Production has increased in an excessive degree, and the goods thus produced have, through new firms working on credit, been thrown recklessly on markets already glutted. Little consideration was given to the fact that the supplies sent out were far in excess of the demand for consumption. What producers wanted was an outlet for their goods, and the new firms which were established to receive and send the goods to foreign countries, working as they did mainly on credit, found themselves compelled—to keep themselves afloat after their first losses—to send out consignment after consignment, drawing advances on the goods shipped, and hoping, with better prospects in the Eastern markets, to stave off as long as possible the inevitable collapse. The markets of China and of India were consequently for some time overstocked with goods which were not wanted. The collapse came at last, and it may now be hoped that after the failures which occurred last year among the numerous new Manchester firms, the market will assume a more healthy tone, and a more legitimate business will be profitably pursued by the older firms who have capital at their command, and whose credit remains unshaken.

But the cause of the decline in the demand for English cotton goods and the prices given for them—a decline so steady and persistent that it has again been found necessary to reduce the tariff values of these articles—does not lie alone in speculative overtrading and the consequent glutting of the markets. Another important cause must be sought in the inferiority of the goods, the quality of which, it is alleged, has much deteriorated of late, the practice of sizing having been carried to an extent which has given occasion for great complaint in the Indian and Chinese markets.

Drugs and medi-
cines.

101. The average value of the imports of drugs and medicines for the five years ending 1873-74 was 254,356*l.*, for that year 271,885*l.*, and for the year of report, 297,765*l.* There has thus been a substantial increase both on the average trade and the trade of the previous year, but the amount is below the value recorded in 1872-73, when it reached 315,254*l.* The trade fluctuates somewhat, but the tendency is towards an increase. Of this class of goods, brimstone or sulphur is the only article which has hitherto been enumerated in the returns, and it is of but small importance comparatively. In Bombay and Bengal, which are much the largest importers, there was an increase in the imports, while in other provinces there was a slight falling off. The greatest portion of the imports is from the United Kingdom, China, the Straits, and the Persian Gulf. Alum from the United Kingdom, assafoetida from the Persian Gulf, and camphor and cassia lignea from China are prominent amongst the items comprised under this head.

Dyeing and colour-
ing materials.

102. These consist to a large extent of cochineal, saffron, and aniline dyes from the United Kingdom. The last-named dyes are unfortunately, supported by their great cheapness and facility of application, entering every year into more decided competition with dyes of Indian production, extracted directly from vegetable substances. The fact is perhaps to be regretted, because, although they have in their favour their great comparative cheapness, and the ease with which they are applied to fabrics, the colours they produce are generally incapable of resisting the action of light, and many of the tints are loud, crude, and staring, in unpleasant contrast to the rich, mellow tone given to cloth by many Indian dyes. Such as they are, however, these dyes, after having done some injury to our dyes in the European market, and

threatened with extinction the French industry in madder, the cultivation of which formed a main source of wealth in some departments, have penetrated our markets and have entered into direct competition with the indigenous dyes in the very seat of their production: *sheesha-ka-rang* is now well known in most Indian bazars, as far north as Ladakh and Kashmir.

The values of the importations of dyeing and colouring materials for the last seven years are as follow:—

1868-69	-	-	-	-	-	94,298
1869-70	-	-	-	-	-	111,499
1870-71	-	-	-	-	-	141,107
1871-72	-	-	-	-	-	119,096
1872-73	-	-	-	-	-	186,336
Average of the five years						130,467
1873-74	-	-	-	-	-	139,929
1874-75	-	-	-	-	-	158,146

The trade slightly fell off in 1873-74, owing to a reduction in the imports of aniline dyes, but it was still well above the average of the five preceding years, and in the year of report the trade seems to have recovered entirely, notwithstanding the reduction of the tariff value of aniline dyes by one-half (from 8 annas to 4 annas the ounce). Bombay receives most of the imports of dyeing and colouring materials, and the trade of that presidency in these articles shows a large recovery from the depression of the previous year. The importations into the other provinces also increased, except in Burma, where there was a small decrease. The United Kingdom is the main source of supply of dyes imported into India, the Mediterranean Ports, the Persian Gulf, and the Straits also sending us some not inconsiderable quantities.

103. The imports show an increase of 16,914 $\frac{1}{2}$ l., having risen from 98,533 $\frac{1}{2}$ l. to 115,447 $\frac{1}{2}$ l., and this increase followed on a considerable increase in the previous year. Earthenware and porcelain.
Burma took the largest share of the imports this year as well as the year before, having imported to the value of 47,468 $\frac{1}{2}$ l., against 33,273 $\frac{1}{2}$ l. in the previous year. The Burmese, it appears, have acquired a liking for English crockery, the use of which is fast superseding the lacquered platters and bowls which have hitherto been employed. In other provinces the competition is between crockery and metal, and on the whole metal is preferred by those who can afford the use of metal vessels, these being valuable property capable of realization in time of need. In Bombay the value of imports increased from 26,133 $\frac{1}{2}$ l. to 35,674 $\frac{1}{2}$ l. In Bengal, on the other hand, they fell from 30,512 $\frac{1}{2}$ l. to 24,209 $\frac{1}{2}$ l. Most of the imports reach us from the United Kingdom, and nearly all the balance from the Straits and China.

104. Fireworks are imported almost entirely from China and the Straits, the largest proportion of the imports being directed to Bombay. In 1874-75 the value of the fireworks imported amounted to 48,983 $\frac{1}{2}$ l., against 34,071 $\frac{1}{2}$ l. The three years previous to 1874-75 seem to have been years of depression in the trade. Fireworks.

105. Flax goods are received in India mostly in the shape of piece-goods and canvas. The total value of the imports during the year amounted to 114,235 $\frac{1}{2}$ l., of which piece-goods represented 49,654 $\frac{1}{2}$ l. and canvas 59,784 $\frac{1}{2}$ l. The figures for the year show a considerable increase over those of the two previous years, which were 85,155 $\frac{1}{2}$ l. and 91,469 $\frac{1}{2}$ l. respectively. The increase is due to larger imports of canvas, piece-goods having somewhat fallen off. Bengal and Bombay take most of the imports, the largest proportion going to the former. The great bulk of the goods is of British origin. Flax, manufactured.

106. The value of the imports of fruits and vegetables stood at 257,087 $\frac{1}{2}$ l. in the year of report, against 315,080 $\frac{1}{2}$ l. in 1873-74, and an average annual import of 307,525 $\frac{1}{2}$ l. Fruits and vegetables.

in the five years ending with 1872-73. The decrease, however, is not really quite as great as would seem from the figures, for some portion of the trade which was in 1873-74 recorded as foreign trade, viz., the trade in cocoanuts with the Laccadives, has now been transferred to the accounts of the coasting trade. Still there is a considerable decrease, and especially in the imports from the Persian Gulf, whence the bulk of the imports, largely consisting of dates, wet and dry, is brought to Bombay. The imports from this quarter fell in value from 230,562*l.* to 184,166*l.*, a decrease of 46,396*l.*

Glass and glass-ware (except common bottles).

107. The average annual value of the articles comprised under this head, which includes sheet and plate glass, beads and false pearls, and other ware (excepting common bottles, which are free), amounted for the five years ending 1873-74 to 278,876*l.* For 1873-74 the value was 323,113*l.*, and though the value in the year of report (299,810*l.*) was rather less than this, it was in excess of the average imports for the five years previous. As compared with last year the decrease occurred in sheet and plate glass, which fell from 24,006*l.* to 20,185*l.*, and in beads and false pearls, which fell from 109,079*l.* to 83,180*l.* In both cases, however, the imports of the year were rather above the average. Of beads and false pearls the largest portion comes from Italy, either direct or via the United Kingdom, and the trade is subject to as great fluctuation as the trade in coral, being carried on under much the same conditions and generally by the same firms. Other ware, unspecified, increased from 190,028*l.* to 196,444*l.* The remarks made under the head of glass in the section of articles free of duty apply to this class of articles also.

Gums and resins :

Cutch and gambier.

Rosin.

108. Amongst these are included cutch and gambier, of which a comparatively small quantity is imported from the Straits, mostly into Bengal. The importation of cutch and gambier amounted during the year to 11,248 cwt., valued at 9,299*l.*, against 12,298 cwt., valued at 9,924*l.*, in 1873-74, and 12,685 cwt., worth 10,149*l.*, in 1872-73. But in 1870-71 and 1871-72 both quantities and values were lower than in any of the three years above mentioned. The import of rosin during the year amounted to 42,220 cwt., valued at 50,666*l.*, against 38,838 cwt., valued at 46,610*l.*, in 1873-74. The import of rosin, which comes mainly from the United States, has greatly increased during the last two years, as will be seen on reference to the figures annexed :

	Cwt.	£
1870-71	9,524	11,427
1871-72	5,428	6,537
1872-73	12,605	15,082
1873-74	38,838	46,610
1874-75	42,220	50,666

The trade has thus more than trebled during these last two years. The largest share of the imports falls to Bengal, and it seems that a considerable portion is applied to the adulteration of shell-lac, though no doubt a large quantity is also increasingly employed for useful and proper objects. The great increase, however, in the import commenced with the increase in the demand for shell-lac, and has continued with it.

Other sorts.

The "other sorts" of gum which complete the list of our imports under this head are for the most part African and Arabian gums, such as copal, gum arabic, myrrh, &c., and gums from the Straits. They are not separately enumerated in the returns, and quantities are not given. The value of the imports of these kinds was in 1874-75 71,884*l.*, against 84,860*l.* in 1873-74. In the three years previous the value stood at 74,727*l.*, 83,092*l.*, and 73,019*l.* The main decrease occurred in the import of gums from Africa and the Red Sea into Bombay, the value having fallen from 74,769*l.* in 1873-74 to 59,033*l.* in the year of report. As has been said before, the port of Bombay is no longer to such an extent as formerly an emporium for the merchandise of Zanzibar and the ports on the Arabian coast, a direct trade having sprung up between these parts and the European and other markets via Aden, in consequence of the establishment of a regular line of mail steamers to Zanzibar and the development of means of direct communication. Consequently a good deal of gum which was formerly brought to Bombay for re-export to Europe does not now come to that port.

The total value of gums and resins under all the heads noted above during the year amounted to 131,849*l.*, showing a decrease of 9,545*l.* on the imports of the previous year.

109. 567,214 lbs. of ivory were imported during the year, against 855,188 lbs. in 1873-74. Ivory, unmanufactured and manufactured.

In the three years previous to 1873-74 the imports were respectively 572,729 lbs., 708,573 lbs., and 686,185 lbs. The total value of the imports was :—

	£
1870-71	117,092
1871-72	144,407
1872-73	145,657
1873-74	185,969
1874-75	123,048

These figures show a very large decrease, which occurred chiefly in the imports from Africa and Aden (the latter place being an entrepôt for African ivory exported from Zanzibar). From these places the imports represented 101,127*l.*, against 176,242*l.* in 1873-74. Nearly all the ivory imported comes to Bombay.

The cause of the decrease lies, it seems, in the execution of the treaty with the Sultan of Zanzibar providing for the abolition of the slave trade. Since measures have been taken to enforce the provisions of the treaty, the Arab traders of Zanzibar bring no more caravans down to the coast, and the ivory trade is for the present nearly annihilated. It may be hoped that it will revive in a year or two under the more healthy conditions of ordinary trade.

110. The import in 1874-75 was unprecedentedly large, having amounted to Lac. 3,449 cwt., valued at 16,432*l.*, of which the imports into Bengal stand at 3,420 cwts., valued at 16,396*l.* The greatest portion was from the Straits Settlements (3,243 cwts., worth 15,511*l.*); this was probably Siamese lac, imported via the Straits. From the United Kingdom 202 cwt., valued at 190*l.*, were received, consisting probably of Indian lac unsaleable from some cause and returned to this country. The extremely large import from the Straits (the average value of the four previous years not having exceeded 2,369*l.*) was no doubt caused by the great demand in India, and was intended for re-export in the form of manufactured (shell) lac.

111. Leather, both unwrought and manufactured into boots and shoes, saddlery, and Leather. other articles, was imported to the value of 80,691*l.*, against 83,300*l.* in the previous year, and an average import for the five years of 91,782*l.* It cannot as yet be said that the trade shows a decided tendency to decline, but it is certainly not showing a tendency to increase, and the cause is probably an improvement in the art of tanning skins and the manufacture of leather in this country, and consequently a more extended use of local production. An improvement certainly is manifest of late years, and it was much wanted. There is still great room for further improvement, Indian leather being generally of very poor quality, owing principally to skins being insufficiently tanned.

112. Liquors rank third in order of importance among our dutiable imports, cotton Liquors: goods being first, and metals second. The total value of the imports during the year amounted to 1,380,286*l.* against 1,302,709*l.*—a large increase of 77,577*l.*, but the value is not as large as in 1872-73.

The figures for the last six years are appended :—

	£
1869-70	1,526,227
1870-71	1,137,935
1871-72	1,361,587
1872-73	1,429,244
1873-74	1,302,709
1874-75	1,380,286

Malt liquors.

113. Of ale, beer, and porter, 1,481,698 gallons, valued at 349,844 $\frac{1}{2}$., were imported, against 1,435,345 gallons, valued at 337,915 $\frac{1}{2}$., in 1873-74.

There were imported in—

				Galls.	£
1869-70	-	-	-	1,747,721	413,520
1870-71	-	-	-	1,365,303	311,686
1871-72	-	-	-	1,323,927	305,319
1872-73	-	-	-	1,536,496	363,496
1873-74	-	-	-	1,435,345	337,915
1874-75	-	-	-	1,481,698	349,844

Beer is not drunk by natives to any extent, and the importation is almost entirely for the supply of the European population of the country. The fluctuations in the trade during the last five years are of no particular importance. The trade is not one in which in any series of years a very marked increase can be expected, unless there should be large accessions to the European population. On the other hand, it is possible that it may not increase quite in proportion to the augmentation of the European population, for in the hills beer brewed locally is coming into favour, and with a slight improvement in quality, and a reduction in price, may to some extent displace English beer.

Spirits.

114. Spirits (brandy, rum, and other kinds) were imported to the extent of 674,987 gallons, valued at 553,833 $\frac{1}{2}$., against 608,824 gallons, valued at 488,597 $\frac{1}{2}$., in 1873-74. The figures for the last six years are as follow :—

				Galls.	£
1869-70	-	-	-	713,437	564,378
1870-71	-	-	-	461,323	385,900
1871-72	-	-	-	671,626	560,485
1872-73	-	-	-	723,609	553,884
1873-74	-	-	-	608,824	488,597
1874-75	-	-	-	674,987	553,833

Of the total quantity imported, Bengal takes not much less than half, a considerable proportion of the imports into this presidency consisting of cheap, fiery brandies, to the consumption of which some classes of the native population are addicted to an immoderate extent. The Burmese also are partial to European brandy and gin.

Wines and
liqueurs.

115. Of this class of liquors the imports are as follows :—

				Galls.	£
1869-70	-	-	-	646,923	548,329
1870-71	-	-	-	490,835	433,336
1871-72	-	-	-	567,737	494,689
1872-73	-	-	-	592,831	509,285
1873-74	-	-	-	545,043	474,560
1874-75	-	-	-	564,921	474,695

The year 1869-70 appears to have been a year of excessive importation in all classes of liquors, followed by a year of comparative depression, from which there has been gradual recovery. In wines the fall in value in 1874-75, as compared with the quantity imported, indicates a satisfactory increase in the consumption of light French wines, probably the most wholesome beverage for the country. Taking the figures of the trade in liquors as a whole, it does not seem, although there was an increase last year, that the trade possesses any great elasticity, and it is possible therefore that the levy of the additional duty imposed on all classes (except beer) under the new Tariff Act may tend to restrict importation—an effect which is not to be regretted, so far as the cheap brandies are concerned.

Metals.

116. Next to cotton goods, metals rank highest in importance amongst dutiable imports. The total value in 1874-75 was 2,567,550 $\frac{1}{2}$., against 1,707,337 $\frac{1}{2}$., in 1873-74.

being an increase of 860,213/., or more than 50 per cent. This increase is a satisfactory recovery from the depression which for some time had characterised the metal trade.

The figures of value are given below :—

	£
1868-69	- - - - - 3,813,540
1869-70	- - - - - 3,526,488
1870-71	- - - - - 2,683,986
1871-72	- - - - - 2,360,963
1872-73	- - - - - 1,764,955
1873-74	- - - - - 1,707,337
1874-75	- - - - - 2,567,550

The trade is thus still nearly a million sterling below the point reached in 1869-70, and much more below the value of 1868-69. It will be best to review the trade in each metal separately, showing the fluctuations in quantities and values in the years above noted.

117. The value of the imports of copper exceeded by 350,824/., or 68·38 per cent., Copper. the imports of the previous year. The figures of the trade are,—

	£
1868-69	- - - - - 1,743,096
1869-70	- - - - - 1,753,635
1870-71	- - - - - 1,361,758
1871-72	- - - - - 1,036,674
1872-73	- - - - - 578,788
1873-74	- - - - - 513,023
1874-75	- - - - - 863,847

From the United Kingdom the imports amounted to 651,935/., in value, against 393,403/., or little less than double those of the preceding year. From Australia we received copper to the value of 104,670/., against 63,665/., in 1873-74. Imports from China amounted to 83,137/., against 38,641/.. These are our main sources of supply.

It was explained in the review of the trade for 1873-74 that two causes influenced the serious diminution in the import of copper into this country of late years. One of these was the great rise in the prices ruling for copper in England, which caused the diversion to that country of Australian copper which would have otherwise come to us, and which, at the same time, very largely diminished the supply of the metal from England to India. Imports fell off year by year as prices maintained their high level. To this cause was added in 1873-74 the scarcity in Bengal, the occurrence of which naturally tended to reduce imports, for copper is largely used in this country for vessels and utensils, and in times of distress the people cannot afford copper, and must content themselves with earthenware. The second of these causes has ceased to exist, and the influence of the first has materially abated. Prices having fallen to a lower level in England, the ordinary flow of copper to this country from that country, Australia, China, and other countries of supply has again set in, and, unless prices should rise again largely in England, or general distress should again arise in extensive districts in India, may be expected to continue. Amongst the lower classes in this country the purchase of copper vessels is a favourite way of investing their savings. Many people accumulate them in quantities much in excess of household requirements, selling them for their weight in metal in times of pecuniary pressure.

Bengal imported 428,420/., worth of copper, against 263,333/., in 1873-74. Bombay took 356,408/., against 181,709/., and Madras 63,030/., against 53,877/.. The imports into Sind and Burma are not important.

The copper we receive is divided into cast, wrought, manufactured, manufactures of copper with other metals, and other sorts. Of these the first, second, and fourth are most important, and are received in considerable quantities. It is not considered

advisable to make a comparison of quantities and prices here, because in some cases the returns specify only the value, and the omission of quantity in such cases would vitiate any comparison that might be attempted. It should be noted here that in our returns for 1874-75 the head "copper" includes brass, but this article will be separately shown in the returns for 1875-76 and subsequent years.

Iron.

118. Iron also showed a material recovery in the year, the result of the tendency to lower prices in England, where of late years the price of iron had risen to such an extreme height as to considerably restrict the exports of the metal to this country. The value of our imports was in—

	£
1868-69	1,425,655
1869-70	1,144,447
1870-71	789,310
1871-72	817,606
1872-73	742,437
1873-74	773,727
1874-75	1,221,831

Thus, though the trade has materially recovered from the depression of the five years immediately preceding 1874-75, it is still a good deal below the imports of 1868-69. It is advisable to refrain from giving quantities as compared with prices in this case as in the case of copper, and for the same reason, viz., that for an extensive section of the import only values are specified in the returns. For iron imported during the year, valued at 300,000£, no quantities whatever are stated. The principal description of iron imported is that which is called "wrought, but not manufactured;" the import of this kind was valued during the year at 716,000£. nearly, against 416,192£. in the previous year. Manufactured iron (excepting anchors, cables, and kentledge, which are free and have already been noticed) stood for 220,090£, against 146,667£, and other sorts, not specified, were valued at 274,227£, against 205,203£. Cast iron comes to us in comparatively small quantities.

Of the total import value of iron, amounting to 1,221,831£, not less than 1,200,518£. was of British origin or came from England, leaving little more than 21,000£. for various other countries. Bengal and Bombay combined took the iron brought to India to the value of 1,037,293£, Bengal representing 552,207£. (against 363,384£. in 1873-74) and Bombay 485,086£. (against 292,034£.)—a large increase in both cases. Imports into Burma also show a large increase from 51,102£. to 86,687£. In Madras and Sind the increase was unimportant.

Efforts are now being made under the direction of Government to develop the production and manufacture of iron in India, where the metal occurs in considerable quantity in at least two places, Kumaon in the North-Western Provinces and Lohara in the Central Provinces. At Lohara especially, suitable conditions for extensive and profitable smelting operations seem to exist.

Lead.

119. The import of lead, except in the form of sheets for tea-boxes, when it is free of duty, is not important. The figures are subjoined:—

	£
1868-69	43,331
1869-70	44,943
1870-71	34,325
1871-72	32,381
1872-73	30,823
1873-74	11,280
1874-75	15,890

These figures show a small recovery from the reduction in the imports which commenced in 1870-71. Nearly all this lead is imported from the United Kingdom.

Quicksilver.

120. Quicksilver is also of no particular importance. For the five years ending in 1872-73 the average annual import was 237,410 lbs., worth 24,641£. In 1873-74,

143,027 lbs., valued at 14,303*l.*, and in 1874-75, 160,744 lbs., worth 16,120*l.*, were imported. Of this quantity Bengal took 106,608 lbs., and Bombay 52,257 lbs., these quantities being less in Bengal and more in Bombay than in the previous year.

121. The value of the total import of steel (cast and other sorts) in 1874-75 was ^{Steel.} 95,988*l.*, against 56,680*l.* in the previous year, and 78,638*l.* in 1872-73. In this article, also, a sensible recovery from depression is manifest.

122. Imports of tin were valued at 161,025*l.*, against 165,398*l.* in the previous year, ^{Tin.} the falling off being in the imports from the Straits (whence the bulk of our tin, extracted from the mines of Salang or Junk Ceylon and other places in the neighbourhood, is brought), having fallen from 129,287*l.* to 117,162*l.* On the other hand, the imports from the United Kingdom increased from 33,622*l.* to 40,899*l.* Imports into Bengal and Bombay fell off a little, while Madras and Burma show an increase. Under the head of tin have hitherto been included tinned iron plates, but these in future will be removed from this heading, and will be placed under that of iron, to which they properly belong. The value of the imports of tin for the last seven years was,—

	£
1868-69	146,075
1869-70	156,377
1870-71	141,742
1871-72	135,297
1872-73	85,497
1873-74	165,398
1874-75	161,025

Thus, the value of the tin imported in the year of report, though less than in 1873-74, was higher than in any of the previous years above mentioned.

A good deal of tin occurs in the Tenasserim division of British Burma, and the mines have been worked, though in an ineffective way, for some years by Chinese miners. But the unhealthiness of the locality, its comparative inaccessibility, and the absence of local means for the protection and subsistence of the work-people, present obstacles to the complete development of this source of industry.

123. The value of the import of zinc (or spelter or tutenague as it is indifferently ^{Zinc.} called) amounted in 1874-75 to 47,464*l.*, against 49,523*l.* in 1873-74, showing a further small reduction on the very large diminution which was shown by the figures of 1873-74 as compared with 1872-73, when the value of the imports was 121,917*l.* For the last seven years the values were,—

1868-69	192,805
1869-70	137,045
1870-71	122,205
1871-72	123,791
1872-73	121,917
1873-74	49,523
1874-75	47,464

Nearly all our zinc comes from the United Kingdom. The great falling off in the trade occurred in Bengal, which is the largest importer of zinc, imports having fallen from 93,714*l.* in 1872-73 to 33,787*l.* in 1873-74, and 28,395*l.* in 1874-75. Cast zinc constitutes the bulk of the imports under this head, and the reduction was chiefly in this article, the demand for which in the Calcutta market was very limited throughout the year.

124. The value of the imports of all kinds of metals, unenumerated and other than ^{Other kinds of metals.} those already specified, increased from 123,403*l.* in 1873-74 to 145,385*l.* in 1874-75, the average annual import for the five preceding years (1868-69 to 1872-73) having been 105,170*l.* All the provinces shared in the increase.

Oils.

125. The total value of the import of oils for the last five years was as follows:—

	£
1870-71	59,880
1871-72	59,544
1872-73	51,626
1873-74	67,448
1874-75	109,954

Mineral oil from the United States constitutes the largest part of the imports. The value of this oil amounted during the year to 79,807*l.*, against 35,127*l.*, 74,958*l.* representing the direct imports from the United States. The trade in this oil is subject to great fluctuations, dependent on the circumstances of the trade in America, which is of a speculative and uncertain character. The imports into India show a large increase in the last year, the consequence of unusual cheapness, which has induced larger consumption of an oil coming more and more extensively into use for illuminating purposes. In Calcutta this oil has now to compete to a certain extent with petroleum produced and refined in Burma, where it exists in large quantity, being imported thence under the name of "Rangoon oil." Bengal took most of the imports of American oil, and Bombay the bulk of the remainder.

The import of vegetable (non-essential) oils amounted to 26,185*l.*, against 27,425*l.* The chief consumer of these is Bombay. The trade seems to be declining, and considering that India is herself a large producer and exporter of oils of the same character, viz., linseed, rapeseed (or colza), and castor-oil, it is difficult to understand how the trade can be maintained at all. The United Kingdom and Ceylon are the principal sources of supply. The import of essential and other kinds of oil is quite insignificant.

Paints, colours, and painters' materials.

126. The value of these articles in 1874-75 was 136,821*l.*, against 118,003*l.* in 1873-74, showing a fair increase, though the amount is below the value of the import of 1872-73, viz., 148,482*l.* The trade on the whole seems to be satisfactorily increasing. Bengal and Bombay receive the bulk of the imports, which come mainly from the United Kingdom and China.

Provisions and oil-man's stores.

127. These include all kinds of provisions, except bêche de mer, butter, and salted fish, which are free. The trade is tolerably steady, and seems on the increase. The figures for the last five years are:—

	£
1870-71	292,873
1871-72	285,279
1872-73	315,045
1873-74	316,315
1874-75	309,749

The chief sources of supply are the United Kingdom, the Straits, and the Persian Gulf, though fairly large quantities are received from various other countries in Europe and elsewhere. The imports into Bengal for the year stood at 119,335*l.*, against 136,822*l.* in 1873-74, and into Bombay at 101,302*l.*, against 105,989*l.*

Railway plant and rolling stock.

128. The value of the importations of railway materials, notwithstanding the great advance in the price of iron of late years, is hardly a third of what it was some years ago, as will be seen by the figures attached:

	£
1868-69	1,591,813
1869-70	1,217,334
1870-71	1,466,068
1871-72	513,246
1872-73	327,465
1873-74	438,847
1874-75	521,152

Most of the lines of guaranteed railroad have now been completed, or nearly completed, and future imports will probably only consist of material required for the renovation of lines and rolling stock, their importance depending on the extent of damage done from year to year by floods and other causes. The importations on account of State lines are shown under the head of Government Stores. Madras takes the largest quantity of railroad plant now, that Presidency being practically the only one in which guaranteed lines are still under construction.

129. The average annual import of salt for the five years 1868-69 to 1872-73 was Salt. 5,402,318 cwt., valued at 787,575*l*. In 1873-74 it was 5,584,911 cwt., worth 835,354*l*., and in 1874-75, 5,541,691 cwt., valued at 755,771*l*. These figures show a reduction in price more than proportionate to the diminution in quantity. Nearly the whole of the imports are confined to Bengal and British Burma, the other provinces consuming salt of local manufacture. In Bengal, as compared with 1873-74, the imports of the year of report show a reduction from 5,107,119 cwt. and 784,178*l*., to 4,960,853 cwt. and 686,426*l*. In Burma, on the other hand, the imports show a large increase, having advanced from 474,822 cwt. and 50,174*l*. to 579,339 cwt. and 68,515*l*. The imports chiefly consist of Cheshire salt shipped from Liverpool, comparatively small quantities being imported also from the Mediterranean Ports, the Red Sea, and the Persian Gulf.

130. The value of these articles advanced from 27,995*l*. to 36,264*l*. in 1874-75. Shells and cowries. The average value of the imports in the five years 1868-69—1872-73 was 27,892*l*. They are imported mostly from the Persian Gulf, Africa, Ceylon, and the Maldives; Bombay taking the largest share. The imports into Bengal and Madras also are tolerably large. The large shells, or “chanks” as they are called in the trade (probably either a corruption of conch or *sankh*), are used as ornaments, and in connection with the religious worship of the Hindus. Cowries are largely employed for small change amongst the poorer classes, and especially in the rural districts, and also to a certain extent in the adornment of the person and the manufacture of native toys. There cannot be a stronger proof of the poverty of the mass of the people than the use of these small shells as currency.

131. A large and steady trade is carried on in the import of raw silk into India Silk, raw. from China and the Straits (the latter being mainly an entrepôt for Chinese silk), the Persian Gulf, and Ceylon. The bulk of the silk is consigned to Bombay, but British Burma also takes an important share. Every Burmese who can afford it will dress in silk garments in preference to cotton or wool, and this province is consequently always a large consumer of imported silk, (the local production not being extensive,) both in the raw and the manufactured state. The figures of the importation of raw silk for the last two years and the five years previous are attached:—

				Lbs.	£
1868-69	-	-	-	1,959,951	730,934
1869-70	-	-	-	2,016,726	901,117
1870-71	-	-	-	2,328,854	895,563
1871-72	-	-	-	1,799,591	651,595
1872-73	-	-	-	1,930,910	659,480
1873-74	-	-	-	2,282,758	786,914
1874-75	-	-	-	2,467,255	872,927

The quantity imported in 1874-75 was larger than in any former year of the period, though the average value was rather lower than it has been before. Bombay took 2,142,012 lbs. (value 768,777*l*.), showing an increase on the imports of the year before, viz., 2,019,507 lbs., worth 697,856*l*., and a more material increase on the imports of 1872-73, viz., 1,736,659 lbs., valued at 591,027*l*. The imports of Burma also increased from 198,323 lbs., worth 80,319*l*., to 244,705 lbs., worth 91,538*l*. Of the quantity imported into Bombay, 74,461 lbs., worth 30,098*l*., were re-exported.

Silk piece goods. 132. The trade in these goods is also large and increasing. In the last five years the value was :—

	£
1870-71	407,771
1871-72	440,674
1872-73	535,082
1873-74	588,626
1874-75	697,087

The largest source of supply of these goods is China, from which more than half the total quantity received during the year was imported; but the value of British and French silks imported from the United Kingdom was considerably larger than the Chinese goods, although the quantity was much smaller, the average quality being greatly superior. From France direct, from the Mediterranean Ports, and from the Straits we also receive a good deal of silk, though in much smaller quantity than the importations from England and China. Bombay and Burma consume most of the imports of manufactured as of raw silk, and both these provinces show an increasing trade. The value of the imports into Burma was in 1872-73 161,130/, in 1873-74 221,282/, and in 1874-75 290,616/. For Bombay the figures for the same years are 234,260/, 258,155/, and 306,680/, respectively. The imports into Bengal are much smaller, and the figures show a decreasing trade, viz., 130,728/, 100,899/, and 91,178/. A small proportion of the imports into Bombay is re-exported: the value of the re-exports in 1874-75 was 19,554/. The value of the silk re-exported from Bengal was 3,818/.

The trade in other silk goods, thread, mixed goods, &c. is unimportant.

Spices.

133. This seems to be a declining trade. The average imports for the five years ending in 1872-73 were :—

Cwt.	£
291,190	244,886

and in 1873-74 and 1874-75 :—

Cwt.	£
233,474	150,562
229,104	179,126

The various kinds of spices imported have not hitherto been separately enumerated in our returns, but the most important kinds will be specified in future. It is understood that some part of the increase in the value of spices during the year was the result of an extraordinary rise in the value of cloves, ensuing on the extensive destruction of clove plantations in Zanzibar (which now forms a main source of supply to the world of this article) by a hurricane. The imports into Bengal show a complete recovery from the depression of 1873-74, the value exceeding that of the imports of 1872-73. Bombay also shows a small increase on the previous year, though the imports are still far below those of 1872-73. Madras has fallen off considerably, and Burma shows a moderate increase.

Sugar.

134. This trade is subject to great fluctuations, influenced by Hindu superstition. In a year which the astrologers declare to be favourable for the celebration of marriages the demand for sugar to furnish forth the materials for the wedding feasts is extremely active, and it droops correspondingly when the religious authorities have arranged that marriages shall be prohibited in what they are pleased to call an unfavourable year. Other causes are also at work from time to time, such as a deficient harvest and high prices in Mauritius, whence the bulk of our imports is received. Bombay takes far the largest portion of the whole quantity brought to the country. The figures of the trade for the last six years are as follow :—

	£
1869-70 - - - - -	715,553
1870-71 - - - - -	555,801
1871-72 - - - - -	709,778
1872-73 - - - - -	440,146
1873-74 - - - - -	558,978
1874-75 - - - - -	515,857

The import of foreign sugar into India is much larger than the export of Indian sugar to foreign countries.

135. The import of tea seems to be gradually declining, as might indeed be expected, in proportion to the increasing production and local consumption of tea grown in India. The average value of the imports from 1868-69 to 1872-73 was 186,331*l*. In 1873-74 the import fell to 182,859*l*., and in 1874-75 to 169,982*l*. The values here stated are based on the tariff value, which is all that the Customs returns give; and this value being one rupee per pound, the quantities in pounds are almost exactly in every case ten times the values stated above. The main source of supply is China, either by direct importation, or in a smaller degree *via* the Straits, and Bombay is the largest consumer. In Bengal the import, strangely enough, has not fallen off as one might have expected, considering that Calcutta is the depôt for the teas of Assam and most of those of the North-western Provinces and the Punjab. The value of the imports in each year from 1869-70 was as follows: 18,054*l*., 17,976*l*., 52,559*l*., 66,289*l*., 53,748*l*., 39,338*l*. The figures of the import into Bombay, the principal consumer of foreign tea, are:—

	£
1869-70 - - - - -	129,473
1870-71 - - - - -	77,888
1871-72 - - - - -	123,610
1872-73 - - - - -	159,082
1873-74 - - - - -	109,252
1874-75 - - - - -	105,211

The market for China tea in Bombay last year was dull, and a quantity (upwards of 30,000 lbs.) for which no sale could be found was returned to China. The importations of tea into the other provinces are comparatively of no importance.

136. The trade in tobacco is tolerably steady. The value of the imports in the last five years has been:—

	£
1870-71 - - - - -	75,432
1871-72 - - - - -	88,493
1872-73 - - - - -	70,382
1873-74 - - - - -	71,406
1874-75 - - - - -	70,274

The principal importations consist of cigars from the Straits (these are Manila cigars) and China, and a smaller quantity from England, the latter being Havana cigars and German imitations of them. The importations of cake and cut tobacco from England and America are also extensive, and a fair amount of leaf tobacco is imported from Ceylon into Madras, and from the Straits into Burma. Of the cigars, Bengal takes far the largest portion, and from Calcutta they are distributed all over the provinces comprising the Bengal Presidency. Their consumption is almost entirely confined to the European population. There can be no doubt that if the the cultivation and preparation of tobacco in India were properly attended to, nearly the whole of the money paid to foreign countries for the annual importation of tobacco might be saved. Serious attention is now being given to the subject both by the State and private persons, and if the attempts which are being made in Bengal and Madras under private management, and which are about to be made on the part of the State in Burma, are judiciously persevered in, we shall probably in a few years have to record

a material decline in the import trade in tobacco, and shall be able to point to largely increased quantities and comparatively high rates of value under the head of our exports of the Indian-grown article.

Umbrellas.

137. During the last three years umbrellas have been imported in number as follows : 1872-73, 1,778,546 ; 1873-74, 1,169,717 ; 1874-75, 1,596,291. The recorded values for the last five years were :—

	£
1870-71 - - - - -	86,771
1871-72 - - - - -	124,130
1872-73 - - - - -	134,818
1873-74 - - - - -	90,246
1874-75 - - - - -	119,362

The largest proportion comes from the United Kingdom, whence the imports last year were valued at 87,931*l.*, against 71,257*l.* in the previous year. The imports into Bengal represented 67,574*l.*, against 55,146*l.* in the previous year, and into Bombay 30,150*l.*, against 23,481*l.* Importations into Burma were valued at 19,257*l.*, against 9,188*l.* The leaf umbrellas formerly used by the lower classes of Bengal are fast being superseded by English cotton umbrellas, at least amongst the urban population. Leaf umbrellas are very cheap, but very unsightly, and they rot and drop away away in one rainy season, while by the aid of elaborate patching a Bengalee makes a cotton umbrella last an amazing time. In Burma oiled paper umbrellas imported from the Straits are extensively used by the Chinese communities settled in various towns of the province, and also by the Burmese.

Woollen goods.

138. Of the other enumerated articles of import, woollen goods only require separate notice. The value of these articles, including piece-goods, braids, and other sorts, amounted during the year to 557,585*l.*, showing a large decrease on the imports of 1873-74, which were worth 668,911*l.* The imports in that year again were less than in 1872-73, when they were worth 719,530*l.*, but this was a large importation which followed on very low shipment for three successive years, and these again were preceded (in 1868-69) by a higher value than has since been reached. The trade is always subject to fluctuation, a large import in any year glutting the market for a considerable time afterwards. Bengal and Bombay consume the greater part of the woollen goods imported, most of which are supplied by England.

Articles imported
by post.

139. The establishment of the overland parcel post has been followed by a considerable import of articles imported in that way. Our returns do not at present specify the nature of the articles thus imported, but it is hoped that some idea of the contents of the parcels may be furnished in the accounts of the current year. The value of these articles is stated to have been 14,588*l.* in 1873-74, and 48,252*l.* in the past year, of which 7,352*l.* represented articles free of duty, and 40,900*l.* articles subject to duty. The item appears in the accounts of the Bombay Presidency only, the parcels being delivered there by the Peninsular and Oriental Company, and checked by the Customs authorities.

SECTION III.

EXPORT TRADE.

140. It seems needless, after the remarks which have already been made in several places in the two preceding sections, to enter into any details of the re-export of foreign goods. The trade is of no great importance, either absolutely or relatively, and though the list of articles is tolerably long, there are only two classes of goods, cotton manufactures and metals, which are of large value, and these have already been noticed in dealing with the imports of these goods. The largest portion of the re-export trade is carried on between Bombay and the Persian Gulf, the Red Sea, and the African coast. The value of the total trade under all heads is represented by the following figures :—

	£
1868-69 - - - - -	1,385,932
1869-70 - - - - -	1,791,831
1870-71 - - - - -	1,780,144
1871-72 - - - - -	1,488,622
1872-73 - - - - -	1,787,112
Average of these five years - -	1,646,728
1873-74 - - - - -	1,846,358
1874-75 - - - - -	1,811,166

The establishment of direct communication between Zanzibar and Europe, by mail steamer *via* Aden, and the existence of the direct trade which has recently sprung up between the Persian Gulf and England, will probably tend to diminish the importance of Bombay as a dépôt for goods imported into and exported from these countries.

141. Articles of Indian produce and manufacture will be dealt with, like the imports, under the heads of free and dutiable. The total value of the exports in both classes amounted to 54,501,080*l.*, which sum was larger than the value of the exports in 1873-74 by 1,386,661*l.*, or 2·61 per cent. This sum was also in excess of the average of the exports for the five years previous to 1873-74 by 292,067*l.* The value of free goods exported during the year amounted to 41,901,356*l.*, against 39,574,095*l.*, which sum was the value of the free exports in 1873-74, showing an increase of 5·88 per cent. The value of dutiable goods was 12,599,724*l.*, against 13,540,324*l.* in 1873-74, showing a reduction of 940,600*l.*, or 6·94 per cent. By the new tariff of last August all exports of Indian goods, with the exception only of indigo, rice, and lac, are free of duty.

142. The most important articles in this class are: animals (living), borax, caoutchouc, coffee, coir, cotton (raw), dyeing and colouring materials (other than indigo), wheat, gums, and resins, hemp (raw), hides and skins (raw), and horns, jute (raw and manufactured), opium, provisions and oilman's stores, saltpetre, silk (raw and manufactured), jadestone, sugar and other saccharine produce, tea, tobacco, wool (raw and manufactured).

143. This is a steadily increasing trade. The average value of the exports for the five years preceding 1873-74 was 49,574*l.*, in that year 74,869*l.*, and in 1874-75 77,709*l.* Most of the trade consists in the export of cattle from Madras to Ceylon.

144. Borax (biborate of soda) is classed in our returns as an article of Indian produce, though in reality it does not occur at all in this country, being imported across the Himalayas from Thibet and Ladakh. In commerce two kinds of this article are known, the refined article, which is called *borax*, and the partially refined, which is called *tincol*, one of the native names for the product. In its crude state,

natives call it *sohága*. Most of the borax exported from Bengal is brought down from the place of production to Patna, where it undergoes a refining process before despatch to Calcutta. The two commercial classes are undistinguished in our returns. The price of borax at the port of shipment is subject to much variation, dependent both on the supply and on the demand. It may happen that stocks will be abundant in Calcutta, whence nearly all the exports of borax are shipped, and yet prices will rise if there is a large demand in Europe or Eastern Asia for it. Or it may be that stocks are very small, but if the demand is temporarily limited, prices will fall considerably. The borax we send from India has a competitor in Tuscan borax, and the circumstances of the trade in that article probably determine to a certain extent the price and quantity exported of Indian borax.

The export of 1873-74 was larger than in any of the five years preceding, having amounted to 19,043 cwt., and the average price was higher, the value of the exports having been 55,897*l.*, or about 58*s.* 8½*d.* per cwt. In 1874-75 the export was lower than in any of the preceding six years, having fallen to 8,604 cwt., and the average price was much lower than in 1873-74, the value of the exports having been 22,161*l.*, or about 51*s.* 6*d.* per cwt. The average exports from 1868-69 to 1872-73 were 15,628 cwt., valued at 35,300*l.* Prices have risen considerably since 1872-73, and have maintained a high level, though with great fluctuation. Most of the borax sent from India is taken by England, the Straits, and China.

Caoutchouc (raw). 145. The trade of 1874-75 was somewhat less than in the previous year, and still less than in 1872-73, the supply of the market of shipment being somewhat uncertain under the conditions in which the rubber is collected by jungle tribes. In the Forest Department measures are now in progress for the propagation of the *Ficus elastica* and other rubber-producing trees in Assam and Burma. Both these provinces present favourable conditions for the profitable production of caoutchouc on an extensive scale. In Upper Burma large tracks are covered with rubber-producing trees, and under better conditions of administration the supply might at once be greatly increased.

The exports from Bengal are much larger than those from Burma. All the caoutchouc brought down to Calcutta is produced in Assam. Dealers in the article find it necessary to be careful in testing their purchases. The rubber is brought to Calcutta in large balls, which, instead of consisting as they should of solid gum, are sometimes found to be a collection of stones and rubbish enveloped in caoutchouc. The rule is to cut through all balls before payment. These frauds are probably committed by, or under the direction of, the Bengalee dealers who purchase the rubber from the primitive tribes by whom it is collected in the forests. The extent of the trade for the last seven years will be seen from the following figures:—

	Cwt.	£
1868-69 - - - - -	7,219	31,594
1869-70 - - - - -	6,584	25,372
1870-71 - - - - -	9,006	36,716
1871-72 - - - - -	15,638	78,646
1872-73 - - - - -	21,571	143,760
Average of the five years - - - - -	12,003	63,217
1873-74 - - - - -	16,837	117,775
1874-75 - - - - -	15,893	108,645

The trade is shared by Bengal and Burma, by the former in much the larger proportion. The exports from Bengal fell off during the year from 16,255 cwt., worth 115,754*l.*, to 13,938 cwt., worth 96,492*l.* The exports from Burma, on the other hand, increased from 582 cwt., worth 2,020*l.*, to 1,954 cwt., worth 12,104*l.* The export trade from Burma only commenced, in appreciable quantity, in 1873-74.

All or nearly all the caoutchouc exported from this province is produced in Upper or Independent Burma.

146. The production of coffee is confined almost entirely to the Madras Presidency, the Native State of Travancore, Mysore, and Coorg. The fluctuations of the trade, which are often considerable, are to be explained by the deficiency or abundance of crops, according as the season is unfavourable or the reverse. Crops have often been materially affected, too, by the ravages of the "borer" (the larva of a coleopterous beetle, the *Xylotrechus quadripes*), by rot, as well also (and this a large element in the influences which have from time to time affected injuriously the outturn of the crops), by the want of knowledge of proper conditions of culture on the part of those engaged in the cultivation, both European and Native. The industry has been long established in Southern India, and Europeans have engaged in it for upwards of forty years. The cultivation has now settled down into a steady and prosperous industry, in which natives are largely occupied as well as Europeans, but, like tea, before attaining this last stage, it went through all the phases of wild speculation. From 1860 to 1863 or 1864 there was quite a mania for the cultivation of coffee. Land was bought recklessly, without regard to its suitability, cleared and brought into cultivation at enormous expense, and, in many cases, ruinous loss ultimately. Great sums of money were wasted in this speculative period, which was followed by the inevitable reaction and depression. This period has long passed, and planters understand now that, while they cannot hope for the visionary profits of which they were formerly assured, the cultivation of coffee is, with care and intelligence, a steady and prosperous support to those engaged in the industry.

147. The average annual exports of coffee from India since 1850 are shown below in five periods of five years each :—

	lbs.	£
1850-51 to 1854-55 -	7,813,602	94,974
1855-56 to 1859-60 -	8,274,183	135,263
The figures for quantity for this period are not quite accurate, the quantity exported in 1856-57 not being stated in the returns.		
1860-61 to 1864-65 -	24,162,260	555,652
Speculative excitement reached its height in this period.		
1865-66 to 1869-70 -	33,879,096	784,727
1870-71 -	33,459,426	800,090
1871-72 -	56,363,838	1,368,949
1872-73 -	41,462,705	1,128,549
1873-74 -	40,815,038	1,491,411
1874-75 -	34,925,063	1,305,335

As compared with the year 1873-74, the exports last year fell off in quantity, though their relative value was larger. Of the total quantity exported, about $33\frac{3}{4}$ million pounds went from Madras direct, and 1,184,000 *via* Bombay. The United Kingdom is our largest customer for coffee, $19\frac{1}{4}$ million pounds having gone thither during the year. France took upwards of 13 millions, Turkey in Europe more than three quarters of a million, more than a million went to the Persian Gulf and Red Sea, and nearly 350,000 pounds to the Mediterranean Ports. The balance was sent in smaller quantities to various other countries.

148. The quantity and value of the exports during the year were 152,745 cwt. and 137,280£, against 162,576 cwt. and 153,371£. in 1873-74, there having thus been a slight decrease. The average of the three preceding years was 137,891 cwt. and 126,655£. Madras exports the bulk of our coir, 116,659 cwt. having been the share of that Presidency, this amount being rather less than in the previous year. Bombay exported 31,835 cwt., showing a much larger reduction proportionately on the exports of 1873-74. Most of the exports are taken by the United Kingdom,

Ceylon, the Straits, the Red Sea, and Persian Gulf; Mauritius and some other countries also take small quantities.

Cotton (raw).

149. The figures of the exports of this important staple since 1850-51 are appended, as far as they are discernible in the returns :—

Year.	Quantity in lbs.	Value in £
1850-51	-	3,474,789
1851-52	-	3,619,989
1852-53	-	3,629,494
1853-54	-	2,802,150
1854-55	-	2,428,764
1855-56	-	3,314,951
1856-57	-	4,437,949
1857-58	-	4,301,768
1858-59	-	4,094,100
1859-60	-	5,637,624
1860-61	-	7,342,168
1861-62	-	10,203,470
1862-63	-	18,779,040
1863-64	-	35,864,795
1864-65	-	37,573,637
1865-66	-	35,587,389
1866-67 (11 months)	-	16,458,277
1867-68	-	20,092,570
1868-69	-	20,149,825
1869-70	-	19,079,138
1870-71	-	19,460,899
1871-72	-	21,272,430
1872-73	-	14,022,858
1873-74	-	13,212,241
1874-75	-	15,257,342

The largest quantity exported was in 1871-72, but the highest value was reached in 1864-65, when the exports were worth more than $37\frac{1}{2}$ millions sterling, being at the average rate of 16·94*d.* per pound. After that year, the value of Indian cotton fell rapidly, as supplies from the United States were resumed. In 1870-71 Indian cotton was worth on an average 8·08*d.* per lb.; in 1871-72, 6·30*d.*; in 1872-73 prices slightly advanced, cotton being worth 6·80*d.* per lb., but they fell again in the next year to 6·29*d.*, and in the year of report Indian cotton was worth no more than 5·83*d.* per lb. all round. These figures represent the average price of Indian cotton at ports of shipment in India, and are calculated on the basis of the values given by exporters. There is of course considerable difference between the quality and value of cotton in Bombay and Calcutta, and moreover the recorded values must be considered as being subject to certain modification, owing to the system of accepting exporters' declarations of the value of free goods without examination. But the figures are good for comparison, and as proving that the abundance or otherwise of cotton exported from India has very little effect on ruling prices here. Prices in the Indian market are regulated by the prices in England, and these depend largely upon the prospects of the cotton crop in the United States from time to time. If there is a prospect of abundant supplies from America, Indian cotton falls in price at once in England, and becomes dull of sale, and prices in India are immediately affected. When it seems likely that the American outturn will be below the average, Indian cotton looks up in England, and prices immediately rise here, often disproportionately, for the trade is of a very speculative character.

The quantity of the exports from year to year fluctuates, *firstly* and mainly, with the demand from foreign countries, *secondly*, but in a smaller degree, with the average outturn of the crops, and, *thirdly*, with the comparative lowness or otherwise of

freights. Probably even in a bad year, so large is the area now under cotton, India could supply as much cotton as was exported in 1871-72. But it does not necessarily follow that, in these days, a diminution in the quantity exported is a diminution in the wealth of the cultivator, for there is a large and growing demand for cotton at remunerative rates for local consumption in the cotton mills as well as in the hand-looms, which still in many rural districts constitute a quiet but flourishing industry.

150. Our chief customer is still the United Kingdom, which takes quite two-thirds of the total exports, but of this from 50 to 60 per cent. is re-exported from England to Continental Europe, where Indian cotton is regarded with more favour than in the English manufacturing districts. English machinery was originally adapted to the treatment of cotton of longer staple than the Indian fibre, and as long as manufacturers can obtain a supply sufficient for their purposes of the longer stapled American, Egyptian, or Brazillian cotton (of which not more than 9 or 10 per cent. of the imports into England are re-exported), the Indian fibre is regarded with disfavour. In some cases, indeed, cotton operatives have refused to work with Indian cotton, as being too troublesome to manage. This is not the case on the Continent, where mills exist possessing machinery specially adapted to the treatment of short-stapled cotton, and in these quarters there seems to be a growing demand for our staple. While more than half the cotton sent from India to England is again shipped off to the Continent, an increasing direct trade between India and the States of Continental Europe (France, Germany, the Mediterranean Ports, and Russia) is becoming manifest.

151. The total exports during the year exceeded those of the previous year by 123,243,441 lbs. in quantity, and 2,045,101*l.* in value, or 24·45 per cent. in quantity, and 15·48 per cent. in value. Far the largest quantity is exported from Bombay, to which port is brought for shipment the cotton produced in the cotton-growing districts of that Presidency, as well as the produce of Berar, the Central Provinces, and Central India. The season was favourable in these provinces, the outturn from an increased acreage was abundant, and the exports larger than at any time during the previous six years. From these provinces there were exported during the last season, commencing in October and ending in May, 122,033,128 lbs., being 3,186,176 lbs. in excess of the exports of the previous year. Of this cotton all but 1,364,000 lbs. was sent to Bombay, whence the greater portion was shipped. A part of the shipments is recorded in the accounts under review, but the remainder will appear in the accounts for 1875-76. These figures, as well as those which follow, show the undiminished activity of the cotton industry in the Central Provinces and Berar. They are taken from a report addressed to the Bombay Chamber of Commerce by Mr. A. J. Dunlop, Assistant Commissioner in charge of Cotton Statistics, Central Provinces and Berar (No. 1796, dated 17th June 1875):—

Year.	Acreage under Cotton in Central Provinces and Berar.		Export of Cotton from the two provinces.	
			lbs.	
1868-69	-	2,037,617	-	106,345,288
1869-70	-	2,239,813	-	83,232,576
1870-71	-	2,316,363	-	96,473,944
1871-72	-	2,176,589	-	42,961,240
1872-73	-	2,410,435	-	95,721,696
1873-74	-	2,649,992	-	118,846,952
1874-75	-	2,717,362	-	122,033,128

From the Bombay Presidency the exports during the year amounted to 510,364,362 lbs., valued at 12,833,579*l.*, being 81·38 per cent. of the total quantity, and 84·11 per cent. of the total value of the exports from the whole of India. The cotton of Western India is better than any other cotton produced in the country, and commands a higher value. The exports from Bombay show a considerable increase (amounting to nearly

112 million pounds in quantity, and 1,951,110% in value) over the exports of the previous year, and a still more considerable increase over the exports of the year 1872-73. Nearly the whole of the increase in the total trade occurred in fact in Bombay.

Madras follows Bombay (but a long way behind) as an important cotton-exporting province. During the year there were exported 77,550,625 lbs., valued at 1,569,781%., against 59,184,907 lbs., worth 1,238,536%., in 1873-74, the increase on the trade of that as well as of the previous year being satisfactory. The cotton exported from Madras is all produced in that Presidency.

Bengal holds the third place in the export of cotton, at a considerable distance behind the two other Presidencies. The exports during the year amounted to 25,090,185 lbs., valued at 523,699%., against 33,527,312 lbs., valued at 776,779%., in 1873-74—a heavy decrease of nearly $8\frac{1}{2}$ million pounds in quantity, and 253,080% in value, and this decrease followed on one more serious, the exports of 1872-73 having exceeded those of 1873-74 by more than 46 million pounds in quantity, and a million sterling in value. The cotton exported from Bengal is the produce of Northern and North-Western India, which is brought down the valley of the Ganges to Calcutta. The Lower Provinces of Bengal produce scarcely any cotton except what is required for local consumption, and not even enough for that, the soil being covered with rice, jute, and other produce yielding more profitable returns than cotton of the very poor quality which grows on Bengal soil can afford. The crops in the North-Western Provinces have not lately given favourable outturns, and the area of cultivation has been rather restricted. The quality of the fibre which is exported from Calcutta is very poor, much inferior to that which is produced in the “black cotton soil” of the Bombay Presidency, Berar, and the Central Provinces, and its price in the markets of consumption is comparatively much lower. Prices have fallen so low in fact, owing to the abundant supply of the English market with better cotton at reasonable rates, that exportation from Calcutta, after payment of all the charges of transport down to Calcutta from the places of production, can hardly yield a fair profit except in the trade with China, and in a lesser degree with Continental Europe. The export of cotton from Bengal to the United Kingdom has fallen off enormously, and seems on the road to extinction. On the other hand, there is an increasing demand for local consumption in the Calcutta cotton mills, and in the two which exist at Cawnpore.

The exports of cotton from Sind and Burma are comparatively unimportant. The exports from Sind will, perhaps, increase on the completion of the Indus Valley (State) Railway, which will probably make Kurrachee the port of shipment for much of that portion of the Punjab cotton crop which now finds its way to Calcutta, while the provision of this additional means of communication may perhaps induce the cultivation of cotton over a larger area.

152. Of the total exports, upwards of $438\frac{1}{2}$ million pounds, valued at 10,651,000%., were sent to the United Kingdom. France took 84,366,000 lbs., worth 2,109,731%.; the Mediterranean Ports 67,504,936 lbs., worth 1,598,924%.; China 17,650,614 lbs., worth 439,470%.; Russia 9,180,444 lbs., valued at 229,432%.; Germany 7,115,192 lbs., worth 177,324%.; and the balance went in smaller quantities to Ceylon and other countries. The trade with all the countries in Continental Europe mentioned above shows a large increase. Most of the trade was with Bombay, and the Commissioner of Customs in that Presidency refers to it in the following terms: “Continental stocks were allowed to fall very low towards the end of 1874, the prevailing idea being that prices could not fail to give way further in January, February, and the early spring months, but when the American receipts began to manifest signs of a permanent falling off, an entire revulsion of feeling took place, and a largely increased business was done with foreign nations at prices very much better than those ruling in Lancashire. Russia and France indented largely for Indian cotton on this account.” * * * It may be added that the season was favourable and early, and the

“ outturn larger, and that the popularity of the Indian cotton on the Continent seems increasing. Many mills, which during the cotton famine adapted their machinery to its use, have continued to employ it.” (*Introduction to the Annual Statement of Trade and Navigation for the Bombay Presidency for 1874-75.*)

It cannot be expected, nor is it to be hoped, that Indian cotton will again be the subject of the frantic speculation which marked the era of the “cotton famine” in England, resulting from the interruption of supplies from the United States during the rebellion of the Southern Confederacy. Such prices as were then obtained will not again be realised, but there is a wide outlet at reasonable profits for all good Indian cotton which can be produced within easy distance from the coast. What will not be taken by England will be taken by other countries in Europe and in Asia, and local manufacture will consume what is not wanted for export. On the whole, the prospects of the Indian cotton trade, except in Bengal, are by no means gloomy.

153. Lac dye was freed from export duty on the 27th November 1874. The trade returns having shown a progressive decline in the exports of this article for years past, both in quantity and in value, it was considered that the export duty, which was fixed at a time when lac dye bore a comparatively higher value than shell-lac, pressed very heavily on producers, whom an enormous reduction in prices of late years left with large unsaleable stocks on their hands. It must be remembered that the manufacture of lac dye is always combined with that of shell-lac, the dye being the colouring matter contained in the body of the insect whose resinous excretion is converted into the shell-lac of commerce. In the process of the manufacture of shell-lac it is necessary to eliminate the dye, and having thus obtained the liquid dye separately, it is almost as cheap to let it solidify into cakes as to throw it away. These cakes were formerly an important article of commerce, and worth more to the manufacturer than his shell-lac. Now, however, the position of the two articles is reversed. As shell-lac went up in price, the result of a constantly increasing demand, lac dye went down, until the dye was made merely because it was necessary to make it before shell-lac could be made. The cause of the decline in the demand for the dye and its consequent reduction in value is to be found in the competition of cochineal from Mexico, and of the aniline dyes which now form an important industry in Europe. Considering all these facts, the Government of India decided that it was not fair to weight producers of lac dye with an export duty of 4 per cent. on a tariff value representing about six times the actual value of the article, and the duty was taken off. The remission gave an impulse to the trade, stimulating exports for a short time, but it has since fallen back into a stagnant condition, whence it is doubtful whether it will emerge, for even if the formidable competition of cochineal should from any cause abate, there is an increasing opposition present in the manufacture of aniline dyes. The export of lac dye during the year amounted to nearly 8,379 cwt., valued at 37,602*l.*, but this was about the tariff value, and was much in excess of the real value. The quantities exported in previous years, commencing with 1868-69, were :—

	Cwt.
1868-69 - - - - -	17,748
1869-70 - - - - -	19,557
1870-71 - - - - -	12,500
1871-72 - - - - -	17,437
1872-73 - - - - -	10,507, and
1873-74 - - - - -	9,902

Lac dye is all exported from Calcutta, which practically possesses the monopoly of the lac trade.

154. The trade in Indian dyes, unspecified and included under this general heading, fluctuates considerably, as will be seen by the following figures. Indigo is not included in this head; it will be treated as a separate item, amongst articles subject to duty.

Dyeing and colouring materials.

Dyeing and colouring materials, other sorts.

	Cwt.	£
1870-71 - - - -	242,379	204,937
1871-72 - - - -	392,017	242,379
1872-73 - - - -	526,258	251,662
1873-74 - - - -	271,567	158,474
1874-75 - - - -	458,447	203,620

There has thus been a very great reduction in value of late years, the result of a falling off in prices of most of our Indian dyestuffs, which are now subject to active competition with aniline dyes. The kinds included under this general head are madder or manjit, safflower, sapan-wood, myrabolams, &c. In the reports of future years they will be treated separately, and a work on the subject of Indian dyes is now in preparation in this Department, in which the production and trade will be fully dealt with.

Grain and pulse : 155. Wheat was freed from duty in January 1873, for the reasons stated in the wheat. review of the trade for 1873-74, and the trade at once expanded to a surprising degree, as will be seen from the following figures :—

	Cwt.	£
1870-71 - - - -	248,522	103,833
1871-72 - - - -	637,099	235,644
1872-73 - - - -	394,010	167,690
1873-74 - - - -	1,755,954	827,606
1874-75 - - - -	1,069,076	490,435

In 1874-75 there was a contraction of trade, the quantity exported having fallen to 1,069,076 cwt., valued at 490,435£. Wheat is an article the trade in which cannot be maintained at a very high level save under exceptional circumstances. The best wheat-growing districts in India are remote from the coast, and the cost of transit to the ports of shipment is so great that export becomes profitable only when there are failures in crops elsewhere, and a sensible rise in ordinary prices. Such a rise occurred in 1873-74 in the European markets, and the remission of the duty enabled Indian wheat to compete advantageously with the produce of other wheat-producing countries. In 1874-75 prices fell to such an extent that large quantities of wheat available for shipment remained in the districts, because prices were actually higher there than those current at Bombay. Intelligence of expected short crops, such as was recently received from England during the floods, imparts activity to the trade, which immediately returns to a comparatively dull position on the announcement of a slight fall in prices. The remission of the duty, however, was in fact the removal of a prohibition of export, for as such the tax practically operated on an article the margin of profit on which must always be small; and though the trade may not continue to expand at the extraordinary rate manifested immediately after the removal of the export duty, it will probably maintain the level it has now reached, and may, with the development of cheap and easy communications between the coast and the interior, show steady and gradual further progress. A reduction of carrying rates on the railways would probably materially assist the trade, and the Chief Commissioner of the Central Provinces strongly urges the construction of a railway through the Chattisgarh country, to provide an outlet for the enormous stocks of food grains now produced in that tract, and allowed to accumulate and spoil there, because there are no means of removing them at remunerative rates to places where they are wanted.

Of the total quantity of wheat exported, 633,681 cwt. were shipped from Bombay, and 143,144 cwt. from Sind, Bombay showing a very large increase, while the exports from Sind fell off materially. From Bengal also exports fell off largely (from 513,875 cwt. to 280,530 cwt.) The wheat exported from Bengal is grown in Behar and the North-Western Provinces. From Madras and Burma exports of wheat are insignificant, these being mainly rice-growing countries.

Shipments to the United Kingdom fell off from 1,358,092 cwt. to 399,492 cwt. On the other hand, France took 259,359 cwt., against 27,614 cwt. in 1873-74. Exports to the Mediterranean ports (chiefly to Trieste) increased from 18,797 cwt. to 152,318 cwt. This is a new trade. The rest of the exports was sent chiefly to Mauritius, Réunion, the Red Sea, and Aden, Ceylon, and the Straits.

156. Cutch or catechu (*terra japonica*) and gambier are commercial terms for much the same article, most of which is exported from Burma, Burmese cutch being more esteemed in the markets of consumption than other Indian qualities of the gum. The figures of export for the last five years are—

Gums and resins :
Cutch and gambier.

	Cwt.	£
1870-71 - - - -	170,044	131,715
1871-72 - - - -	158,582	116,778
1872-73 - - - -	278,965	196,147
1873-74 - - - -	164,622	118,507
1874-75 - - - -	191,891	147,889

From Burma were exported 151,588 cwt., valued at 112,251*l.* during the year, against 112,352 cwt., valued at 75,106*l.* in 1873-74. The very large exports of 1872-73 had caused great accumulations of the gum in the English market, and in 1873-74 there was a considerable falling off in the trade, but the figures of the year of report show a sensible recovery. A good deal of Burmese cutch comes down from Independent Burma, and the trade is obstructed by the heavy duties levied by the King's officials. The exports from Bengal amounted to 39,399 cwt., worth 34,261*l.*, against 48,105 cwt., valued at 36,695*l.*, in the previous year. Exports from Madras also fell off materially. The chief consumers are the United Kingdom and the United States.

157. Hides (raw), *i.e.*, hides of oxen and buffaloes, form a steady article of export. The average number of hides (raw) exported annually in the four years ending 1873-74 was 7,738,208, valued at 1,788,883*l.*; in that year they were 6,829,938 in number, worth 1,840,755*l.*; and in the year of report the number of raw hides exported was 7,117,889, valued at 1,981,982*l.*, both quantity and value being in excess of the exports of 1873-74. The chief seat of this trade is Calcutta, whence 6,518,615 hides, worth 1,853,222*l.*, were exported during the year, these figures showing a very large increase over the exports of the previous year, which were 5,852,215 hides, valued at 1,622,416*l.* The increase was probably the result of the mortality amongst plough-cattle in the drought of 1873-74. The trade is in the hands of a few Mahomedans (Hindus will not deal in hides by reason of religious prejudices), and some of these men are very weathy, for the trade is highly profitable. They purchase hides from *chamars*, one of the lowest classes of the people, who go about the country skinning dead cattle, and reap a rich harvest in bad seasons. It is well known that this is an unscrupulous class of men, who do not hesitate systematically to poison cattle while feeding in the pastures for the sake of the hide, which is abandoned to them. Cattle-poisoning by this class is in fact a profession to which the attention of the authorities has long been directed with a view to its suppression, but with little effect as yet. The most effectual remedy for the evil lies in the hand of the Hindu agriculturist himself. If he can be made so far to overcome his religious prejudices as to render the hides of such of his oxen as he suspects to have died a violent death useless for the purpose of the *chamar*, which he can do by slashing the hide in three or four places, thus rendering it unmerchantable, poisoning will be found an unprofitable occupation. The export trade will fall off no doubt, but this is not to be regretted. Living cattle are more wanted in India to plough the fields than the money obtained for their hides. A considerable proportion of the eight million head of cattle whose hides (raw and dressed) are exported from India every year die from preventable causes, such as neglect (for the ryot is not careful of his cattle), drought, murrain, and poison, and these beasts represent an actual loss to the country which outweighs the value of the whole number of hides put together.

Hides and skins.

Next to Bengal, Burma occupies the most important place as an exporter of raw hides. The largest quantities are taken by the United Kingdom, the Mediterranean ports, America, and France.

Skins (raw) also are largely exported. They amounted last year to 3,291,733 in number, valued at 190,473%. For these the United States is much the largest consumer.

Jute, raw:

158. The progress of the trade in jute for the last twenty-five years will be seen by the figures appended:—

		Cwt.	£

It will be noticed that there have been violent fluctuations from time to time. The trade, in fact, has always been of a more or less speculative and uncertain character. Enormous profits and equally enormous losses have succeeded each other in various seasons. People rushed into the business, possessing no capital and but little credit, and by skilful financing buoyed themselves up for a time. Encouraged by high prices obtaining temporarily in the European market for various reasons, they exported shipload after shipload of jute in a reckless way. The result of these operations was generally a rise in local prices to a level higher than English prices. For a short time the market remained inflated, then with glutted warehouses and large expected stocks on the way, the bubble burst and prices fell in Europe to a level involving ruinous loss. The speculator vanished from the scene, either through the

open doors of the insolvent court, or silently round the corner. The ryot whose heart had been gladdened by the rupees he had received for his jute, and who had consequently sown with jute for the next season a largely increased breadth of land in the hope of a maintained demand, was left lamenting, for nobody came to take his jute (at profitable rates), and it was in many cases actually thrown away. The following season perhaps enthusiasm revived, and though the riot had sown a smaller surface with jute he received higher prices than ever. Such was the history of the jute trade in Bengal for many years after 1860, when speculative excitement began, and until very recently. Indeed, the trade is still somewhat of a speculative character, though much of the excitement of speculators in Calcutta has been transferred from the raw material to the shares of companies established on the limited liability principle for the local manufacture of jute. On the whole, notwithstanding occasional disappointment, the jute trade has brought a wide and steady stream of wealth to the Bengali cultivator.

159. The exports of the year of report were much less than in 1873-74 in quantity, but the average value was about 2s. 6d. per cwt. higher. Business was done with great activity and at extremely high prices on the arrival of the new crop in Calcutta in August and the following months. But the English market was dull and drooping, prices being a good deal lower than in Calcutta, and business rapidly fell off. Transactions were subsequently restricted by the range of freights and the prices asked by holders of stock, who were very firm, the demand for local consumption in the mills enabling them to resist the call for lower prices made by exporters.

The cultivation of jute is almost entirely confined as yet to the Lower Provinces of Bengal, and chiefly to the Eastern Districts. Of the total quantity exported during the year, all but 3,166 cwt. was shipped from Bengal, of which province jute is now a main industrial staple. The principal consuming countries are the United Kingdom, the United States, and France. The exports to the United Kingdom fell from 5,296,723 cwt. in 1873-74 to 4,581,436 cwt. in 1874-75. The quantity sent to the United States, on the other hand, increased from 717,688 cwt. to 835,806 cwt. This quantity was much less than the shipments of 1871-72 and 1872-73, but those years seem to have been years of overtrading and excessive speculation in jute. The figures of export to the United States since 1868-69 are as follows:—

	Cwt.	£
1868-69	365,276	161,218
1869-70	338,267	155,578
1870-71	477,448	274,034
1871-72	1,040,527	516,695
1872-73	1,466,613	551,619
1873-74	717,688	231,334
1874-75	835,806	310,240

A good deal of the jute sent to the United States consists of the butt-ends of the fibre, which are cut off when the jute is pressed into bales. These are called "cuttings" in Calcutta, and, with "rejections," now form a regularly quoted article of export to America, where they are employed in the fabrication of various "shoddy" stuffs. In former years these cuttings were thrown away. Bengal is now threatened with serious competition in the cultivation of jute by the Americans, who declare that in Louisiana and other Southern States, and throughout the valley of the Mississippi, they can and mean to grow better jute than has ever been produced in the Gangetic delta. As yet the cultivation seems to be quite in its infancy, and, indeed, hardly out of the experimental stage; but if the States of the Union take to the matter seriously, the Bengali cultivator must make up his mind to face a very formidable competitor, whom he cannot hope to distance unless he sets to work greatly to improve the quality of his produce by ameliorated methods of culture and greater care in the processes connected with the separation of the fibre and its preparation for the market.

The trade with France shows some reduction, having fallen from 86,026 cwt. to 58,839 cwt. Jute in France is required for the consumption of spinning mills at Dunkirk, and a good deal is imported from England in addition to that which is imported direct from Calcutta. Of course with the raw material in England worth actually less than in Calcutta, our direct trade with France during the year had but little chance.

Jute manufactures:
Gunny bags.

160. In England, America, and France jute is manufactured into various articles of clothing, carpets, &c., the jute being mixed with cotton or wool or silk, and it is also made into coarse sacking. In India the manufacture is as yet confined to sacking, known in commercial circles as gunny bags and cloth, and to rope and twine. Of cordage the manufacture is limited, but the manufacture of bags and cloth has taken great developement within the last few years, power-looms having to a material extent taken the place of the old hand-looms. There are now in and about Calcutta ten jute spinning mills, working with capital subscribed on the limited liability principle, the total amount of capital being not much short of a million and a half sterling. These mills employ about 2,500 looms. There are also two mills belonging to private proprietary, and it is believed that others will soon be started. It is stated that altogether there are now in Bengal about 3,900 looms worked by steam-power, and at the present moment orders are abundant, and the mills are working full time. The establishment of these mills has given rise to much unhealthy excitement in Calcutta in connection with transactions in shares, and periods of inflation have been followed by gloom and depression; but confidence is expressed by competent persons in the future of this manufacturing industry, for it possesses all the elements of success. So hopeful are the prospects of jute manufacture on the banks of the Hooghly, that one of the Dundee millowners has recently closed his mill there, and transferred his machinery to India, to be set up and worked near Calcutta.

The value of the exports of gunny bags shows very violent fluctuations; but besides the exports to foreign countries, it must not be forgotten that there is a large market in the country itself for these articles in packing merchandise exported, and that the market increases with the increase of traffic.

The figures for gunny bags and cloths are:—

		Number.	£
1868-69	- - -	5,868,585	185,305
1869-70	- - -	6,596,419	202,401
1870-71	- - -	6,761,133	342,425
1871-72	- - -	5,264,612	182,459
1872-73	- - -	6,169,622	188,212
Average of five years		6,132,074	220,160
1873-74	- - -	6,606,302	200,789
1874-75	- - -	8,016,299	235,699

These figures show a steady and constant increase for the last four years. The exports to the United States, which formerly were important, have gradually dwindled away to comparative insignificance, America being supplied more cheaply with bags and cloth from Dundee, and locally manufactured. The trade with the United Kingdom is also, as must be expected, unimportant. The chief consumers of our jute manufactures are the Straits, which took them to the value of 132,155*l.* during the year, Australia (49,017*l.*), Ceylon (19,684*l.*), and China (11,014*l.*). The trade with the Straits shows a large increase over that of 1873-74, while the exports to Australia fell off very much. Exports to Ceylon, Persia, and other countries whose shores lie on the Indian Ocean, also show an increase. Bengal will probably always be able to do a flourishing trade in gunny bags and cloth with these countries, and defy competition from other quarters.

161. The number of chests of opium exported during the year amounted to 94,746, Opium. worth 11,956,972*l.*, against 88,726, worth 11,341,854*l.*, in 1873-74, showing a small reduction in the average value of each chest. From Bengal 45,712 chests were exported (value 5,534,201*l.*), and from Bombay 49,034 (value 6,422,771*l.*). China and Cochin China took 85,524 chests, the Straits 8,943, the United Kingdom 165, and the remainder went in small numbers to Ceylon, Africa, Mauritius, Macassar, and Australia. It is unnecessary to make any remarks on the features of this trade, which, as a most important branch of the Indian revenue, is under the immediate supervision of the Financial Department.

162. Salt of Indian manufacture is exported in small quantities chiefly from Bombay Salt. and Madras to the Straits. The total quantity exported last year was 121,828 cwt., worth 25,977*l.*, of which all but 2 cwt. was taken by the Straits. The exports were shared between Bombay and Madras, in the proportion of 91,823 cwt. from the former and 30,003 cwt. from the latter. The exports of last year show a considerable increase on those of the four previous years, the average of which was 53,702 cwt.

163. Saltpetre (nitrate of potass) is mainly exported from Bengal, this natural Saltpetre. product occurring in great quantities in Behar and other parts of the province. The trade is subject to extreme oscillations, the result partly of political influences. It reached its highest point during the Confederate struggle in the United States, the value of the exports being at that time: 1860-61, 661,614*l.*; 1861-62, 828,378*l.*; 1862-63, 896,808*l.*; 1863-64, 722,165*l.*; 1864-65, 542,461*l.*; and in 1865-66 (the impetus given to the trade continuing after the termination of the war), 605,376*l.* It should be remarked, however, that the trade in this article is extremely sensitive to the fiscal action of Government. Thus there is no doubt that the reduction of the export duty by one-half in 1865 tended to maintain the trade at a high level in that year, though the extraordinary demand of the previous years had ceased; and, on the other hand, when in the following year a heavy duty was imposed, the value of the trade fell at once to 297,713*l.* (in 1866-67), and again to 256,301*l.* (in 1867-68). The trade was freed in 1867, but the blow had been heavy and recovery was slow, other sources of supply having been sought by consuming countries. The French, for instance, commenced a local manufacture, and a chemical substitute also entered into competition with native saltpetre. The figures since 1868-69 are as follows:—

				Cwts.	£
1868-69	-	-	-	397,019	310,758
1869-70	-	-	-	490,116	394,870
1870-71	-	-	-	482,940	440,554
1871-72	-	-	-	432,210	397,251
1872-73	-	-	-	518,982	536,313
Average of the five years				<u>464,253</u>	<u>415,949</u>
1873-74	-	-	-	451,197	464,974
1874-75	-	-	-	553,330	501,468

The trade of the year of report was thus larger than in any year since the remission of the duty. There would not seem to be much apprehension that, in these days of international conflicts followed by internecine struggles,—days of military supremacy and bloated armaments,—the demand for “villanous saltpetre” will fall off materially; and as the article is increasingly required moreover in some of the useful arts, it is probable that the trade will remain tolerably steady, unless it should be interfered with from time to time by the political exigencies of the administration of the day.

Of the quantity exported during the year, 540,321 cwt. were shipped from Bengal, the exports from other provinces being unimportant. The United Kingdom took 338,744 cwt., against 255,742 in 1873-74. The exports to France increased from 5,003 cwt. to 41,807 cwt. The quantity sent to America fell from 115,990 cwt. to 79,910 cwt. China took 68,694 cwt., against 50,467 cwt. in 1873-74, and

Mauritius 15,033 cwt., against 7,347 cwt. The trade with other countries was not material.

Silk (raw).

164. Of this article, too, Bengal exports much the largest quantity, practically in fact the whole of what is exported from India. The shipments from Bengal amounted last year to 1,634,548 lbs. in a total from British India of 1,656,015 lbs. The manufacture of silk in Bengal is an old, and was once a thriving industry, but is now in a state of gradual decay. The average annual figures of the trade, commencing with the year 1856-57, previous to which period they are defective and imperfect, are as follow, in quinquennial periods:—

		Lbs.	£
1856-57 to 1860-61	- -	1,636,206	825,809
1861-62 to 1865-66	- -	1,345,515	874,975
1866-67 to 1870-71	- -	2,342,070	1,328,053
And for the last four years as follows:—			
1871-72	- - -	1,893,322	1,081,097
1872-73	- - -	2,231,578	1,256,356
1873-74	- - -	2,223,917	1,143,744
1874-75	- - -	1,656,015	766,462

Thus the trade has fallen below the point at which it stood fifteen years ago, and this is unfortunately not a temporary depression only, from which the trade might be expected to emerge with a new lease of life. The falling off commenced some years ago, but was interrupted by the serious outbreak of disease in an epidemic form amongst the silkworms of France and Italy. Indian silk then found again the markets which seemed to have been gradually closing up against it, but at the same time that Indian silk was sought for, other silk-producing countries were called upon for aid, and first China and then Japan entered into competition with our produce with formidable energy. China has always furnished Europe with considerable stocks of silk, and the supplies increased year after year as the silkworm disease spread in Europe. Japan was a comparatively new source of supply, but the Japanese, once their ports were opened to foreigners for commercial intercourse, showed themselves to be quite capable of profiting by circumstances, and with at least as much intelligence and acuteness as the Chinese. And at the same time that these countries enormously increased their exports of silk, they also supplied fresh seed with which to replenish the worn-out stocks of European breeders. Disease now no longer exists in an epidemic form in Europe, and recent silk harvests in France and Italy have been amongst the finest ever known, while every steamer from China and Japan carries to the ports of Europe large quantities of raw silk for manufacturers, and selected eggs for breeders. In 1874 four-fifths of the whole of the silk employed in Europe was of Italian and Chinese origin. China supplied no less than eight million pounds of silk, and Japan twelve hundred thousand. Bengal silk, inferior in quality, unfit for employment in the manufacture of the finer kinds of goods, and not liked by manufacturers because defects resulting from careless reeling (in silk of native manufacture at any rate) make it comparatively difficult to work, was unable to hold its own, and prices fell to a very low point. Here another obstacle to the progress of the trade presented itself, for native dealers could not be convinced that in existing circumstances better rates could not be expected, and that they must be content with such prices as they could get. They persisted in holding their stocks, hoping for a better market, until business became next to impossible, the result being of course finally all to their own disadvantage and to the advantage of foreign silks. At the present time the trade is at a low ebb, and serious distress exists in many of the silk-producing districts in Bengal amongst the classes which have hitherto gained their living by the industry. So depressed is the trade that recently in Calcutta some large lots of Surdah silk, mostly the produce of European filatures, having found no buyers by private sale, were put up for public sale unreservedly to the highest bidders.

The prices realized were extremely low. This circumstance is, it is believed, unprecedented in the silk trade in the Calcutta market.

The exports during the year consisted of 1,009,705 lbs. to the United Kingdom, 450,258 lbs. to France, and 177,156 lbs. to the Mediterranean Ports, with small quantities to some other countries. The exports to these three important consuming centres show a serious diminution on the trade of the previous year.

165. These chiefly consist of the printed silk piece-goods called "corahs" and "bandannas," and to a more limited extent of tussier fabrics. The total value of the exports during the year was 231,988*l.*, against 222,755*l.* in 1873-74, and 186,025*l.* in 1872-73. This trade seems to be increasing, and is, so far, a compensation for the loss of the trade in raw silk. But its extent compared to that of raw silk is very limited. Bengal represents 174,036*l.* and Bombay 45,747*l.* of the whole trade. The largest customer for these goods is the United Kingdom. France also takes a certain quantity, and the remainder is distributed in various proportions between the Straits, Ceylon, Aden, the Persian Gulf, the Coast of Africa, and other countries, where Arabs, Persians, Negroes, and Malays are partial to bright-coloured silks to wrap round their heads and waists. Silk manufactures.

166. Jadestone is exported from Burma, being brought down from the independent part of that country. It is sent to the Straits, where it is made up into vases, cups, ornaments, &c. for the Chinese and others, and is also re-exported in the raw condition to China, there to be manufactured. A very small quantity is obtained from Burma by Madras and thence re-exported to Ceylon. The trade last year amounted to 5,153 cwt., valued at 80,236*l.*, against 2,495 cwt., worth 50,232*l.* in 1873-74. The trade does not possess any features requiring particular notice. Stone (jade).

167. The trade in Indian sugar varies a good deal from time to time according to the outturn of the crops, and the quantity available for export, and also the demand in the European market, which is regulated by the abundance or otherwise of supplies from other sources, *e.g.*, the West Indies and Mauritius. The figures for 1874-75 and the five previous years are appended:— Sugar and other saccharine produce.

	Cwt.	£
1869-70	346,295	276,946
1870-71	307,144	244,031
1871-72	372,897	288,048
1872-73	630,938	492,743
1873-74	294,818	227,823
1874-75	498,054	319,238

During the year the trade in Bengal sugar amounted to 106,851 cwt., worth 101,424*l.*, against 135,746 cwt., worth 132,806*l.*, in 1873-74. Exports from Madras, on the other hand, increased from 138,867 cwt., worth 71,109*l.*, to 370,600 cwt., worth 193,731*l.* The Madras Board of Revenue attribute the diminution of the trade in 1873-74 to a falling off in the demand of the English market for Indian sugar. The demand would seem to have revived, and with it an activity in the exports. In 1872-73 the United Kingdom took 575,867 cwt. of Indian sugar; in 1873-74 only 241,789 cwt.; and in 1874-75 444,830 cwt. The other most important centres of consumption for our sugar are Ceylon, and the coasts of the Red Sea and Persian Gulf, with Aden.

168. According to the latest returns we possess, there were, at the date of those returns, about 488,000 acres of land under tea in India, *viz.* :—

	Acres.
In Assam and Bengal	457,026
In the North-Western Provinces	17,200
In the Punjab	9,805
In Madras	(over) 3,640

But these figures are not quite of recent date, and the extension of cultivation since they were obtained requires that some addition should be made to them. There are

certainly not less than half a million acres under tea in India at the present date, and probably the area exceeds that figure. Of the tea produced in Assam and Bengal, the North-Western Provinces and the Punjab, all that portion which is meant for shipment is, with but slight exception, brought down to Calcutta and shipped from that port.

The continued and steady progress of the trade in tea is most satisfactory. The figures, which are only available from 1861-62, are appended :—

	Lbs.	£
1861-62	1,473,270	130,283
1862-63	2,253,773	178,128
1863-64	2,920,232	220,282
1864-65	3,457,430	280,284
1865-66	2,758,187	275,055
1866-67 (11 months)	6,387,088	340,572
1867-68	7,811,429	686,928
1868-69	11,480,213	951,376
1869-70	12,754,022	1,037,883
1870-71	13,232,232	1,120,517
1871-72	17,187,328	1,454,984
1872-73	17,789,911	1,577,691
1873-74	19,324,235	1,742,925
1874-75	21,137,087	1,937,429

The trade has thus expanded year after year without interruption, and it will no doubt continue to develope. Tea now constitutes one of the most prosperous industries of the country.

Of the total quantity exported, all but 77,452 lbs. was sent to England, which country takes our tea in constantly increasing quantities, while the imports from China, if they are not declining, are very nearly stationary. In 1869 the proportion of Chinese to Indian tea imported into England was more than 11 to 1. In the first ten months of the current year it has been little more than 6 to 1. The small balance left over after the wants of the United Kingdom were supplied, was sent to various countries, Australia and the Straits taking the largest share. The former country, however, derives the bulk of her supply of tea direct from China.

Tobacco.

169. Indian tobacco is at length beginning to make some figure as an article of export. The plant is largely cultivated in most parts of India, but no attention having been given to the development of its inherent good qualities, the product has been of a coarse, rank kind, reckoned unfit for exportation. Up to within the last three years very little tobacco indeed was exported, and most of the exports went to Mauritius, for the Indian cooly population of that island. Very small quantities were sent to Europe, mainly to Germany. In 1872-73, however, a sudden demand arose, the result, it is said, of a trial shipment, and the trade since then has grown apace. The value of the tobacco exported for 1874-75, and the five previous years, was :—

	Unmanufactured.	Manufactured : Cigars.	Other sorts.	£
	Lbs.	No.	Lbs.	
1869-70	4,017,578*	-	-	58,431
1870-71	4,232,228*	1,342,200	-	61,307
1871-72	4,167,744	306,300	1,055,488	78,275
1872-73	17,135,552	405,385	248,640	134,331
1873-74	19,870,480	1,111,128	355,824	165,275
1874-75	33,411,504	2,993,940	425,040	228,201

The bulk of the tobacco is exported from Bengal, the value of the tobacco sent from this Province to foreign countries for the last five having been in 1870-71

* Includes manufactured tobacco.

12,083*l.*: in 1871-72, 9,943*l.*; in 1872-73, 74,087*l.*; in 1873-74, 94,642*l.*; in 1874-75, 180,871*l.* These figures indicate how rapidly the foreign trade in Bengal tobacco has developed since 1872-73. The tobacco is brought to Calcutta, chiefly from the districts of Rungpore and Tirhoot, where it is extensively grown, and though still of very poor quality, finds ready and profitable sale for the markets of Europe. From Bombay the exports during the year were valued at 30,099*l.*, and from Madras at 14,742*l.* From Burma and Sind the exports are insignificant. Burma is a fine country for tobacco, and yet does not produce enough for home consumption, having to import the leaf from Bengal and Madras.

The value of the exports to the United Kingdom advanced from 33,646*l.* in 1873-74 to 101,187*l.* in the year of report; to France from 8,974*l.* to 10,294*l.*; to the Mediterranean Ports from 21,718*l.* to 38,808*l.* (largely for Italy); exports to Gibraltar nearly doubled, having advanced from 14,573*l.* to 27,780*l.* The imports of tobacco into this place are, it seems, for contraband purposes. The large quantities sent thither from India and other countries are far in excess of the requirements of the population of the possession (from America, for instance, in 1874 tobacco to the value of nearly 810,000 dollars was sent to Gibraltar), and it is not, as far as can be ascertained, an entrepôt for legitimate commerce in this article. The Spanish authorities, whose fiscal restrictions on tobacco are exceptionally severe (and exceptionally ill-judged), have remonstrated against the systematic smuggling which is carried on from Gibraltar, and recently British and French vessels laden with tobacco and other merchandise were seized by them on the ground that the goods were contraband. The trade with Aden and the Red Sea fell off in value from 55,011*l.* to 29,434*l.* The other countries which consume Indian tobacco are Mauritius, Ceylon, and the Straits, and some others in small quantities.

170. If proper attention is given to the cultivation of tobacco in India, an extensive and highly profitable industry may undoubtedly be created, adding considerably to the wealth of the country. There are many parts of India where tobacco can be produced quite as good as the best grown in Manila, and, if cured under skilled supervision, our manufactured tobacco will bear comparison with any produced elsewhere (except the finer kinds of Havana tobacco). What is required is that the business of cultivation and manufacture should be taken up, like tea and coffee and indigo, by European capitalists. Native cultivators, as a rule, are too poor to practise the high cultivation which tobacco requires, and, besides, their standard of good tobacco is radically different from that of Europeans. It seems that there is a prospect of the introduction of European enterprise into this industry in Bengal, for two firms in Calcutta have taken it up, and a company has also been started in London for the growth and preparation of tobacco. Excellent tobacco was recently produced by one of the two Calcutta firms. In Madras Europeans are now engaged in the same business, and their manufactures are much esteemed by Anglo-Indians.

171. Nearly all the teak exported from India is Burmese timber shipped from Burma. The trade for 1874-75 and the five previous years were as follows:—

				Tons.	£
1869-70	-	-	-	19,831	134,481
1870-71	-	-	-	32,632	228,727
1871-72	-	-	-	42,459	291,280
1872-73	-	-	-	50,443	356,386
1873-74	-	-	-	51,124	381,293
1874-75	-	-	-	42,868	328,564

The decrease, it is believed, is to be attributed to the scarcity of mature timber in the Moulmein forest within easy distance of the coast. Some Burmese foresters have in fact, it is said, crossed the frontier into the Siamese forests, those in British territory not affording sufficient remuneration for their labour. The Commissioner of Tenasserim has made the following remarks on this subject: “* * * Our

timber trade, which, by care in reproduction within our own provinces, might, with the supply we get from foreign States, have gone on flourishing for years, will now, I fear, gradually show a decrease. The quality of timber already shows a marked deterioration as compared with former years: gradually the number of logs will decrease." (*Report on the Trade and Customs of British Burma, 1874-75.*) Of the total quantity exported, 42,210 tons were sent from Burma, and 37,952 tons were taken by the United Kingdom. Mauritius took 1,495 tons, Africa (Cape Colony mostly) 1,663 tons, the Red Sea 577 tons, Gibraltar 613 tons, Ceylon 380 tons, the Straits 102 tons, Aden 66 tons, and other countries 20 tons.

The other kinds of wood exported are of no importance and require no special notice.

Wool (raw).

172. Wool (raw) is exported almost entirely from Bombay and Sind. The exports in 1874-75 and the five previous years were:—

	Lbs.	£
1869-70	13,117,904	465,238
1870-71	19,185,039	661,653
1871-72	24,122,562	902,900
1872-73	20,394,718	838,042
1873-74	20,333,372	938,336
1874-75	21,290,782	959,901

Indian wool is exported exclusively to Europe, the great bulk of the exports going to the United Kingdom, which took 21,065,326 lbs. in the year of report. France took 178,864 lbs. and the Mediterranean Ports 46,592 lbs.

Woollen goods:
shawls.

173. The trade in shawls is not in a flourishing condition. The demand for France, which was the largest consumer of Kashmir shawls was almost extinguished by the war of 1870-71, and a revival of the trade has been prevented by a change in fashion which has cast shawl-weavers in this country into distress analogous to that into which the ribbon-makers of Coventry fell some years ago for the same reason. So gloomy are the prospects of the shawl trade in Kashmir, that the ruler of that State is endeavouring to develop the production and manufacture of silk in his territories to compensate for the loss of revenue occasioned by the decline in the sale of shawls. The weavers of Amritsar, too, where the industry was in a flourishing condition some years ago, are in a bad way. The value of the exports of late years is as follows:—

	£
1868-69	295,862
1869-70	230,596

In the next year the trade was freed from duty, but without any effect, the war having commenced and stopped business:—

	£
1870-71	135,026
1871-72	167,719

The next year (1872-73) saw a large revival of trade following on the conclusion of peace. Exports were valued at 312,545%, but they caused heavy losses, stocks being unsaleable by reason of the caprice of fashion, and the figures fell rapidly to 199,737% in 1873-74, and 166,979% in 1874-75. The decrease is largely in the value of the trade with France, which fell from 192,069% in 1872-73 to 113,068% in 1873-74, and 94,954% in 1874-75. The trade with the United Kingdom also has fallen off considerably. The figures are: 1872-73, 79,613%; 1873-74, 47,892%; 1874-75, 48,951%. In every case the average value of each shawl shows an enormous falling off as compared with the quantities, indicating a decline in the value of Kashmir shawls as well as the substitution for them of the cheaper woollen shawls known in this country as Rampur chadars. Besides being cheaper, many think these shawls

superior in appearance to the shawls of Kashmir, and hence their popularity with the wearers of shawls.

Of other kinds of woollen goods the trade is increasing in value, but is still so small as to require no special notice.

DUTIABLE EXPORTS.

174. The exports of Indian-made twist and yarn are steadily increasing year by year. The annual value for the last five years is as follows:—

	£
1870-71	63,329
1871-72	90,975
1872-73	97,492
1873-74	128,386
1874-75	147,562

Cotton goods :
twist and yarn.

This steady increase is almost entirely in the manufactures of the Bombay mills, the export from Bombay representing 146,003*l.* of the total value of the year's trade. The chief consumers are China (83,671*l.*), Aden (49,564*l.*), the coast of the Red Sea and Persian Gulf (11,181*l.*), the rest going in small quantities to other neighbouring countries.

175. In piece-goods also a large trade is done. The exports for the last five years were:—

	£
1870-71	254,237
1871-72	272,159
1872-73	305,003
1873-74	384,937
1874-75	353,822

Piece-goods.

The decrease in the year of report was chiefly in the trade from Bombay to Aden, which fell off owing, according to the Commissioner of Customs at Bombay, to large direct importations from American to Aden. That officer adds that the Bombay mills have large stocks undisposed of. Madras exported during the year more cotton goods than Bombay, and the value was largely in excess of the Bombay goods, showing that the quality of the cloths was much superior. Most of the Madras country cloths, which are woven in hand-looms, are sent to Ceylon and the Straits. These two countries took cloth during the year to the value of 118,505*l.* and 69,541*l.* respectively. Exports to Aden amounted to 67,106*l.*, to the Red Sea 26,376*l.*, and the Persian Gulf 22,751*l.* The United Kingdom took Indian cotton cloth to the value of 31,603*l.*, against 64,754*l.* in 1873-74, showing a large reduction in the trade during the year.

176. The great advance made of late years in the local manufacture of cotton is deserving of particular attention.

Manufacture of
cotton in India.

There were in Bombay at the end of the official year 1874-75, 40 mills for the spinning and weaving of cotton, employing about 886,098 spindles and 8,537 looms. There are four in Calcutta, two in the North-Western Provinces, one at Nagpore, and another at Indore (the property of the Maharajah Holkar, worked under European supervision), while others are being formed elsewhere. The mills now at work probably employ not less than a million spindles and 10,000 looms, and there can be no question that, in regard at any rate to the coarser qualities of cloth, they form the nucleus of a formidable competition with the mills of Lancashire, for their goods are not sized to such an extent as English goods, and they are liked by native consumers on the ground of quality and price. A novel feature in the market of Calcutta presented itself a few months ago in the importation of Bombay-made cotton cloths, which found favour with buyers in Calcutta. The manufactures of these mills are now, as will be seen from the figures given above, being exported in increasing quantities to neighbouring countries hitherto supplied with English goods re-exported from Bombay, and in India itself there is a very large and increasing outlet for these goods.

Indigo.

177. The quantity of indigo exported year after year is largely dependent on the crops, the outturn of which is always very uncertain, but the value fluctuates according to the needs of the European markets and the abundance or otherwise of supplies from Southern America, as well as the quality of the dye produced in India. The exports for 1873-74 and 1874-75 and the five years previous are given below :—

	Cwt.	£
1868-69 - - - - -	99,206	2,893,823
1869-70 - - - - -	98,085	3,178,045
1870-71 - - - - -	103,184	3,192,503
1871-72 - - - - -	115,414	3,687,762
1872-73 - - - - -	115,312	3,426,824
Average of five years - - - - -	106,240	3,275,791
1873-74 - - - - -	115,980	3,555,300
1874-75 - - - - -	81,466	2,576,302

The falling off in the exports of last year followed on one of the shortest crops ever known in Bengal, which province is the chief seat of the indigo industry. Exports from Madras were also much below those of last year.

Exports to all the principal consuming countries fell off very materially as compared with the exports of 1873-74. To the United Kingdom from 83,612 cwt. to 57,592 cwt.; France from 10,525 cwt. to 8,670 cwt.; the Mediterranean Ports from 8,432 cwt. to 7,130 cwt.; America from 5,334 cwt. to 2,435 cwt.; the Persian Gulf from 6,561 cwt. to 3,152 cwt. The trade to Russia, on the other hand, increased from 955 cwt. to 1,776 cwt., showing a great increase not only on the exports of 1873-74 but on those of 1872-73, which amounted to only 261 cwt. A direct trade with Russia has only commenced within the last three years.

Grain and pulse :
gram.

178. "Gram" is the common name applied to the grain of two pulses, *Dolichos uniflorus* and *Cicer arietinum*, the former of which is extensively cultivated in Madras and the latter in Bengal and Northern India. The exports of this grain seem to be increasing, the chief consumption being in Mauritius and Réunion for the coolies there, in Ceylon, and the Straits. The Mediterranean ports also took a not inconsiderable quantity (2,237 cwt.) during the year. It seems that gram is eaten by the lower classes of Southern Europe as it is in India by the natives. Europeans here feed their horses with it. Madras and Bengal export the largest quantities. The exports for the last five years from all India have been :—

	Cwt.	£
1870-71 - - - - -	23,171	9,490
1871-72 - - - - -	142,492	42,323
1872-73 - - - - -	291,400	80,344
1873-74 - - - - -	270,218	86,500
1874-75 - - - - -	322,661	112,919

Rice.

179. Rice (including paddy or rice in the husk) constitutes the main staple of British Burma, which province exported during the year nearly 61 per cent. of the total exports from India. The following figures represents the extent of the total trade for the last seven years :—

Year.	Rice (unhusked).	Rice (husked).	Total.	Value.
	Cwt.	Cwt.	Cwt.	£
1868-69 - - - - -	325,860	15,051,211	15,377,071	4,283,965
1869-70 - - - - -	332,449	10,282,195	10,614,644	3,087,615
1870-71 - - - - -	295,791	15,792,022	16,087,813	4,203,850
1871-72 - - - - -	320,395	16,990,890	17,311,285	4,499,161
1872-73 - - - - -	320,159	22,973,797	23,293,956	5,761,030
Average of 5 years - - - - -	318,931	16,218,023	16,536,954	4,367,124
1873-74 - - - - -	440,201	19,805,184	20,245,385	5,549,797
1874-75 - - - - -	452,296	16,940,642	17,392,938	4,765,334

The extent of the exports from British Burma and the expansion of the trade will be seen from the following figures for the same period :—

Year.	Rice (unhusked).	Rice (husked).	Total.	Value.
	Cwt.	Cwt.	Cwt.	£
1868-69 - - -	42,039	7,979,602	8,021,641	1,881,844
1869-70 - - -	66,552	5,072,206	5,138,758	1,238,038
1870-71 - - -	49,977	8,179,813	8,229,790	1,886,866
1871-72 - - -	38,874	9,231,424	9,270,298	1,995,006
1872-73 - - -	37,021	13,629,028	13,666,049	2,854,254
Average of 5 years -	46,893	8,818,414	8,865,307	1,971,202
1873-74 - - -	51,205	12,193,256	12,244,461	2,705,142
1874-75 - - -	100,484	10,491,895	10,592,379	2,295,003

The decrease in the exports of 1873-74 to foreign ports was caused by the diversion of large quantities from Madras and Burma to Bengal for the supply of the population of the distressed districts. The greatest part of the decrease in 1874-75 was caused, first, by the early exportation from Burma to Bengal within the last two months of 1873-74 of a portion of the crop which would under other circumstances have been held over until the commencement of the year of report for exportation to foreign countries, and, secondly, to the reluctance of the Burmese cultivators later on in the year to sell at the low prices, compared with those which had ruled during the previous year, offered by merchants. Considerable quantities were held back in the districts on this account, and not brought to market at all up to the end of the year of report. The demand in the European market was also slack. In Bengal very little business was done with European countries during the greater part of the year, local prices ranging above the level of those current at home. Exports accordingly fell off a good deal. The United Kingdom, which took 11,882,560 cwt. in 1873-74 took no more than 9,986,739 cwt. in 1874-75, a reduction of 1,895,821 cwt. Exports to the West Indies fell from 728,770 cwt. to 213,805 cwt. The shipments to Mauritius (an important centre of consumption) increased from 1,047,732 cwt. to 1,475,205 cwt. Exports to Réunion, Africa, the Red Sea, and Aden also largely increased. To Ceylon exports decreased from 3,931,245 cwt. to 2,741,831 cwt., and to the Straits from 1,056,757 cwt. to 893,580 cwt. There were other fluctuations, but these were the most important. On the whole 1874-75 was a bad year for the trade in rice with foreign countries, as compared with the trade of the two previous years.

180. The trade in other sorts of grain increased from 84,441*l.* to 118,465*l.* This Other sorts. trade is chiefly with Mauritius and Ceylon.

181. The value of the trade for the last five years was—

	£
1870-71 - - -	378,500
1871-72 - - -	514,516
1872-73 - - -	697,921
1873-74 - - -	634,663
1874-75 - - -	505,312

Hides and skins
(dressed or
tanned).

Madras is the chief seat of this trade, and the exports are principally sent to the United Kingdom, America, and the Straits.

182. There has been great activity in the trade in this article for some time, the demand having steadily exceeded the supply. The exports for the last seven years are as follows :—

	Cwt.	£
1868-69 - - -	43,746	116,587
1869-70 - - -	45,532	127,495
1870-71 - - -	40,222	112,613
1871-72 - - -	57,952	162,191
1872-73 - - -	50,762	142,226
1873-74 - - -	65,769	184,149
1874-75 - - -	67,705	189,564

The values here recorded are the tariff values which, until the revision of the tariff in August, were much below the real value of the exports, average prices having increased enormously within the last two years. The increase of the trade must be measured by the quantities exported. The value of the shell-lac exported last year was probably not less than 250,000*l.* at the lowest estimate. Calcutta is the centre of the lac trade, all the lac produced in Assam, Bengal, the Central Provinces, and Burma being brought thither for shipment. Measures are now being taken both in Burma and the Central Provinces to increase the production of lac in the State forests, the only obstacle to a great increase in the trade being the scarcity of the raw material. India has hitherto had the almost undisputed monopoly of lac, but the excessively high prices which have recently ruled have had the effect of stimulating the shipment of lac from Siam, and the exports from that country are now beginning sensibly to compete with Indian lac. Siamese lac is said to be superior in quality to most of the lac produced in India. The principal countries of consumption are the United Kingdom, France, the Mediterranean Ports, and America.

Oils.

183. The oils exported from India are divided into the various classes of animal, essential, mineral, and vegetable (non-essential). Of these the last class constitutes the great bulk, and is the only one requiring separate notice. The exports of this class for the last five years were:—

				Gallons.	£
1870-71	-	-	-	1,153,155	143,121
1871-72	-	-	-	2,733,162	350,133
1872-73	-	-	-	2,235,907	297,081
1873-74	-	-	-	1,972,697	232,511
1874-75	-	-	-	2,724,323	322,285

The oils are mainly linseed, cocoanut, teel or gingelly oil, and rape (or colza) oil. The principal countries to which they were sent during the year were the United Kingdom (the quantity exported to that country having increased from 1,056,793 gallons in 1873-74 to 1,662,453 gallons in 1874-75), Australia, Mauritius, the Persian Gulf, and the Straits, the trade with all these showing material increase. Of the total quantity exported 1,754,170 gallons were shipped from Bengal, 677,217 from Madras, 203,171 from Bombay, 82,598 from Sind, and only 7,167 from Burma.

Oilseeds.

184. Closely connected with oils are oilseeds. Of these the most important are linseed, poppy seed, rape or colza seed, and teel or gingelly seed. The total value of all seeds exported during the year was 3,235,947*l.*, showing an increase of nearly 875,000*l.* over the exports of the previous year, which were worth 2,361,423*l.*, the value for the four previous years having been:—

					£
1869-70	-	-	-	-	2,308,942
1870-71	-	-	-	-	3,522,305
1871-72	-	-	-	-	2,728,127
1872-73	-	-	-	-	1,508,241

The trade is very uncertain, and sometimes leaves large losses, cargoes heating on the voyage and the seeds arriving at their destination lumped together in great masses wholly unfit for useful purposes. The prospects of the trade from 1871-72 to 1873-74 were not cheering, and in 1872-73 merchants were greatly discouraged, the exports having fallen off to less than half what they were in 1870-71, in consequence of a general failure of the seed crop in Bengal and other causes. The trade, however, shows a return of vitality, and with the removal of the export duty in August, a steady and profitable business may perhaps be expected. The largest portion of the trade falls to the share of Bengal, from which province the exports in 1874-75 amounted to 1,947,481*l.*, against 1,404,487*l.* in 1873-74, an increase of more than half a million sterling in the year, but still below the point reached in some previous

years. From Bombay the exports were worth 577,265*l.*, against 382,190*l.* in 1873-74. Exports from Sind also show a large increase, having advanced from 181,113*l.* to 290,966*l.* The exports from Madras advanced from 393,526*l.* to 420,166*l.* Burma is not a seed-exporting province. The principal consumers are the United Kingdom and the United States, which during the year took Indian oilseeds to the value of 1,368,279*l.* and 1,011,747*l.*, the exports to both countries showing a large increase over those of 1873-74. Exports to the Mediterranean ports (70,773*l.*), Ceylon (19,491*l.*), the Straits (12,875*l.*), and to other countries in smaller proportion, account for the remainder.

The kind exported in greatest bulk is linseed, of which 3,595,798 cwt., worth Linseed. 1,797,929*l.*, were shipped in 1874-75, against 2,820,315 cwt., worth 1,410,157*l.*, in 1873-74. Bengal exports and the United States take the largest share of this seed, exports to that country having amounted to 2,019,398 cwt., valued at 1,009,723*l.*, in the year of report. The seed is in great request in America for the manufacture of oil to be used in the preparation of paints and varnishes for the wooden houses which in many States constitute the great majority of dwellings. India has now to compete with the Western States of the Union in which the cultivation of oilseeds is extensively undertaken. Exports to the United Kingdom were 1,565,364 cwt., valued at 782,681*l.*

Although the flax plant is extensively cultivated in India, it is grown only for the seed, and no attempt is made to utilize the fibre.

Teel or gingelly seed (*Sesamum indicum* and *S. orientale*), is also an important Teel or gingelly. item under the heading of oilseeds. Exports in the year were 1,203,222 cwt., valued at 722,892*l.*, against 908,430 cwt., worth 544,918*l.*, in 1873-74. Of this kind Madras exports most, the value of the exports from that province having been 340,475*l.* in the year. France takes the great bulk of this crop (exports thither in 1874-75 were 1,081,715 cwt., worth 648,968*l.*).

The exports of rapeseed, amounting in 1874-75 to 827,430 cwt., worth 372,343*l.*, Rape. are divided between Bengal and Sind. The exports from Bengal show a great rebound from the depression of 1873-74, having more than quadrupled. Exports from Sind also show a satisfactory increase. The bulk of the exports of rapeseed is taken by the United Kingdom (798,499 cwt., worth 359,324*l.*).

Of poppyseed also the United Kingdom takes the greatest share, viz., 286,390 cwt., Poppyseed. worth 157,513*l.* France took 115,728 cwt., valued at 63,649*l.* The export trade is almost entirely confined to Bengal, only a very small quantity being shipped from Bombay.

Mustard and other kinds of seed are exported in comparatively small quantities and require no special notice.

185. Under duitable spices are (or rather were until last August, when they were Spices. all freed), cassia, pepper, ginger, cardamoms, chillies, &c. The total value of the exports was 183,309*l.*, against 226,241*l.* in 1873-74. The trade fluctuates a good deal, as will be seen from the figures for the last five years:—

	£
1869-70	170,281
1870-71	201,082
1871-72	284,660
1872-73	154,025
1873-74	226,241
1874-75	183,307

Exports to the United Kingdom amounted to 62,569*l.*; to France 39,038*l.*; to Ceylon 17,019*l.*; to Persia 13,169*l.* The remainder was sent in small quantities to various other countries.

SECTION IV.

IMPORTS AND EXPORTS OF COIN AND BULLION.

186. The great extent to which the precious metals are absorbed and mostly withdrawn from circulation by India is shown by the figures in the table below, which commence with the year 1846-47, when the returns first distinguish the value of gold and silver separately. During these twenty-nine years (1846-47 to 1874-75) the total imports of gold amounted to 100,931,966*l.*, while the exports did not exceed 3,521,368*l.*, leaving a nett accession of gold to the country of 97,410,598*l.*

During the same period the imports of silver amounted to 211,515,168*l.*, and the exports to 34,457,753*l.*, leaving a nett balance of silver in India of 177,057,415*l.*

In the eleven years previous to this period, viz., from 1835-36 to 1845-46, when gold and silver are not separately distinguished in the returns, the imports of both metals combined amounted to 31,256,881*l.*, and the exports to 5,802,147*l.*, the nett balance of both left in the country being 25,454,734*l.*

In these forty years, therefore, India has absorbed three hundred millions sterling in gold and silver coin and bullion, of which most of the gold and a considerable proportion of the silver has been withdrawn from general circulation, having been either converted into ornaments or hoarded in the earth.

The imports and exports during the years 1846-47, 1847-48, and 1848-49, and the average annual imports and exports in quinquennial periods for the last twenty-five years previous to 1874-75, are appended:—

PERIOD.	GOLD.		SILVER.	
	Imports.	Exports.	Imports.	Exports.
	£	£	£	£
1846-47 - -	852,839	5,890	2,087,082	708,833
1847-48 - -	1,048,778	9,662	922,185	1,416,376
1848-49 - -	1,401,748	52,830	2,798,628	2,484,724
1849-50 to 1853-54 -	1,214,690	60,361	3,573,288	939,897
1854-55 to 1858-59 -	2,566,900	59,245	8,708,130	859,227
1859-60 to 1863-64 -	5,905,578	16,040	11,185,935	1,004,154
1864-65 to 1868-69 -	6,156,460	321,342	11,461,317	1,480,212
1869-70 to 1873-74 -	3,264,246	190,469	5,002,422	1,404,151
1874-75 - -	2,089,236	215,701	6,051,810	1,409,608

The largest imports of treasure were made during the period of the American war and the cotton famine in England, when, in return for the increased production of Indian cotton, streams of the precious metals poured into the country.

Government transactions have been included in all these figures; for to obtain a correct view of the part played by India in the absorption of gold and silver, it is necessary to take all the imports and exports into account, whether the transactions are private or public. Government does not import either gold or silver, nor does it export gold. Its transactions are confined to the export of silver, and this ordinarily to a comparatively small extent. The total exports of silver on account of Government during the last five years do not exceed altogether 854,683*l.*

Our largest imports of gold are from China, which sent us last year 1,083,584*l.*, against 812,651*l.* in 1873-74. From the United Kingdom we received 454,621*l.*; from the Red Sea, 205,902*l.*, from Ceylon, 106,683*l.* Imports from Australia have fallen off very much, having sunk to 50,376*l.*, from 174,520*l.* in 1873-74, and 366,473*l.* in 1872-73. Exports of gold to various countries fluctuate greatly every year. In the year of report the United Kingdom took 207,230*l.*, which was nearly all that was sent away from India.

Our largest imports of silver are from the United Kingdom, which sent us during the year 4,376,881*l.*, against 2,149,305*l.* in 1873-74,—a great increase, of which a considerable proportion consisted of German coin thrown on India in consequence of the adoption of a gold standard in Germany. China sent us 353,302*l.*—a great reduction on the imports of 1873-74, which amounted to 912,967*l.* From Ceylon we received 322,686*l.*—a small increase on the imports of the previous year. The Persian Gulf and Red Sea, the Straits Settlements, Mauritius, and France sent us the bulk of the rest of the silver imported. Of that which was exported, Ceylon took 937,302*l.*; China 102,536*l.*, the Persian Gulf 113,897*l.*, of which 15,000*l.* was on account of Government, and Mauritius 95,000*l.*, the remainder going in small quantities to other countries.

SECTION V.

CUSTOMS REVENUE.

187. The total gross customs revenue during the year amounted to—

	£
Duty on imports - - - -	4,380,333
Duty on exports - - - -	662,061
TOTAL - - - -	5,042,394

and the nett revenue to 4,946,886*l*. The figures for the previous five years are :—

YEAR.	Imports.*	Exports.*	TOTAL OF IMPORTS AND EXPORTS.	
			Gross.	Nett.
	£	£	£	£
1869-70 - - - -	4,206,536	480,191	4,686,727	4,580,175
1870-71 - - - -	4,296,563	640,322	4,936,885	4,837,061
1871-72 - - - -	4,129,155	687,717	4,816,872	4,736,623
1872-73 - - - -	4,177,102	798,975	4,976,077	4,858,708
1873-74 - - - -	4,161,716	724,072	4,885,788	4,796,217
Average of five years -	4,194,214	666,255	4,860,469	4,761,756

Revenue from imports.

188. The total revenue for 1874-75 has therefore exceeded the revenue of any of the previous five years. The revenue from import duties shows an increase, while that from export duties has rather fallen off. The largest source of revenue in the articles of import is salt, the duty on which realised 2,570,790*l*., against 2,485,920*l*. in 1873-74. This sum in the financial accounts is not included under customs, but classed separately under "salt," with the revenue realised from the same article by the inland customs. Cotton goods realised 905,635*l*., against 842,510*l*. in 1873-74. The revenue from liquors increased from 266,387*l*. to 287,241*l*. The revenue from metals increased from 92,931*l*. to 133,209*l*. The duty on silk and silk goods increased from 81,855*l*. to 92,270*l*. In other articles there were various increases and decreases, but the duty in each case being of comparatively small amount, the fluctuations need not be separately enumerated. The articles mentioned above are the main sources of the revenue from import duties.

Revenue from exports.

189. In the list of dutiable exports, rice stands first, the revenue from this source constituting much of the largest part of the export duties. The realisations in 1874-75 were 454,154*l*., showing a great falling off on the returns of the two previous years, which were 617,497*l*. and 529,686*l*. The revenue from indigo fell from 47,290*l*. to 33,351*l*. The diminution in both cases was consequent on diminished exports. Seeds, on the other hand, with an increased export, produced a revenue of 98,473*l*., against 72,601*l*. in 1873-74. The revenue from seeds in 1870-71, before the depression in the trade set in, was 107,998*l*., but the amount realised fluctuates much with the trade. This source of revenue has now been abandoned, seeds being henceforth free of duty. The increase of duty on Indian cotton goods is proportionate to the progress of exportation, but the total sum is still small, having amounted to only 16,382*l*. in 1874-75, against 15,797*l*. in 1873-74. The revenue from lac (all kinds) shows a decrease, having fallen from 10,334*l*. to 9,495*l*., consequent on the repeal of the duty on lac dye in November 1874.

* Gross collections.

190. Looking at the customs revenue provincially, we see Bengal at the head Bengal. of the list, with a return of 3,435,739*l.* from imports, and 200,068*l.* from exports, showing an increase over the previous year of 200,820*l.* in imports, and a decrease of 18,781*l.* in exports.

Bombay follows with a revenue of 633,343*l.* from imports, and 49,769*l.* from Bombay. exports; the difference between the two provinces being that, whereas Bengal exports large quantities of dutiable articles, such as lac, indigo, seeds, rice, &c., the main staple of export from Bombay is cotton, which is free. In Bombay both import and export duties show a small increase.

The total revenue realised in Sind was 22,825*l.* on imports (a small decrease on Sind. the preceding year), and 17,252*l.* on exports—a fair increase on 1873-74.

The revenue of Madras was 172,123*l.* on imports, being a decrease of 5,630*l.* in Madras. 1873-74. Exports also fell off by 13,633*l.*, having amounted to 123,226*l.*

The customs revenue of British Burma increased from 96,714*l.* in 1873-74 British Burma. to 116,302*l.* in the year of report—a satisfactory increase. On the other hand, the export duties fell off from 314,803*l.* to 271,746*l.* consequent on the decrease in the export of rice.

191. Under the tariff adopted on the 5th August 1875, the only articles of Indian Present tariff. produce now subject to duty on export are indigo, rice, and lac.

SECTION VI.

COASTING OR INTERPORTAL TRADE.

192. The interportal trade of British India should properly be classified in each province under three heads, viz., trade with—

- (1.) British ports in other provinces :
- (2.) British ports within the province :
- (3.) Foreign Indian ports, whether in other provinces or within the province.

This is the classification adopted in the returns from the commencement of 1875–76 but the classification of previous years was defective, inasmuch as it omitted the trade from port to port within a province, and erroneous, inasmuch as owing to a misapprehension some local Governments did not clearly perceive what was wanted, and rendered imperfect figures. Thus in Part II of the volume now under review, the figures of the coasting trade embrace only (1) trade from British Indian ports in one province to British Indian ports in another province, and (2) trade between British Indian and Foreign Indian ports, the trade from port to port (British) in the same province being omitted. To remedy this defect and obtain a complete view of the total trade (foreign as well as coasting) of every port in India, the forms contained in Part IV of the Annual Accounts of Trade and Navigation were devised, showing the trade of each port with—

- (i.) Foreign countries external to India :
- (ii.) Ports in other Presidencies :
- (iii.) Ports within the Presidency.

In compiling the review of the trade for each year hitherto it has been the practice to add to the figures in Part II those in Part IV under the head “with ports within the Presidency.” This classification, however, was vague, for to arrive at a correct result the word “British” should have been prefixed to the words “with ports within the Presidency,” the trade with Foreign Indian ports in the Presidency as well as in other Presidencies having already been shown in Part IV. The result has been that part of the figures given in Part II have in previous reviews been taken twice over, once from Part II and again from Part IV. But a more serious error has occurred, for in the Presidencies of Madras and Bombay the words “Ports within the Presidency” have been taken to mean *Foreign* ports within the Presidency, and consequently the trade between British Ports in the same Presidency has been wholly omitted for years past in these returns, so far as Bombay and Madras are concerned. As the figures of this trade amount to an extremely large sum, the whole of the calculations which have hitherto been based on the accepted returns of the coasting trade are worthless. The discovery of this error and the subsequent attempts made to obtain accurate statistics have been the cause of the delay in the issue of the Accounts of Trade for the year 1874–75. Under the precise classification now enforced it is impossible that any such mistakes can occur in future.

The tables in Part II have also been deficient in another respect. The figures for Foreign Indian ports entered against Bombay represented the trade of that province only with Goa, Damaun, and Diu (Portuguese), and Pondicherry and Mahé (French), but did not include the trade with Cutch, Kattywar, and Foreign Konkan, the local monthly returns having omitted this branch of the trade altogether, although it amounts in value to about two millions sterling annually. The annual volume published by the Government of Bombay, however, contains the figures of this trade.

The value of the trade between British ports within the province, for Madras and Bombay, for the year 1874–75, has been ascertained and inserted in the following

statement, which exhibits the total amount of the interportal trade for the past year.

IMPORTS.

		Bengal.	Bombay.	Sind.	Madras.	British Burma.	TOTAL.

Total Merchandise and Treasure -		7,297,810	10,287,010	807,786	5,116,434	3,035,719	26,544,759
Grand Total of Imports and Exports		11,288,987	20,898,351	2,257,690	9,461,757	6,419,873	50,326,658

193. The total of the interportal trade, it will be seen from the foregoing statement, amounts to over fifty millions of pounds sterling, the share of each of the three classes into which it has been divided being as follows:—

Trade from British Ports in one Province	£
to British Ports in other Provinces	- 25,631,053
Trade with Foreign Indian Ports	- 2,641,191
Trade between British Ports in each Province	22,054,414
TOTAL	- 50,326,658

194. The trade was shared by each province in the following proportions:—

Bengal	-	22·43
Bombay	-	41·52
Sind	-	4·49
Madras	-	18·80
British Burma	-	12·76

Principal articles
of trade.

195. The principal articles comprising the coasting trade are: animals (living), apparel, coal, coffee, coir (raw and manufactured), cotton (raw), cotton twist and yarn, and cotton piece-goods, drugs and medicines, dyes, viz., indigo and other kinds, fruits and vegetables, viz., cocoanuts and other kinds, grain and pulse (gram, rice and paddy, wheat, and other grains), gums and resins (cutch and gambier), hemp (raw and manufactured), hides and skins, jute (raw) and manufactures of jute (mostly gunny bags and cloths), lac of all kinds, wines and spirits, metals and manufactures of metals, oils (mineral and vegetable), provisions and oilman's stores, salt, seeds of all kinds, silk (raw and manufactured), spices largely consisting of betelnuts), sugar and other saccharine produce, tobacco (raw and manufactured), wood (teak) and manufactures of wood, and wool (raw and manufactured).

196. The details of the coasting trade, as recorded in the accounts furnished to the Government of India, are so manifestly incomplete that it is unsafe to trust them or to base any general conclusions upon the published figures. It will be best to limit comment to a few important items exchanged inter-provincially, and show for these the fluctuations from year to year for the last five years.

Apparel.

197. Of apparel the value of the exports has advanced from 105,391£. in 1870-71 to 214,519£. in 1874-75.

The figures for each year are as follow:—

	£
1870-71	105,391
1871-72	114,861
1872-73	130,311
1873-74	176,476
1874-75	214,519

The increase in the trade is mainly in Bengal, whence apparel to the value of 134,168£. was exported during the year, against 116,783£. in 1873-74 and 71,969£. in 1872-73. Exports from Bombay amounted to 65,626£. These goods are sent to British Burma, Sind, and Madras, Burma taking the largest share.

Coffee.

198. The export of coffee amounted in value to 95,859£., against 50,794£. in the previous year. The trade however is not very much above the point at which it stood in 1870-71. Madras is of course the largest exporter, almost monopolising the trade, the figures for that presidency standing at 93,147£. Bombay takes much the largest share (66,000£.) of Madras coffee, exporting a good deal of it to foreign ports.

199. The exports of this article indicate a prosperous trade :—

Coir.

	£
1870-71	63,212
1871-72	60,296
1872-73	85,915
1873-74	88,497
1874-75	103,901

Of this trade too Madras practically possesses the monopoly, the exports from that presidency having been worth during the year 99,904%. Bombay and Bengal take the largest share (50,800% and 30,376% respectively).

200. The value of the exports was :—

Cotton (raw).

	£
1870-71	257,766
1871-72	258,783
1872-73	211,629
1873-74	234,698
1874-75	299,107

The returns from the different provinces show great fluctuations in the exports from each, the coasting trade no doubt rising or falling as prices for Indian cotton in the foreign markets fall or rise. British Burma, Sind, and Madras account for 109,960%, 106,714%, and 57,098% of the exports of the year; Bengal for 234,033% and Bombay 116,132% of the imports, the total value of which is given in the returns as 352,414%, against less than 300,000% exported. Part of the discrepancy may of course be accounted for, in this as in other cases of the kind, where imports largely exceed exports, or the reverse, by the non-inclusion of exports from and imports into Foreign Indian ports of which the Government of India has not as yet been able to obtain returns from the Foreign Administrations of these ports. But these omissions do not by any means account for the whole discrepancy. Thus, in the present case, the returns prepared in Burma inform us that the value of the exports of raw cotton from that province to Bengal was 109,753% in 1874-75. On the other hand the Bengal returns state that the value of the raw cotton imported in the year from Burma was 141,406%. Similar irreconcilable inconsistencies pervade the whole of the returns of the Indian coasting trade.

201. The chief exporters of twist and yarn are Bengal and Bombay, these two Cotton twist and yarn. presidencies accounting for 365,252% and 278,901% respectively, out of a total sum of 706,180%. The total figures for the five years are :—

	£
1870-71	570,411
1871-72	527,547
1872-73	662,609
1873-74	689,554
1874-75	706,180

These goods are sent in the greatest proportion to Madras and British Burma.

202. The figures for cotton piece-goods do not show such an increasing trade as Cotton piece-goods. those for twist and yarn indicate. But it is believed that increasing quantities of these goods are sent from province to province by railway. The annual value of the exports for the last five years was :—

	£
1870-71	1,879,800
1871-72	1,855,573
1872-73	1,745,767
1873-74	1,667,975
1874-75	1,716,783

Exports from Bombay show a material decrease :—

	£
1870-71	1,162,122
1871-72	1,057,201
1872-73	1,032,660
1873-74	962,283
1874-75	933,740

But the decrease is probably more apparent than real, large quantities of cotton goods (both of Manchester and Indian make) now finding their way from Bombay to other parts of the country by rail and otherwise than by sea.

Exports from Bengal are tolerably steady :—

	£
1870-71	566,170
1871-72	652,173
1872-73	539,164
1873-74	538,581
1874-75	573,712

Exports from Madras are not unimportant, having amounted to 172,976*l.* during the year. The trade seems to be increasing. The largest importing province is Sind (672,620*l.*), a material proportion of the imports no doubt finding its way out of India into the neighbouring countries across the Sind frontier. Madras follows with an import of 329,462*l.* and Burma with 167,154*l.*

Fruits and vegetables : cocoanuts.

203. The value of the cocoanuts exported during the last five years was :—

	£
1870-71	129,067
1871-72	356,329
1872-73	329,721
1873-74	300,982
1874-75	360,010

As with coir (the husk of the nuts), so with the nuts themselves, Madras has most of this trade, the value of the exports thence during the year having been 324,037*l.* Bombay and Bengal take the largest share of these fruits.

Grain and pulse : rice in the husk.

204. The figures for the five years which represent the value of paddy exported coastwise are :—

	£
1870-71	81,385
1871-72	85,269
1872-73	88,137
1873-74	144,668
1874-75	186,775

The trade thus shows a considerable increase in the last two years, much of which is the result of an increased trade in Bombay and Sind. Madras is almost the sole importer of paddy. The largest exporters were Bombay (98,586*l.*), British Burma (49,128*l.*), and Sind (31,942*l.*).

Rice not in the husk.

205. The trade in husked rice is very large :—

	£
1870-71	1,396,217
1871-72	1,403,610
1872-73	1,145,457
1873-74	1,838,303
1874-75	1,522,644

The value of the export coasting trade in rice from Burma is shown below :—

	£
1870-71	54,182
1871-72	49,726
1872-73	36,404
1873-74	1,109,694
1874-75	688,637

And on the other hand the Bengal trade has fallen off very largely :—

	£
1870-71	1,165,408
1871-72	1,188,453
1872-73	897,156
1873-74	418,234
1874-75	613,082

The rise in the one case and fall in the other are explained by the scarcity in Bengal in 1874, during the prevalence of which enormous quantities of rice were poured into the province from Burma, while comparatively but little Bengal rice was available for export. The value of the rice imported into Bengal in the five years was :—

	£
1870-71	1,460
1871-72	552
1872-73	80
1873-74	56,134
1874-75	919,821

During this last year, the value of the imports of Burma rice into Bengal was, according to the returns furnished by the Bengal authorities, 822,369*l.*, and according to the Burma returns 666,319*l.* In ordinary years the import of Burmese rice into Bengal is insignificant, because (*firstly*) it is not wanted, and (*secondly*) the people do not like it. In addition to the large quantity of rice imported by private trade into Bengal, the Government imported during the year rice to the value of 907,147*l.*, viz., 733,788*l.* from Burma and 173,359*l.* from Madras.

206. The value of the trade in hides and skins was :—

Hides and skins.

	£
1870-71	120,332
1871-72	141,319
1872-73	241,127
1873-74	135,635
1874-75	155,043

Madras is the largest exporter, the trade of that province having amounted to 118,096*l.* during 1874-75. The largest importer is Bengal.

207. The coasting trade in raw jute is falling off in proportion to the increase in the exports of manufactured jute, the development of jute spinning by steam in Calcutta having made it more profitable for other provinces to import bags and cloths ready made than to work them up themselves from the raw material. The exports of raw jute, nearly all from Bengal, were for the five years :—

	£
1870-71	12,965
1871-72	57,164
1872-73	107,212
1873-74	27,010
1874-75	47,298

The chief importer is Bombay.

208. The value of the exports of manufactured jute (also mainly from Bengal) is appended :—

	£
1870-71	360,759
1871-72	536,223
1872-73	678,777
1873-74	1,032,745
1874-75	1,249,846

Jute (raw).
Jute (manufac-
tured).

These figures indicate the large field there is in India itself for the productions of the Calcutta jute mills, over and above the foreign markets which they supply. The principal consumers are Bombay and British Burma, the former for the packing of cotton, seeds, and wheat, and the latter for the packing of rice.

Metals, and manufactures of metals.

209. The value of the trade is increasing steadily :—

	£
1870-71	423,910
1871-72	433,072
1872-73	491,210
1873-74	539,989
1874-75	637,750

The principal exporters are Bengal and Bombay, and the importers are Madras, Sind, and Burma.

Oils, mineral.

210. This trade is increasing, as will be seen from the figures below :—

	£
1870-71	4,607
1871-72	15,119
1872-73	40,153
1873-74	39,936
1874-75	33,394

The trade mainly consists of the export of petroleum from Rangoon to Calcutta.

Oils, vegetable.

211. This trade is steady. The exports last year amounted to 265,562*l.*, against 257,291*l.* in 1870-71, with not very much fluctuation in the intervening period. The chief exporter is Madras, and the bulk of the oil is consumed in Bombay, Burma, and Bengal, the first-mentioned presidency taking much the largest share.

Provisions and oilman's stores.

212. The value of the trade seems falling off, having amounted to 127,927*l.* in the year, against 140,942*l.* in 1873-74 and 259,260*l.* in 1870-71. The trade is divided in not very unequal proportion between Bengal, Bombay, Sind, and Madras.

Salt.

213. The trade for the five years was :—

	£
1870-71	298,722
1871-72	265,609
1872-73	436,650
1873-74	331,218
1874-75	319,119

According to the figures given by the Bombay Custom House, the salt exported during the year was sent to the value of 162,927*l.* to the Madras Presidency, and to the value of 151,108*l.* to Bengal. According to the returns from Madras the value of the salt imported during the year from Bombay was 85*l.*, and according to the figures furnished by the Calcutta Custom House the imports there were 59,646*l.* The figures are quite irreconcilable, and strikingly illustrate the general worthlessness of the statistics of the coasting trade.

Silk (raw).

214. For raw silk the figures of export are :—

	£
1870-71	376,759
1871-72	298,160
1872-73	324,703
1873-74	259,869
1874-75	413,285

The main seat of this trade is in Bengal, the figures for this province being :—

	£
1870-71	280,419
1871-72	266,554
1872-73	303,334
1873-74	241,564
1874-75	392,263

Most of the silk exported from Bengal is sent to Madras.

215. The coasting trade in manufactured silk is thriving, the value of the exports Silk manufactures, having advanced from 161,777*l.* in 1870-71 to 323,938*l.* in 1874-75. Bengal is the largest exporter of silk goods, Burma taking the great bulk of the exports.

216. This trade is also improving. The figures for the five years are:—

Spices.

	£
1870-71	404,197
1871-72	359,411
1872-73	428,735
1873-74	485,241
1874-75	524,207

The exports of the year were shared by the different provinces as follows: Madras 235,195*l.*, Bengal 202,742*l.*, Bombay 75,437*l.*, Burma, 10,528*l.*, the balance of 305*l.* belonging to Sind. By far the largest proportion of the exports from Bengal consists of betelnuts sent to Burma, the people of that province, like all the Indo-Chinese communities, being addicted to the immoderate consumption of the nut.

217. The export of sugar and sugar-stuffs was greater in the year of report than in 1873-74 (667,190*l.*, against 646,441*l.*), but less than in 1870-71, when the value of the trade was estimated at 698,770*l.* Bengal is the largest exporter of sugar, and Bombay the largest importer. Sugar and other saccharine produce.

218. The value of the trade in tobacco is as follows:—

Tobacco, raw and unmanufactured.

	£
1870-71	188,298
1871-72	158,878
1872-73	117,543
1873-74	217,215
1874-75	188,657

Of this last sum the exports from Bengal represent 115,820*l.* and from Madras 62,867*l.* Much the largest share of the exports is taken to Burma, where the leaf is either consumed by the population, or made up into cheroots to be returned to Bengal as "Burma cheroots." The soil and climate of British Burma are well adapted to the growth of excellent tobacco; but the leaf is so little grown that even much of the supply required for local consumption has to be imported from other provinces. Burma received during the year from Bengal 110,532*l.* and from Madras 45,490*l.* worth of tobacco.

219. Exports were valued at:—

Wood: teak.

	£
1870-71	186,109
1871-72	266,189
1872-73	373,366
1873-74	432,652
1874-75	483,504

Teak is exported mainly from Burma, Madras also sending away a small quantity. Bengal takes most of this wood, which is used for construction and furniture.

220. The trade in raw wool is falling off:—

Wool (raw).

	£
1870-71	318,994
1871-72	525,681
1872-73	516,048
1873-74	349,884
1874-75	256,583

Sind possesses the monopoly of this trade, the exports from that province having been :—

	£
1870-71 - - - - -	318,434
1871-72 - - - - -	525,290
1872-73 - - - - -	514,634
1873-74 - - - - -	348,295
1874-75 - - - - -	255,568

Nearly all this wool goes to Bombay, whence a good deal is re-exported to foreign countries.

Coin and bullion. 221. The total movement of treasure (gold and silver) between the different provinces of India amounted in the year of report to—

Imports—	£
Private - - - - -	1,618,131
Government - - - - -	1,308,460
Exports—	
Private - - - - -	1,666,367
Government - - - - -	1,532,593

Nearly the whole of this money is interchanged by British Indian ports. Hardly any treasure is transmitted to or received from foreign ports in India, at any rate by sea.

SECTION VII.

SHIPPING.

I.—FOREIGN INTERCOURSE.

222. The total number and tonnage of vessels which entered and cleared at all ports in British India from and to foreign countries with cargoes and in ballast for the five years ending with 1874-75 is shown below :

				Vessels.	Tons.
1870-71	-	-	-	11,838	4,142,168
1871-72	-	-	-	12,539	4,645,997
1872-73	-	-	-	12,466	4,759,980
1873-74	-	-	-	12,739	4,647,410
1874-75	-	-	-	12,404	4,835,516

223. The entries and clearances of vessels with cargoes are as follow :—

				Vessels.	Tons.
1870-71	-	-	-	8,644	3,541,617
1871-72	-	-	-	9,129	4,021,378
1872-73	-	-	-	9,137	3,996,102
1873-74	-	-	-	9,158	3,902,327
1874-75	-	-	-	8,768	4,074,256

Vessels with
cargoes.

Thus, though the number of vessels was rather less in the year of report than in the three previous years, the aggregate tonnage was a good deal larger, pointing to the employment of vessels of a larger average size in the Indian carrying trade.

224. The following figures show the share of each Province in the movement of shipping with cargoes for the last five years :—

					Vessels.	Tons.
Bengal—						
1870-71	-	-	-	-	1,401	1,361,194
1871-72	-	-	-	-	1,509	1,520,798
1872-73	-	-	-	-	1,432	1,457,435
1873-74	-	-	-	-	1,248	1,349,858
1874-75	-	-	-	-	1,243	1,389,284
Bombay—						
1870-71	-	-	-	-	1,615	915,854
1871-72	-	-	-	-	1,619	1,046,072
1872-73	-	-	-	-	1,476	926,278
1873-74	-	-	-	-	1,553	945,930
1874-75	-	-	-	-	1,608	1,074,086
Sind—						
1870-71	-	-	-	-	479	82,854
1871-72	-	-	-	-	472	85,208
1872-73	-	-	-	-	410	76,696
1873-74	-	-	-	-	488	116,269
1874-75	-	-	-	-	528	122,668
Madras—						
1870-71	-	-	-	-	4,287	721,388
1871-72	-	-	-	-	4,425	802,441
1872-73	-	-	-	-	4,547	778,550
1873-74	-	-	-	-	4,765	833,967
1874-75	-	-	-	-	4,458	875,789

Share of each
province.

British Burma—

	Vessels.	Tons.
1870-71	862	460,327
1871-72	1,104	566,859
1872-73	1,272	757,143
1873-74	1,104	656,303
1874-75	931	612,429

Nationalities :
British shipping ;

225. The proportion in which British bottoms were employed in 1874-75 was about 67·64 per cent. of the whole tonnage which entered and cleared from Indian waters; this proportion has not very materially varied during the last five years. The figures of British tonnage are—

	Vessels.	Tons.
1870-71	3,242	2,882,248
1871-72	4,044	3,317,043
1872-73	3,600	3,266,880
1873-74	3,317	3,135,130
1874-75	3,382	3,271,104

British-Indian
shipping ;

The number of vessels under the British-Indian registry has fallen off as compared with the previous year, but the tonnage is in excess of the previous years of the quinquennial period :—

	Vessels.	Tons.
1870-71	7,048	645,305
1871-72	6,882	665,213
1872-73	6,868	639,648
1873-74	7,230	698,982
1874-75	6,879	683,627

Foreign shipping ;

The proportion of British-Indian tonnage employed in the foreign trade to all other tonnage was in 1874-75 about 14·14 per cent.

The remaining 18·22 per cent. of the aggregate tonnage consisted of foreign shipping, the figures of which for the past five years are as follow :—

	Vessels.	Tons.
1870-71	1,548	614,615
1871-72	1,613	663,741
1872-73	1,998	853,452
1873-74	2,192	813,298
1874-75	2,143	880,785

Detail of foreign
shipping.

The nationalities chiefly represented in the foreign shipping entering at and clearing from British Indian Ports are shown in the following statement, in which the number of vessels and the aggregate tonnage are contrasted for 1873-74 and 1874-75 :—

Nationalities.	1873-74.		1874-75.	
	Vessels.	Tonnage.	Vessels.	Tonnage.
Austrian	54	46,489	57	54,672
French	344	175,143	375	192,373
German	88	66,904	76	64,726
Italian	290	181,222	254	177,598
Norwegian	55	37,607	107	81,413
Portuguese	21	4,309	21	2,974
Russian	22	14,377	29	23,012
Swedish	41	24,306	45	25,944
American	132	132,949	139	144,205
Arab	565	76,798	493	64,413

Countries.

226. 961 vessels (1,160,365 tons) entered from the United Kingdom and 1,133 (1,191,390 tons) cleared thither during the year. The movement between India and other principal countries with which we have intercourse is shown as follows :—

* Of these 88 entered in ballast.

II.—INTERPORTAL TRADE.*

227. The intercourse between the ports of India displays increasing activity each year, as will be seen from the figures annexed of entries and clearances at all the ports for five years :—

			Vessels.	Tons.
1870-71	-	- { Entered	- 13,357	1,796,699
		- { Cleared	- 12,472	1,789,189
		Total	- 25,829	3,585,888
1871-72	-	- { Entered	- 15,071	1,790,163
		- { Cleared	- 14,275	1,897,478
		Total	- 29,346	3,687,641
1872-73	-	- { Entered	- 15,958	1,965,897
		- { Cleared	- 15,211	2,084,962
		Total	- 31,169	4,050,859
1873-74	-	- { Entered	- 14,171	2,124,059
		- { Cleared	- 13,155	2,242,283
		Total	- 27,326	4,366,342
1874-75	-	- { Entered	- 13,528	2,461,266
		- { Cleared	- 13,037	2,589,718
		Total	- 26,565	5,050,984

The diminution in the number of vessels and the increase in the aggregate tonnage following on a similar diminution and increase in the previous year, show that the small native coasting vessels are, as was said in the review of the trade for 1873-74, being gradually displaced by larger and presumably better equipped vessels. The average tonnage of each vessel engaged in the coasting trade was 130 in 1872-73, 159 in 1873-74, and 190 in 1874-75.

The nationalities of the vessels are shown below :—

NATIONALITY.	1870-71.		1871-72.		1872-73.		1873-74.		1874-75.	
<i>Entered.</i>	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.

LETTER FROM THE GOVERNMENT OF INDIA, DATED 25th
FEBRUARY 1876. No. 7. (STATISTICS.)

We have the honour to forward for Your Lordship's information the accompanying papers, viz :—

- (1.) Accounts of Trade and Navigation for British India for 1874-75.
 - (2.) Review of the accounts by Mr. J. E. O'Connor, Assistant Secretary in the Department of Revenue, Agriculture, and Commerce.
 - (3.) Resolution thereon by the Government of India, No. 124, dated the 24th instant.
2. The delay in the publication of the volume, which has been in the press since last October, is explained in our Resolution:
-

RESOLUTION OF THE GOVERNMENT OF INDIA.

The publication of these accounts has been somewhat delayed, but the delay was unavoidable, owing to the discovery of serious errors in the accounts of the coasting trade of Madras and Bombay for the year and for previous years. The nature of these errors is explained at page lxxxviii of the Review prepared by Mr. O'Connor. The errors in question in the Madras accounts represented the entire omission from all published statements of the value of the coasting trade between British ports in that province, amounting in 1874-75 to no less a sum than 4,974,716*l*. In Bombay the errors consisted of a similar omission up to the year 1873-74 of the value of a trade which amounted in 1874-75 to 13,049,870*l*., and of a discrepancy of over two millions sterling between the annual account of trade and navigation published in that presidency and the annual account (Part II) published by the Government of India compiled from figures furnished monthly by the local authorities, the trade with Cutch, Kattywar, and Foreign Konkan having been omitted from the local monthly returns. It does not appear that any blame is to be attributed to the officers who compiled the accounts in Madras and Bombay, the instructions given for the preparation of the forms prescribed by the Government of India in 1871 having been misunderstood.

2. On the discovery of these errors a complete revision of the figures for the year and for the previous four years became necessary, and much delay ensued in the issue of the volume, which was in the press as long ago as October 1875. The delay, however, has been more than compensated by the rectification of vital errors which had run through successive volumes of statistics published by the Government of India. It is believed that under the strict system of classification which has now been adopted, the recurrence of such mistakes is impossible.

3. The review of the accounts is so full, that further comment on the results of the trade of the year is unnecessary. The Governor-General in Council wishes it to be understood that the opinions expressed in the Review are those of the compiler individually, and that His Excellency in Council is not prepared to endorse them. But whether the facts justify in every case the conclusions drawn from them or not, the facts themselves are clearly set out and the details carefully arranged, and the paper is a useful résumé of the extent and direction of Indian trade in all important particulars for 1874-75 and for various periods preceding that year. Copies will therefore be circulated with copies of this Resolution and of the accounts on which the review is based, for general information.

ABSTRACT TABLES

RELATING TO

THE IMPORT AND EXPORT TRADE OF BRITISH INDIA.

NOTE.—In all these Tables Merchandise does not include Treasure, of which the details will be found at pages 15 and 16.

No. 1.

VALUE of the TOTAL IMPORTS and EXPORTS of MERCHANDISE, distinguishing Indian Produce and Manufactures from Foreign Articles Exported.

SHIPPING AND TONNAGE.

No. 28.

TOTAL NUMBER and TONNAGE of ALL VESSELS, SAILING and STEAM, (including their REPEATED VOYAGES,) ENTERED and CLEARED, with Cargoes and in Ballast, at Ports in British India, from and to various Countries.

(NOTE.—There is no information showing Sailing and Steam Vessels separately, but it is expected that future Returns will show this distinction, under instructions issued by the Government of India.)
